Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world. To meet the

challenges of the 21st century, students will especially need mathematical power: a positive disposition toward mathematics (curiosity and self confidence), facility with the processes of mathematical inquiry (problem solving, reasoning and communicating), and well connected mathematical knowledge (an understanding of mathematical concepts, procedures and formulas). This guide seeks to help teachers achieve the capability to foster children's mathematical power - the ability to excite them about mathematics, help them see that it makes sense, and enable them to harness its might for solving everyday and extraordinary problems. The investigative approach attempts to foster mathematical power by making mathematics instruction process-based, understandable or relevant to the everyday life of students. Past efforts to reform mathematics instruction have focused on only one or two of these aims, whereas the investigative approach accomplishes all three. By teaching content in a purposeful context, an inquiry-based fashion, and a meaningful manner, this approach promotes children's mathematical learning in an interesting, thought-provoking and comprehensible way. This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom. It not only dispenses information, but also serves as a catalyst for exploring, conjecturing about, discussing and contemplating the teaching and learning of mathematics.

HOW TO THRILL, CHILL, & GET AWAY FROM IT ALL WITHOUT ALCOHOL OR OTHER DRUGS....Getting high is fun. It's natural and healthy. It feels great to get a rush, see the world a little differently, alter our consciousness, and take a break from our everyday lives. Unfortunately, by the time we're older, it may seem like the only way to get high is with alcohol or other drugs. Which is why, when it comes to highs, you're likely to hear "Just Say NO." Read this book and you won't need artificial highs. You won't want them. You won't have time for them. You'll find so many ways to get high naturally that you'll never be able to try them all. Here are highs that will thrill you ... and highs that will soothe you. Highs that will take you deep inside yourself ... and waaaay outside. Highs that will change you forever without leaving you dull, burned out, or hung over. Look inside

for more than 150 creative, playful, legal, healthy highs. Plus interesting facts, cool quotes, and survey results from teens who shared their favorite ways to relieve stress and escape reality. All served up Alex J. Packer style-witty, wise, and often hilarious. Because laughter is one of the best highs of all.
