*Advanced Bushcraft* Createspace Independent Publishing Platform "Basic Safe Travel and Boreal Survival Handbook" was compiled for outdoor educators and the Junior Forest Warden movement mostly from articles originally published in "Wilderness Arts and Recreation Magazine" that had become out of print but much sought after. Some of the articles were the basis for Kochanski's "Bushcraft." A small fraction of the book will seem familiar but the rest makes an excellent complement to "Bushcraft" which devotes a minimum of references to actual survival while "Basic Safe Travel and Boreal Survival Handbook" is mostly survival.

*The Bushcraft Field Guide to Trapping, Gathering, and Cooking in the Wild* Black Dog & Leventhal

What Thoreau proved a century ago about returning to nature will still work today. There is an inexpressible thrill in the intimate study of primitive country, the workshop of nature, the appreciation of wilderness technique. Unspoiled regions possess a quiet beauty and peace—no artificiality, no crowds, all woods uncut. There is unbounded satisfaction and pleasure in successfully meeting the challenge of the wilderness. The two requirements for man in the North Country are knowledge and equipment. Colonel Townsend Whelen and Bradford Angier have combined their vast experiences camping and bivouacking to produce the perfect guide to peace and utter freedom. If the wilderness calls you, they invite you

to join them and talk together about how to live in it. They explain what from their experience they found to be the best ways of entering wild and unspoiled country, of finding their way through it, and living there in comfort and safety. On Your Own in the Wilderness is their explicit direction on how to escape to an earthly Paradise.

If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core

temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona.

*Northern Bush Craft* Hodder  
'Fifty years into my life journey I realise that, while I love remote wild places and the peoples I meet there, it is in forests that I find the greatest joy. Of all the forests that I have explored, it is the great circumpolar Boreal forest of the North that calls to me most. Here is a landscape where bush knowledge really counts and where experience counts even more ... This book has been thirty years in the making.' Out on the Land is an absorbing exploration of, and tribute to, the circumpolar Boreal forest of the North: its landscape, its people, their cultures and skills, the wilderness that embodies it, and its immense beauty. The book is vast in scope and covers every aspect of being in the wilderness in both winter and summer (clothing, kit, skills, cooking, survival), revealing the age-old traditions and techniques, and how to carry them out yourself. It also includes case studies of early explorers, as well as modern-day adventurers who found themselves stranded in the forest and forced to work out a way to survive. So much more than a bushcraft manual, this book goes deeper, to the traditions and cultures that gave us these skills, as well as focusing on the detail itself. Ray and Lars's practical advice is wound around a deep love for the forest, respect and admiration for the people who live there and sheer enjoyment of the stunning scenery.

Mors Kochanski's enthusiasm for wilderness recreation, his extensive knowledge of the field, and his desire to learn everything there is to know about the wilderness has made him one of the foremost authorities on wilderness skills in the world. In a time when much of today's literature is a regurgitation of skills and repackaging of methodology, The Grand Syllabus is as original as Kochanski's highly acclaimed book, *Bushcraft*. An "all inclusive" syllabus of topics once taught now and again by Mors Kochanski at the University level and in his Extended Summer and Winter Courses and the Survival Instructor Trainee Program. The Grand Syllabus is a compilation derived from the four courses (The Introduction of Outdoor Education, Cold Weather Outdoor Living Skills, Warm Weather Outdoor Living Skills and Primitive Pioneering and Natural Crafting) he taught for the Faculty of Physical Education, The University of Alberta, Edmonton for 23 years. Truly complimentary to the informative material he has already produced, this syllabus is what Mors would say is a list of specific skills you would need to become a well-rounded instructor. As a whole, it is a compilation of wilderness knowledge and skills of special interest to instructors would be instructors and serious students. While not intended for the beginner, should they decide to purchase, they will have a longtime reference in which to grow.

*Bushcraft Sceptre*

As a boy, the author dreamed of wonderful municipal playgrounds, of organizations giving the boys opportunity to camp in the open, of zoological and botanical gardens planned and adapted to the understanding of youth. His busy life as a civil engineer, surveyor, and work in the open gave him no opportunity to develop his dreams, but at the end of a five year tour of the United States and Canada, made over fifty years ago, he drifted into New York City and was shocked beyond expression by the almost total lack of breathing spaces for our boys, in the greatest of American cities. True, it then had Central Park; but fifty years ago Central Park was out among the goats, only to be reached by a long and tiresome horse car journey. This lamentable state of affairs caused the writer so much real pain and concern that he then and there inaugurated a personal crusade for the benefit of the boys, a crusade with the avowed object of winning for them the peoples' interest in the big outdoors. The most difficult part of his task was to convince the men of the swivel chairs that boys' leisure should be spent in the open; that the blue sky is the only proper roof for a normal boy's playground; also that the open spaces are the places where God intended young people to live, work and play. No great crusade, no great movement of any kind is one man's work, nevertheless, every successful movement must have one enthusiast in the front rank, one who knows the trail and comprehensively envisions the

objective—Objectum quod complexum. Others may and will join him, and occasionally spurt ahead of the leader, like the hare in the fable, but the enthusiast keeps right on just the same. Pray do not understand by this that the writer claims that he alone is responsible for this bloodless revolution. No, no, his propaganda work did however win for him the moral support of the editorial staff of *St. Nicholas*, *Youth's Companion* and *Harpers*. Later he was openly backed and encouraged by such distinguished sportsmen as President Roosevelt, his chief forester Governor Pinchot, and his Chief of Staff Major General Bell. While the stalwart men of the Camp Fire Club of America worked hand and glove with him, all similar organizations failed not in voicing their approval. Furthermore he was always helped by his loyal friends of the daily press. Many famous writers lent their influence, all working consciously or unconsciously to help the great cause of boyhood.

Many have died in the Australian bush who might have lived had they known the appropriate survival skills. *Bushcraft* covers all areas of survival and camping activities: making ropes and cords, building huts, camp craft, finding food and water, making maps, starting fires, tying knots, and fashioning hunting and trapping gear—virtually every technique required to stay alive in the woods. With over 400 black-and-white illustrations and photographs, this book explains how to make use of natural materials found locally in any area, conserving instead of destroying native flora and fauna. It describes many of the skills used by primitive man, adding to these the skills necessary for modern man's survival, such as methods for determining time and direction. The author, who popularized the term "bushcraft," claims its practice has many unexpected results. By developing adaptability and honing the five senses, it will also improve your self-esteem and your ability to overcome difficulties in everyday tasks. The practice of bushcraft encourages self-confidence and counters the narrowing influence of modern living by broadening your horizons. *Bushcraft* is a clear, accurate, and reliable resource for anyone who wishes to face nature on its own terms with just a knife and this book.

Simon and Schuster

This cookbook and travelogue profiles daringly inventive grill masters with "colorful characters, inventive techniques and lip-smacking food" (Publishers Weekly, starred review). Twenty whole chickens bathed in garlic on a rig that resembles a cast-iron satellite dish . . . this is *Extreme Barbecue*, a tribute to the derring-do behind the craziest grilling contraptions in the country. Through in-depth profiles, outrageous photographs, and nearly one hundred personal recipes, this unique cookbook exalts in unprecedented cooking techniques and junkyard serendipity. These devices range from the Zen-like simplicity of a tin can on two heated flat stones to an awe-inspiring two-story mobile smoker complete with winding staircase. Whether it's a front-end loader serving as a grilling rig in Kansas City or a 4,500-pound mobile bread baker in Portland, Oregon, this is BBQ like you've never seen—or tasted—before.
