This book is a fascinating and wholly absorbing contribution to the history of the twentieth century. This fast-moving, lively and independent account of the politics and international affairs is enriched by intimate, perceptive and far from uncritical sketches of great leaders such as Gandhi, Jinnah, Nehru, Desai and Patel. Perhaps no other book reminds the reader so firmly that politics, even at its most exalted and dramatic, is about people. Certainly no one who is interested in India, in the history of British imperialism or in the realities of present day Asia can neglect this goldmine of a book.

Andhra Pradesh State, which came into existence on 1 November 1956, caught world wide attention as the techno-savvy and the most happening state by 2000. Hence, two U.S. presidents, Bill Clinton and George Bush, visited Hyderabad city, the capital of the state. In the year 2014, it was bifurcated for political reasons to form a separate Telangana State. The residuary part of the state retained its original name, Andhra Pradesh. However, Hyderabad city became a part of Telangana state. The state, which is now emerging as the most dynamic one, provides India the Eastern Gateway to East and South-East Asia. Its new capital under construction named Amaravati the city immortal, has drawn the attention of architects from all over the globe. The present book, History and Culture of Andhra Pradesh From The Earliest Times to 2019, provides ongoing information about the state to the students of History, as well as to the general public. Hectic developments are taking place under the leadership of its Chief Minister, Chandrababu Naidu, the maker of modern Hyderabad.

This volume is the second of the new two-volume Plant Biotechnology set. This volume covers many recent advances in the development of transgenic plants that have revolutionized our concepts of sustainable food production, cost-effective alternative energy strategies, microbial biofertilizers and biopesticides, and disease diagnostics through plant biotechnology. With the advancements in plant biotechnology, many of the customary approaches are out of date, and an understanding of new

updated approaches is needed. This volume presents information related to recent methods of genetic transformation, gene silencing, development of transgenic crops, biosafety issues, microbial biotechnology, oxidative stress, and plant disease diagnostics and management. Key features: Provides an in-depth knowledge of various techniques of genetic transformation of plants, chloroplast, and fungus Describes advances in gene silencing in plants Discusses transgenic plants for various traits and their application in crop improvement Looks at genetically modified foods and biodiesel production Describes biotechnological approaches in horticultural and ornamental plants Explores the biosafety aspect associated with transgenic crops Considers the role of microbes in sustainable agriculture

A Yakshagana folk theatre piece, combining music, dance and drama. Two young heroes, Devadatta, a man of the intellect, and Kapila, a man of the body, are both attracted to Padmini, who marries Devadatta. When the rivalry threatens their friendship each man commits suicide by cutting off his own head. Through the intervention of the goddess Kali the men are brought back to life but Padmini accidentally mixes the heads up, attaching them to the wrong bodies. A subplot fleshes out the theme of the search for completeness: Hayavadana wants to lose his horse's head and become fully human.

As plant physiology increased steadily in the latter half of the 19th century, problems of absorption and transport of water and of mineral nutrients and problems of the passage of metabolites from one cell to another were investigated, especially in Germany. JUSTUS VON LIEBIG, who was born in Darmstadt in 1803, founded agricultural chemistry and developed the techniques of mineral nutrition in agriculture during the 70 years of his life. The discovery of plasmolysis by NAGEL! (1851), the investigation of permeability problems of artificial membranes by TRAUBE (1867) and the classical work on osmosis by PFEFFER (1877) laid the foundations for our understanding of soluble substances and osmosis in cell growth and cell mechanisms. Since living membranes were responsible for controlling both water movement and the substances in solution, "permeability" became a major topic for investigation and speculation. The problems then discussed under that heading included passive permeation by diffusion, Donnan equilibrium adjustments, active transport processes and antagonism between ions. In that era, when organelle isolation by differential centrifugation was unknown and the electron microscope had not been invented, the number of cell membranes, their thickness and their composition, were matters for conjecture. The nature of cell surface membranes was deduced with remarkable accuracy from the reactions of cells to substances in solution. In 1895, OVERTON, in U. S. A. , published the hypothesis that membranes were probably lipid in nature because of the greater penetration by substances with higher fat solubility.

There exists no doubt, considering the proactive role of mass communication in gathering, disseminating and gauging the public opinion and motivating them towards a desired change. This role by mass media is more important, particularly, in India where citizens are being seen as information starving and being deprived of much required knowledge to better their lives. Studies in the past have pointed out that, media have and continues to play an important and decisive role in nations that are categorized as third world countries, in bringing about development and leading to a predetermined social change. Furthermore, media can play an independent and objective role in a democratic political setup in India, by bringing forth various opinions and ideas, thereby nurturing an informed citizen about the polices, developments and issues concerning them.

In this fast-paced, semi-autobiographical novel, Head exposes the complicated life of Elizabeth, whose reality is intermingled with nightmarish dreams and hallucinations. Like the author, Elizabeth was conceived out-of-wedlock; her mother was white and her father black—a union outlawed in apartheid South Africa. Elizabeth eventually leaves with her young son to live in Botswana, a country less oppressed by colonial domination, where she finds stability for herself and her son by working on an experimental farm. As readers grow to know Elizabeth, they experience the inner chaos that threatens her stability, and her constant struggle to emerge from the torment of her dreams. There she is plagued by two men, Sello and Dan, who represent complex notions of politics, sex, religion, individuality, and the blurred line between good and evil. Elizabeth's troubling but amazing roller-coaster ride ends in an unfettered discovery.
