Major help for those inevitable American History term paper projects has arrived to enrich and stimulate students in challenging and enjoyable ways. Students from high school age to undergraduate will be able to get a jumpstart on assignments with the hundreds of term paper projects and research information offered here in an easy-to-use format. Users can quickly choose from the 100 important events of the nineteenth century, carefully selected to be appealing to students, and delve right in. Each event entry begins with a brief summary to pique interest and then offers original and thought-provoking term paper ideas in both standard and alternative formats that incorporate the latest in electronic media, such as iPod and iMovie. The best in primary and secondary sources for further research are then annotated, followed by vetted, stable Web site suggestions and multimedia resources for further viewing and listening. Librarians and faculty will want to use this as well. Students dread term papers, but with this book, the research experience is

transformed and elevated. Term Paper Resource Guide to Nineteenth-Century U.S. History is a superb source to motivate and educate students who have a wide range of interests and talents. The provided topics on events, people, inventions, cultural contributions, wars, and technological advances reflect the country's nineteenth-century character and experience. Some examples of the topics are Barbary Pirate Wars, the Thomas Jefferson and Sally Hemings liaison, Tecumseh and the Prophet, the Santa Fe Trail, Immigration in the 1840s, the Seneca Falls Convention, the Purchase of Alaska, Boss Tweed's Ring, Wyatt Earp and the Gunfight at O.K. Corral, United States v. Wong Kim Ark, and Scott Joplin and Ragtime Music. Cyberimperialism? UN-HABITAT Under the conditions of economic globalization, the prevailing liberal philosophy of governance is becoming increasingly problematic. Liberty Beyond Neo-Liberalism critiques three varieties of liberal engagement with the processes of globalization and their ability to temper the harmful effects of the

process. Steven Slaughter proposes an alternate approach, global civic republicanism, which seeks to retrieve the civic and public character of the state in order to protect it from economic vulnerability and to constitute a resilient form of liberty.

An investigation of attitudes toward -- and unease with -- Information Technology, as reflected in recent German-language literature. Despite our embrace of the sheer utility and productivity it has made possible, the revolution in Information Technology has led to unease about its possible misuse, abuse, and even its eventual domination of humankind. That German culture is not immune to this sense of disquiet is reflected in a broad variety of German-language fiction since the 1940s. This first study of the literary reception of IT in German-speaking lands begins with an analysis of a seminal novel from the beginning of the computer age, Heinrich Hauser's *Gigant Hirn* (1948), then moves to its primary focus, the literature of the past two decades, ranging from Gerd Heidenreich's

Die Nacht der Händler (1995) to Daniel Glattauer's novel Gut gegen Nordwind (2006). Along the way, it analyzes eleven works, including Barbara Frischmuth's novel Die Schrift des Freundes (1998), René Pollesch's drama world wide web-slums (2001), and Günter Grass's novella Im Krebsgang (2003). As wildly different in approach as these works are, each has much to offer this investigation of the imaginary border dividing the human from the technological, a lingering, centuries-old construct created to ease the anxiety that technology has given rise to throughout the ages. Paul A. Youngman is Associate Professor of German at the University of North Carolina-Charlotte and Director of the Center for Humanities, Technology, and Science. *The Battle with the Slum* Springer

This groundbreaking book investigates the clash between a desire for unfettered mobility and the prevalence of

inequality, exploring how this generates frictions in everyday life and how it challenges the ideal of just cosmopolitanism. Reading fictional and popular cultural texts against real global contexts, it develops an 'aesthetics of justice' that does not advocate cosmopolitan mobility at the expense of care and hospitality but rather interrogates their divorce in neoliberal contexts.

«Globalisierung» ist seit den 1990er Jahren von einem nur in Fachkreisen gebräuchlichen wissenschaftlichen Terminus zu einem weit verbreiteten Schlagwort avanciert. Mit Beginn des 21. Jahrhunderts hat sich auch das deutschsprachige Theater verstärkt dem Phänomen «Globalisierung» zugewandt. Globalisierung kann dabei nicht nur als ein inhaltliches Feld eines Theatertextes verstanden werden, sondern greift auch auf ästhetischer Ebene in dessen Struktur, seine Inszenierung und Produktionsweise ein, so dass Globalisierung auch über das dramaturgische Arrangement eines Textes verhandelt wird. Die Arbeit schafft einen Überblick über die deutschsprachigen Theaterstücke, die sich mit dem Phänomen Globalisierung intensiv befassen, und beschreibt systematisch eine Dramaturgie der Globalisierung. Im Zuge der Analysen wird ein Korpus an Theaterstücken sowohl nach ästhetischen Mustern als auch nach inhaltlichen Schwerpunktsetzungen und strukturalen Gemeinsamkeiten in vier Themenkomplexe geteilt. Im Kontext von

Deterritorialisierung, globaler Ökonomie, Glokalisierung und Vernetzung werden die dramaturgischen Mittel der Theaterstücke näher beschrieben und der theatrale Diskurs um Globalisierung aufbereitet.

. . . a reflective and scholarly work that presents exciting and challenging views to mainstream entrepreneurship. . . The four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase.

Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The narrative and flow of the book is superb and very interesting to read. The book is well edited and thought provoking which makes it an interesting read. Vanessa Ratten, *Journal of Enterprising Communities: People and Places in the Global Economy* This book the third in the *Movements in Entrepreneurship* series examines entrepreneurship as a

societal phenomenon. It provides an in-depth study of the social aspects of entrepreneurship, illustrating how entrepreneurship affects society. The need to move beyond economy to disclose entrepreneurship in its societal forms is demonstrated, as is the relevance of our understanding of entrepreneurship as a societal phenomenon. The contributors show that entrepreneurship is a society-creating force and as such, it evokes new questions for entrepreneurship research and attempts to engage with new theoretical formulations. They begin with discussions on early Schumpeter and a rhetorical analysis of the current academic literature on social entrepreneurship. They go on to present myriad contextual examples of how entrepreneurship can shape social change, and indicate how this is initiated through various social settings, relationships and communities. Through rich empirical work this book explores the social of social entrepreneurship and in doing so shows us how entrepreneurship is at home where society is

created. As such, it will prove a fascinating read for academics, researchers and students with an interest in entrepreneurship, sociology and economic sociology.

Visit the Unspun website which includes Table of Contents and the Introduction. The World Wide Web has cut a wide path through our daily lives. As claims of "the Web changes everything" suffuse print media, television, movies, and even presidential campaign speeches, just how thoroughly do the users immersed in this new technology understand it? What, exactly, is the Web changing? And how might we participate in or even direct Web-related change? Intended for readers new to studying the Internet, each chapter in *Unspun* addresses a different aspect of the "web revolution"--hypertext, multimedia, authorship, community, governance, identity, gender, race, cyberspace, political economy, and ideology--as it shapes and is shaped by economic, political, social, and cultural forces. The contributors particularly

focus on the language of the Web, exploring concepts that are still emerging and therefore unstable and in flux. Unspun demonstrates how the tacit assumptions behind this rhetoric must be examined if we want to really know what we are saying when we talk about the Web. Unspun will help readers more fully understand and become critically aware of the issues involved in living, as we do, in a wired society. Contributors include: Jay Bolter, Sean Cubitt, Jodi Dean, Dawn Dietrich, Cynthia Fuchs, Matthew Kirschenbaum, Timothy Luke, Vincent Mosco, Lisa Nakamura, Russell Potter, Rob Shields, John Sloop, and Joseph Tabbi.

 Sie gelten häufig als zwei Antipoden des deutschsprachigen Gegenwartstheaters: René Pollesch und Laurent Chétouane. Das Theater des einen ist trashig, popkulturell, bildreich und schnell, es bedient sich aus allen Diskursen und schreibt diese in der Auseinandersetzung mit sozialen und politischen Fragen der Gegenwart weiter; das Theater des anderen ist minimalistisch

und schöpft seine Kraft aus der Reduktion, ist ganz auf das einzelne Wort, die einzelne Bewegung bedacht, die auf der Bühne erscheint. In dem Bestreben, die Bühne zum Denkraum zu machen, sieht Tim Schuster allerdings eine entscheidende Gemeinsamkeit des Theaters von Pollesch und Chétouane, die ihn in Räume, Denken zu einem Vergleich ihrer so unterschiedlichen Theaterästhetiken führt. Ausgehend von einer theoretischen Eröffnung zu Raumdenken, Verräumlichung und dem relationalen Entstehen von Theaterräumen zeigt Schuster an ausgewählten Inszenierungen der beiden Theatermacher die parallele Auseinandersetzung mit dem Denken der Bühne, von Text, Körper und Raum auf. Er analysiert anhand ihrer Arbeiten unterschiedliche Formen, den Raum zu denken, vorzustellen und als einen Raum gemeinsamer Erfahrung zu gestalten. *The Challenge of Slums* SAGE
 This book analyzes the hermeneutics of place, raising questions about central issues such as textuality, dialogue, and play. It discusses the

central figures in the development of hermeneutics and place, and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful. It covers the range of philosophical hermeneutic theory, both within philosophy itself as well as from other disciplines. In doing so, the volume reflects the state of theorization on these issues, and also looks forward to the implications and opportunities that exist. Philosophical hermeneutics has fundamentally altered philosophy's approach to place. Issues such as how we dwell in place, how place is imagined, created, preserved, and lost, and how philosophy itself exists in place have become central. While there is much research applying hermeneutics to place, there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place. This book fills that void by offering a sustained analysis of the central elements, major figures, and disciplinary applications of hermeneutics and place. No Logo Verso

A programmer, musician, and father of virtual reality technology, Jaron Lanier was a pioneer in digital media, and among the first to predict the revolutionary changes it would bring to our commerce and culture. Now, with the Web influencing virtually every aspect of our lives, he offers this provocative critique of how digital design is shaping society, for better and for worse. Informed by Lanier's experience and expertise as a computer scientist, *You Are Not a Gadget* discusses the technical and cultural problems that have unwittingly risen from programming choices—such as the nature of user identity—that were “locked-in” at the birth of digital media and considers what a future based on current design philosophies will bring. With the proliferation of social networks, cloud-based data storage systems, and Web 2.0 designs that elevate the “wisdom” of mobs and computer algorithms over the intelligence and wisdom of individuals, his message has never been more urgent.

Sociology in Today's World explores why sociology is important and relevant to everyday life. It teaches students how to think sociologically, not just what to think, and shows how sociology can help us make sense of our lives. It comprehensively covers key aspects and current issues in Australian and New Zealand society, whilst emphasising the importance of diversity and a global perspective.

This edited volume broadens the understanding of the media arts at a global scale bringing together practices and ideas from artists and art educators from around the world. Authors explore issues of cultural and social diversity in fields of education, media theory, and critical theories of education and pedagogy with particular attention to digital technologies' impact on visual arts learning. Researchers utilize a range of methodologies including participant-researcher ethnographies, action research, case study, and design based research. These artists and art educators share new research about the pedagogical and theoretical aspects of media arts in educational systems that are facing unprecedented change. This volume begins to map why and how experts are working within networked society and playing with digital innovations through media arts education as a critical and creative practice.

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the

lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.
