In *Horrors of War*, Tadjman combines his first-hand war-torn Yugoslavian experience with a vast knowledge of history, philosophy and literature to prove that violence and retribution are not new to this world, and unfortunately show no sign of abatement. As part of his review of violence in history, and its political uses, Tadjman examines the Yugoslav Communist creation of a croatian 'black legend', attempting to fix the blame for the world war II crimes of Croatia's Ustasha puppet government on the entire Croatian people. In particular, he assesses the nature and scope of the crimes committed by the Ustasha government, particularly at the Jasenovac death camp. He concludes that, although Jasenovac was a cruel and terrible place where tens of thousands were murdered, it does not and cannot justify the delegitimization of the Croatian nation. He chronicles the systematic use by the Yugoslav regime of Jasenovac and the ustasha terror as a tool in its attempt to eliminate Croatian aspirations towards independence. He brings up the fact that the anti-fascist movement in Croatia was one of the strongest anti-fascist movements not only in Yugoslavia but also in Europe. Franjo Tadjman is the president of the Republic of Croatia and a signer of the Dayton Accords.

Yearbook of International Organizations is the most comprehensive reference resource and provides current details of international non-governmental (NGO) and intergovernmental organizations (IGO). Collected, documented and disseminated by the Union of International Associations (UIA), detailed and profound information on international organizations worldwide can be found here, from the United Nations, the ASEAN and the Red Cross to sporting bodies and religious orders. Besides historical and organizational information (e.g. on aims, subject orientation and locations), details on activities, events or publications as well as the most current contact details are included. Integrated are also biographies of the leading individuals of the organizations as well as the presentation of networks of organizations. The Union of International Associations (UIA) is a non-profit, apolitical, independent and non-governmental institution in the service for international associations, based in Brussels, Belgium. For 100 years, the UIA has focused on the nature and evolution of the international civil society - a topic of increasing relevance.

New: UIA Bi-monthly Study Find out about current topics and the wealth of information contained in the Yearbook of International Organizations. No. 1 of UIA's new Bi-monthly Study is now available for download. This time's subject: Olympic Games and Sports.

The twenty-three articles in this volume are based on papers and posters presented at the Olomouc Linguistics Colloquium (OLINCO) at Palacký University in the Czech Republic in June 7-9, 2018. This conference welcomed papers that combined analyses of language structure with generalizations about language use. The thematic sections are as follows: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and Projections; Part IV: Empirical Approaches to Contrastive Linguistics and Translation Studies. Články v tomto sborníku vycházejí z příspěvků prezentovaných na konferenci Olomouc Linguistics Colloquium (OLINCO), pořádané Univerzitou Palackého v Olomouci ve dnech 7. 6. - 9. 6. 2018. Jako téma byl zvolen "Jazyk jako prostředek a lingvistická struktura", což mělo umožnit prezentaci referátů ze všech současných lingvistických disciplín, pokud se zabývají vědeckým (empirickým, formálním) popisem jazykového systému. Články jsou rozděleny do následujících tematických sekcí: Part I. Micro-syntax: The Structure and Interpretation of Verb Phrases; Part II. Micro-syntax: Word-Internal Morphosyntax in Nominal Projections; Part III. Macro-syntax: Structure and Interpretation of Discourse Markers and

Projections; Part IV: Empirical Approaches to Contrastive Linguistics and Translation Studies.

For more than a thousand years before the arrival of the Slavs in the sixth century AD, the lands between the Adriatic and the river Danube, now Yugoslavia and Albania, were the home of the peoples known to the ancient world as Illyrians. This book, now available in paperback, draws upon the considerable archaeological evidence that has become available since the Second World War to provide an account of the origins, culture, history and legacy of the Illyrians. John Wilkes describes the geography of Illyria and surveys the region in the prehistoric, Greek, Roman and medieval periods. He discusses Illyrian art, material, culture, religion and customs. A chapter examines the Illyrian language, of which little trace survives, and its connection with other Indo-European languages. Professor Wilkes also scrutinizes the linguistic evidence for the Illyrians' relatedness to other

peoples - Thracian, Italic, Greek and Celtic. He concludes with a discussion of a possible survival of an Illyrian native culture in the Roman and Byzantine periods.

Foundations for Designing User-Centered Systems introduces the fundamental human capabilities and characteristics that influence how people use interactive technologies. Organized into four main areas—anthropometrics, behaviour, cognition and social factors—it covers basic research and considers the practical implications of that research on system design. Applying what you learn from this book will help you to design interactive systems that are more usable, more useful and more effective. The authors have deliberately developed Foundations for Designing User-Centered Systems to appeal to system designers and developers, as well as to students who are taking courses in system design and HCI. The book reflects the authors' backgrounds in computer science, cognitive science, psychology and human factors. The material in the book is based on their collective experience which adds up to almost 90 years of working in academia and both with, and within, industry; covering domains that include aviation, consumer Internet, defense, eCommerce, enterprise system design, health care, and industrial process control.

