(Book). Backbeat's successful Handbook format applied to the world's most popular instrument. The Electric Guitar Handbook is the latest entry in Backbeat's best-selling handbook series, combining a two-part book and an audio CD in a practical lay-flat binding for ease of reference when playing. Part one of the book examines how different types of electric guitars are made, and why varying construction methods influence the way guitars sound. It also looks at the role of various pieces of guitar hardware, including pick-ups, tremolo set-ups, and bridges. Part two is a comprehensive, user-friendly course in playing the electric guitar, from the basics of posture and hand positioning to music and tab reading and advanced performance. Newly written exercises presented in the book and also on the accompanying CD take the learner through each step in the process, covering styles including rock, country, blues, soul/funk, indie/alternative, and metal. Author Rod Fogg also offers practical advice on everything from simple scales to complex chords, alongside short features introducing key performers and styles.

Dress and Personal Appearance in Late Antiquity Routledge

"Michael Perry spends his days and nights in Brooklyn, New York, usually staring at his computer or sheets of paper. He uses patterns whenever possible, probably not as often as he should. He fell in love with patterns while digging through clip art books and has not looked back since. He has used patterns in his work for clients such as Zoo York, 2k, Zune, New York Times Magazine, and so on. Michael looks forward to a long life of making patterns. He is the author of *Hand Job. A Catalog of Type*, published by Princeton Architectural Press in 2007"--Publisher's website.

Corpus Vasorum Antiquorum Metropolitan Museum of Art

With her "choose-your-own-adventure" approach to sewing, Tanya Whelan offers an invaluable collection of patterns that empowers sewers to become designers. The trick is a set of patterns for 6 skirts and 8 bodices that line up perfectly at the waist, plus an additional 4 sleeve styles and 4 necklines. Tanya gives readers clear instructions and easy-to-follow step-by-step diagrams that allow them to use the enclosed pattern pieces to create up to 219 fitted dresses, including simple strapless designs, sheaths, and halter gowns. The book covers basic dress construction and altering techniques for women of all shapes and sizes.

Splendid Isolation

The excavations led by Margaret and Tom Jones on the Thames gravel terraces at Mucking, Essex, undertaken between 1965 and 1978 are legendary. The largest area excavation ever undertaken in the British Isles, involving around 5000 participants, recorded around 44,000 archaeological features dating from the Beaker to Anglo-Saxon periods and recovered something in the region of 1.7 million finds of Mesolithic to post-medieval date. While various publications have emerged over the intervening years, the death of both directors, insufficient funding, many organizational complications and the sheer volume of material evidence have severely delayed full publication of this extraordinary palimpsest landscape. *Lives in Land* is the first of two major volumes which bring together all the evidence from Mucking, presenting both the detail of many important structures and assemblages and a comprehensive synthesis of landscape development through the ages: settlement histories, changing land-use, death and burial, industry and craft activities. The long time-gap since completion of the excavations has allowed the authors the unprecedented opportunity to stand back from the density of site data and place the vast sum of Mucking evidence in the wider context of the archaeology of southern England throughout the major periods of occupation and activity. *Lives in Land* begins with a thorough evaluation of the methods, philosophy and archival status of the Mucking project against the organizational and funding background of its time, and discusses its fascinating and complex history through a period of fundamental change in archaeological practice, legislation, finance, research priorities and theoretical paradigms in British Archaeology. Subsequent chapters deal with the prehistoric landscape, each focusing on the major themes that emerge by major period from analysis and synthesis of the data. The authors draw on archival material including site notebooks and personal accounts from key participants to provide a detailed but lively account of this iconic landscape investigation.

In late-1990s Britain, the salwaar-kameez or 'Punjabi suit' emerged as a high-fashion garment.

Popular both on the catwalk and on the street, it made front-page news when worn by Diana, Princess of Wales and by Cherie Booth, the wife of UK Prime Minister Tony Blair. In her ethnography of the local and global design economies established by Asian women fashion entrepreneurs, Parminder Bhachu focuses on the transformation of the salwaar-kameez from negatively coded 'ethnic clothing' to a global garment fashionable both on the margins and in the mainstream. Exploring the design and sewing businesses, shops and street fashions in which this revolution has taken place, she shows how the salwaar-kameez is today at the heart of new economic micro-markets which themselves represent complex, powerfully coded means of cultural dialogue and racial politics. The innovative designs of second-generation British Asian women are drawn from characteristically improvisational migrant cultural codes. Through their hybrid designs and creation of new aesthetics, these women cross cultural boundaries, battling with racism and redefining both Asian and British identities. At the same time, their border-crossing commercial entrepreneurship produces new diaspora economies which give them control over many economic, aesthetic, cultural and technological resources. In this way, the processes of global capitalism are gendered, racialized and localized through the interventions of diasporic women from the margins.
