Extracts from the text: "Why are fifteen million children and youth in poverty not achieving when we know that low-income students excel in the classrooms of "star" teachers (who comprise approximately 8 percent of the teaching force)?" "Whose needs or interests are being met in education reform today?" "In my own institution, there has not been a systematic assessment of the effectiveness of the basic teacher education program since the institution was founded over a century ago as a teachers college. Imagine, not one ever!" "Teachers who empathize with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet the needs of their students. Half of the starry-eyed beginners are gone in five years or less." "Why does teacher education focus on the managerial, instrumental or delivery system aspects of the profession?" "The expert advice dispensed by schools of education regarding what future teachers should do is not connected to any theory of learning, or to any reality of life in school classrooms." "Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their students?" "Does a qualified teacher equate to a quality teacher?" "The best hope of getting more effective teachers from university teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children

and youth. At the district level, the salaries of hiring officials should be based on how well these officials identify and retain quality teachers."In this book, 12 distinguished scholars provide a hard-hitting, thoroughly researched, historical and theoretical critique of our schools of education, and offer clear recommendations on what must be done to ensure all children can achieve their potential, and contribute to a vibrant, democratic society.

Originally published in 1981, this title is a collection of chapters based on papers presented at a conference called to explore what the editors called a developmental-interaction point of view – an approach to developmental psychology and education that stresses these interactive and reciprocal relations. The contributors, although from diverse professional backgrounds, are united in their commitment to an integrative view of developmental phenomena, one that highlights relationships among different aspects of development and the reciprocal nature of relations between people and their environments.

"A tool box overflowing with ideas that will help every staff developer craft a school culture hospitable to adult and student learning." —Roland S. Barth, Author, *Lessons Learned* "The book speaks to many audiences, including instructional coaches, PLC leaders, action researchers and group leaders, and university professors working with action researchers and PLCs." —Gail Ritchie, Coleader, Teacher Researcher Network Fairfax County Public Schools, VA "A terrific resource for connecting teacher networks and action research to create powerful professional development opportunities. This book is a joy to read." —Ellen Meyers, Senior Vice President Teachers Network Powerful tools for facilitating teachers' professional development and optimizing school improvement efforts! Professional learning communities (PLCs) and action research are popular and proven frameworks for professional development. While both can greatly improve teaching and learning, few resources have combined the two practices into one coherent approach. The Reflective Educator's Guide to Professional Development provides educators with strategies, activities, and tools to develop inquiry-oriented PLCs. Nationally known school reform experts Nancy Fichtman Dana and Diane Yendol-Hoppey cover the ten essential elements of a healthy PLC, provide case studies of actual inquiry-based PLCs, and present lessons learned to help good coaches become great coaches. With this step-by-step guide, readers will be able to: Organize, assess, and maintain high-functioning, inquiry-oriented PLCs Facilitate the development of study questions Establish the trust and collective commitment necessary for successful action research Enable PLC members to develop, analyze, and share research results Lead successful renewal and reform efforts By combining two powerful training practices, coaches, workshop leaders, and staff developers can ensure continuous, robust school-based professional development.

Foreign Language Teachers and Intercultural Communication: An International Investigation reports on a study that focused on teachers' beliefs regarding intercultural competence teaching in foreign language education. Its conclusions are based on data collected in a quantitative comparative study that comprises questionnaire answers received from teachers in seven countries: Belgium, Bulgaria, Poland, Mexico, Greece, Spain and Sweden. It not only creates new knowledge on the variability, and relative consistency, of today's foreign language teachers' views regarding intercultural competence teaching in a number of countries, but also gives us a picture that is both more concrete and more comprehensive than previously known.

Teachers today must prepare students for an increasingly complex, interconnected, and interdependent world. Being a globally competent teacher requires embracing a mindset that translates personal global competence into professional classroom practice. It is a vision of equitable teaching and learning that enables students to thrive in an ever-changing world. This thought-provoking book introduces a proven self-reflection tool to help

educators of all grade levels and content areas develop 12 elements of such teaching. The book is divided into three sections: dispositions, knowledge, and skills. Each chapter is devoted to an element of globally competent teaching and includes a description of that element, tips for implementation delineated by developmental levels, and links to additional resources for continuing the journey. Examples of globally competent teaching practices include - Empathy and valuing multiple perspectives. - A commitment to promoting equity worldwide. - An understanding of global conditions and current events. - The ability to engage in intercultural communication. - A classroom environment that values diversity and global engagement. Throughout, you'll also find examples of these practices at work from real teachers in real schools. No matter what your experience with global teaching, the information in this book will help you further develop your practice as a global educator—a teacher who prepares students not only for academic success but also for a life in which they are active participants in their own communities and the wider world.

This volume provides an up-to-date collection of key aspects related to current preschool bilingual education research from a socio-linguistic perspective. The focus is on preschool bilingual education in multilingual Europe, which is characterized by diverse language models and children's linguistic backgrounds. The book explores the contemporary perspectives on early bilingual education in light of the threefold theoretical framework of child's, teachers', and parents' agencies in interaction in preschool bilingual education. Five significant theoretical concepts are promoted in this volume: the ecology of language learning, an educational partnership for bilingualism, a notion of agency in early language development and education, language-conducive contexts, and language-conducive strategies. The volume examines preschool bilingual education as embedded in specific socio-cultural contexts on the one hand and highlights its universal features on the other. The book is a fundamental read for scholars and students of second language teaching, preschool education, and bilingual education in multilingual and multicultural societies.

Tasks in Primary Mathematics Teacher Education is intended to advance relevant research and innovative international practices in the preparation and professional development of mathematics teachers. Emerging from discussion at the ICMI study on teacher professional development, this volume, focused on primary and elementary teachers, culls a richness that can only be found by gathering wisdom from varied experiences around the world. The choice of tasks, and the associated pedagogies, is a key aspect of teaching and learning mathematics. Arguing that what students learn is largely defined by the tasks they are given, several major themes are presented. One such major strand, the form, function and focus of tasks, is discussed throughout several chapters, offering analysis, discussion of implementation, and exemplars of a broader category of illustrative techniques for developing critical understanding.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

In the summer and autumn of 2006 I read several interviews with Brian May in which he mentioned his desire to complete the PhD that he had abandoned in 1974. I looked up the papers he had published while a PhD student, which were on spectroscopic studies of the motion of the dust responsible for the zodiacal light, and felt that there was a basis for a thesis. Since he had been a student at Imperial, I knew, as Head of the Astrophysics Group at Imperial, that it would be good for the Group if he came and worked with us. I got in touch with him by email and suggested he come and talk about it. He replied enthusiastically and said that he was working on typing up what he had completed by 1974. I gradually realized that I was the only staff member at Imperial who had previously worked on zodiacal dust, so that I would have to act as his supervisor. Eventually we met and I tried to assess whether he would be able to find time for the huge amount of work that finishing off a thesis involves, particularly if it has

not been touched for over 30 years. Since some of Brian's emails were coming from the recording studio I knew there was strong competition for his time.

Teacher Language Awareness (TLA) is an area of increasing interest to those involved in language teacher education. This book provides an introduction to the nature of TLA, assesses its impact upon teaching and its potential impact on learning. The book focuses specifically on grammar. It aims to encourage teachers and others involved in language education to think more deeply about the importance of TLA and to adopt a more principled approach to the planning of those parts of their programmes associated with it.
