Optimization is generally  
a reduction operation of a  
definite quantity. This  
process naturally takes

place in our environment and through our activities. For example, many natural systems evolve, in order to minimize their potential energy. Modeling these phenomena then largely relies on our capacity to artificially reproduce these processes. In parallel, optimization problems have quickly emerged from human activities, notably from economic concerns. This book includes the most recent ideas coming from research and industry

in the field of optimization, reliability and the recognition of accompanying uncertainties. It is made up of eight chapters which look at the reviewing of uncertainty tools, system reliability, optimal design of structures and their optimization (of sizing, form, topology and multi-objectives) – along with their robustness and issues on optimal safety factors. Optimization reliability coupling will also be tackled in order to take into account the

uncertainties in the modeling and resolution of the problems encountered. The book is aimed at students, lecturers, engineers, PhD students and researchers. Contents 1. Uncertainty. 2. Reliability in Mechanical Systems. 3. Optimal Structural Design. 4. Multi-object Optimization with Uncertainty. 5. Robust Optimization. 6. Reliability Optimization. 7. Optimal Security Factors Approach. 8. Reliability-based Topology Optimization. About the

Authors Abdelkhalak El Hami is Professor at the Institut National des Sciences Appliquées, Rouen, France. He is the author of many articles and books on optimization and uncertainty. Bouchaib Radi is Professor in the Faculty of Sciences and Technology at the University of Hassan Premier, Settat, Morocco. His research interests are in such areas as structural optimization, parallel computation, contact problem and metal forming. He is the author of many scientific

articles and books. Macroeconomic Analysis and Parametric Control of a National Economy Springer-Verlag Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business

practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from

renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

SPOTLIGHTING CLASSIC

ARTICLES Original research findings and reviews spanning all aspects of the science and technology of casting

Since 1971, The Minerals, Metals & Materials Society has published the Light Metals proceedings.

Highlighting some of the most important findings and insights reported over the past four decades, this volume features the best original research papers and reviews on cast shop science and technology for aluminum production published in Light Metals from 1971 to 2011.

Papers have been divided into ten subject sections for ease of access. Each section has a brief introduction and a list

of recommended articles for researchers interested in exploring each subject in greater depth. Only 12 percent of the cast shop science and technology papers ever published in Light Metals were chosen for this volume. Selection was based on a rigorous review process. Among the papers, readers will find landmark original research findings and expert reviews summarizing current thinking on key topics at the time of publication. From basic research to industry standards to

advanced applications, the articles published in this volume collectively represent a complete overview of cast shop science and technology, supporting the work of students, researchers, and engineers around the world.

In the late 1950s, like tens of thousands of young men of his generation, Pierre Bourdieu, having recently passed the

agrégation in philosophy, found himself immersed in the Algerian war. Motivated by an impulse that, as he himself says, 'was civic rather than political', nothing seemed more important to him than to understand the Algerian situation and provide the elements that would enable others to come to an informed judgement about it. In extremely tough conditions and along with a small group of students, Bourdieu undertook a series of studies across an Algeria that was tightly

patrolled by the army, leading him to discover the shocking reality of the resettlement camps and to analyse the mechanisms of destruction of Algerian society of which they were emblematic. To achieve the objectives he had set himself, Bourdieu had to carry out a genuine intellectual conversion, acquiring an ethnographic understanding of Algerian society, learning sociological analysis at a breakneck pace and inventing new instruments - both

theoretical and empirical - that would enable him to understand the relations of domination specific to colonialism. These new tools also enabled him to analyse the nature of the crisis that the war had both produced and manifested. This unique volume brings together the first texts written by Bourdieu in the midst of the Algerian conflict, as well as later writings and interviews in which he returns to the topic of Algeria and the decisive role it played in the development of his work.

 This is a sequel to the book by Dr. A. Ashimov and his colleagues, *Macroeconomic Analysis and Economic Policy Based on Parametric Control*. The authors have expanded both the developed mathematical apparatus and the scope of problems and applications stemming from the practice of steering a national economy of a small country in the dynamic environment of the international economic

order. The developed theoretical foundation is used in Chapter 1 to suggest a decision support system operating in the framework of state economic policy making. Chapter 2 presents various mathematical models built on the basis of the available statistical data and provides quality assessment of these models. Parametric control problems are being formulated on the basis of these models as problems of mathematical programming, and the obtained solutions are

subjected to analyses and interpretations. This is demonstrated by the analysis of the effect of uncontrollable factors on the problem solutions. Chapter 3 is aimed at the modelling and analysis of cyclic phenomena in economics and their structural stability. Chapter 4 presents solutions of specific problems of national economy and analysis and interpretation of their solutions. In summary, the authors formulate comprehensive mathematical models of

some critical mechanisms in micro economics previously known only on a qualitative level. They provide vigorous mathematical analysis of the models that justifies their applicability for the formulation of parametric control problems, and the existence of model-based solutions. The complexity of the resultant problems is addressed by the formulation of the appropriate algorithms. The described methodology leads to the development of computer-based decision

support systems.

