This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Cracking the AP Spanish Language and Culture Exam with Audio CD, 2018 Edition Springer Science & Business Media

This unique book presents a four-year longitudinal study of the literacy development of children attending an Austin, Texas area elementary school. The reading and writing development of this microcosm of "at-risk" children was followed as they progressed from first through fourth grade. The author poses the question, "What skills and abilities of the child, and what classroom factors, appear to foster literacy development?" Included here are the author's models of reading and writing acquisition, and application of these models to six children: three with literacy problems and three with successful literacy development. Interviews with the children are presented along with measures of their cognitive development and skills, samples of their reading and writing from and

throughout the four year study, and an examination of their successes and failures in relations to the models presented in earlier chapters. Additionally, one chapter examines school-related factors that may play a role in the children's reading development. The book is intended for graduate students at all levels and literacy researchers who are interested in the process of literacy acquisition as it occurs in the school setting.