Francis Bacon is Deleuze's long-awaited work on Bacon, widely regarded as the one of the most radical painters of the twentieth century. The book presents a deep engagement with Bacon's work and the nature of art. Deleuze analyses the

distinctive innovations that came to mark Bacon's style while introducing a number of his own famous concepts. Deleuze links Bacon's work to Cezanne's notion of a "logic" of sensation, which reaches its summit in colour.

Investigating this logic, Deleuze explores Bacon's crucial relation to past painters such as Velasquez, Cezanne, and Soutine, as well as Bacon's rejection of expressionism and abstract painting.

Visual Basic for Applications (VBA) is a set of tools based on the Visual Basic language. The great thing about using it to enhance Office applications is that it's easier to learn than Visual Basic and it comes with your Office license. After reading this book, the reader will be proficient in the VBA language and will have extensive knowledge of the Office 2003 Object Model. This book will cover all features of the VBA editor and show how to program some of the more useful new features in the Office 2003 applications. This book assumes no prior programming experience, so even programming novices can get up to speed quickly on the basics of the VBA language. It is very practical and offers the reader tested programs and projects that he or she can implement right away. This book reinforces the reader's learning by presenting useful, end-of-chapter pedagogical resources, including question-and-answer sessions and quizzes, as well as practical exercises that cement and extend the reader's knowledge. It explores not only the object models of Word and Excel, but also other members of the Office 2003 suite, including PowerPoint, Access, and Outlook.

This book explores how the Medici Grand Dukes pursued ways to expand their political, commercial, and cultural networks beyond Europe, cultivating complex relations with the Ottoman Empire and other Islamicate regions, and looking further east to India, China, and Japan. The chapters in this volume discuss how casting a global, cross-cultural net was part and parcel of the Medicean political vision. Diplomatic gifts, items of commercial exchange, objects looted at war, maritime connections, and political plots were an inherent part of how the Medici projected their state on the global arena. The eleven chapters of this volume demonstrate that the mobility of objects, people, and knowledge that generated the global interactions analyzed here was not unidirectional—rather, it went both to and from Tuscany. In addition, by exploring evidence of objects produced in Tuscany for Asian markets, this book reveals hitherto neglected histories of how Western cultures projected themselves eastwards.

This authoritative reference work will provide readers with a complete overview of artificial intelligence (AI), including its historic development and current status, existing and projected AI applications, and present and potential future impact on the United States and the world. Some people believe that artificial intelligence (AI) will revolutionize modern life in ways that improve human existence. Others say that the promise of AI is overblown. Still others contend that AI applications could pose a grave threat to the economic security of millions of people by taking their jobs and otherwise rendering them

"obsolete"—or, even worse, that AI could actually spell the end of the human race. This volume will help users understand the reasons AI development has both spirited defenders and alarmed critics; explain theories and innovations like Moore's Law, mindcloning, and Technological Singularity that drive AI research and debate; and give readers the information they need to make their own informed judgment about the promise and peril of this technology. All of this coverage is presented using language and terminology accessible to a lay audience.

Historical records show that there was no real concept of probability in Europe before the mid-seventeenth century, although the use of dice and other randomizing objects was commonplace. Ian Hacking presents a philosophical critique of early ideas about probability, induction, and statistical inference and the growth of this new family of ideas in the fifteenth, sixteenth, and seventeenth centuries. Hacking invokes a wide intellectual framework involving the

growth of science, economics, and the theology of the period. He argues that the transformations that made it possible for probability concepts to emerge have constrained all subsequent development of probability theory and determine the space within which philosophical debate on the subject is still conducted. First published in 1975, this edition includes an introduction that contextualizes his book in light of developing philosophical trends. Ian Hacking is the winner of the Holberg International Memorial Prize 2009. *The Illyrians* Princeton University Press

This book constitutes the refereed proceedings of the 20th International Conference on Group Decision and Negotiation, GDN 2020, which was planned to be held in Toronto, ON, Canada, during June 7-11, 2020. The conference was cancelled due to the Coronavirus pandemic. Nevertheless, it was decided to publish the proceedings, because the review process had already been completed at the time the cancellation was decided. The field of Group Decision and Negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals. Research areas of Group Decision and Negotiation include electronic negotiations, experiments, the role of emotions in group decision and negotiations, preference elicitation and decision support for group decisions and negotiations, and conflict resolution principles. The 14 full papers presented in this volume were carefully reviewed and selected from 75 submissions. They were organized in topical sections named: Conflict Resolution, Preference Modeling for Group Decision and Negotiation, Intelligent Group Decision Making and Consensus Process,

Collaborative Decision Making Processes. *Blago Jeziga Slovinskoga ... Thesaurus linguæ Illyricæ; sive, Dictionarium, Illyricum in quo verba Illyrica Italice et Latine redduntur, labore P. J. Micalia ... collectum, etc* A&C Black

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day,

-and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are

fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