As an entrepreneur or innovator, you're trained to run fast. But are you running in the right direction? Choosing the right market for your innovation is the biggest, and trickiest, question for innovators. Research has shown that all too often entrepreneurs don't spend enough time identifying and researching their market opportunities - instead they jump at the first

opportunity that looks good, and fail to properly evaluate and leverage other opportunities. These common mistakes means that you often choose the wrong market or lock yourself into one specific direction. Where to Play helps you to set a promising strategy, by giving a clear, structured and practical framework - the Market Opportunity Navigator- to better identify, evaluate and focus on the right market opportunities. With three dedicated and reusable worksheets covering: -

Market Opportunity Set - assess your core strengths and identify which market opportunities exist for your business - Attractiveness Map - evaluate your market opportunities to reveal the most attractive option for focus - Agile Focus Strategy - create a strategic plan for your chosen market opportunity that keeps you open-minded and agile Get the most value for your innovation with Where to Play! 'Designed to work seamlessly with

our Business Model and Value Proposition Canvases, the Market Opportunity Navigator, proposed by Marc and Sharon, will help entrepreneurs and innovators to commercialise technologies. You will enjoy discovering highly practical worksheets, maps and dartboards of tremendous interest if you want to better identify, evaluate and strategise market opportunities. Let yourself be charmed by the toolkit and the case studies, along with the

thoughts of Marc and Sharon.' Alex Osterwalder and Yves Pigneur, authors of the bestseller Business Model Generation 'When two internationally-known experts in entrepreneurship write a "how to" book on market opportunities for entrepreneurs, it is bound to be a very valuable book indeed. Marc Gruber and Sharon Tal have created just the right book for first-time and experienced entrepreneurs. It contains both step-by-step plans and very valuable tips on identifying market

opportunities - an invaluable complement to both the Lean Start-up Process and the Business Model Canvas!' Eric von Hippel, T. Wilson Professor of Innovation, MIT Sloan School of Management 'Gruber and Tal have crafted a visually exciting way for entrepreneurs to identify and analyse their opportunities, before they dive into execution. This book pairs nicely with the Business Model Canvas and Lean Startup. Best of all, it also tells you how to focus, and what NOT to do!' Henry Chesbrough,

UC Berkeley Haas School of Business and author of Open Innovation 'From entrepreneurship thought leaders comes this innovative step-by-step guide to thinking through the market essentials of an opportunity. Rather than relying on generic examples or others' stories, the authors put the reader in the driver's seat by encouraging him or her to generate, evaluate and prepare to act on their own opportunities. I can't think of a more practically useful entrepreneurship

book.' Dean A. Shepherd, Ray and Milann Siegfried Professor of Entrepreneurship, Mendoza College of Business, Notre Dame University 'Using thoughtful research and compelling examples, Where to Play provides important guidance on how to balance focus and flexibility when launching a new venture. It builds on the Lean Startup model by providing meaningful insights on what markets to address first.' Tina Seelig, Professor of the Practice, Stanford School

of Engineering 'Where to Play attacks head-on one of the most difficult questions any aspiring entrepreneur must answer: "Which target market should I serve?". It's visual, easy-to-apply, and full of common-sense. If I were starting a business today, I wouldn't leave the starting blocks without it!' In this study, the author analyses 1 Cor 4,1-5 within the larger context of 1 Corinthians 1-4. The study is an exegetico-theological analysis of two important metaphorical predicates that Paul uses for Apollos and himself to describe their role among the Corinthians: assistants of Christ and administrators of God's mysteries (1 Cor 4,1). Focussing on pragmatic considerations, the author answers the following questions: Was Paul

individualistic in his understanding of the role of the preachers in Corinth? Did he deny the role of other preachers such as Apollos in the Christian community of Corinth? What was his understanding of his own role? What are the characteristics of the proclamation of the gospel and of the preachers?

Die Welt der  
Marktforschung ist im

Wandel und zunehmend wird in Fachmedien die Qualitätsfrage diskutiert. Welche Maßstäbe zeichnen eine hochwertige Datenerhebung aus und welche Methoden sollte der Nachwuchs der Branche beherrschen, um auch weiterhin Markt- und Meinungsanalysen mit einem hohen Mehrwert liefern zu können? Dieses Buch versteht sich als Wegweiser, der zukünftige Anforderungen der Marktforschung analysiert und bewertet und dabei einen

Schwerpunkt auf die Chancen und Probleme der Digitalisierung in diesem Bereich setzt. Durch die rasante technische Entwicklung werden immer mehr Daten maschinengesteuert erhoben und teils vollautomatisch ausgewertet. Das Wissen und die Rolle des Marktforschers scheint in dieser schönen neuen Welt auf den ersten Blick völlig überflüssig geworden zu sein, da zahlreiche "Dashboards" und Reporting-Systeme

bereits - scheinbar - alle relevanten Informationen enthalten. Doch bisher durchschauen nur wenige die Hintergründe dieser Vorgänge und nur eine Handvoll Datenanalysten weiß die Risiken eines zu optimistischen Glaubens an die Big Data Science richtig einzuschätzen. Somit steht der Marktforschung ein fundamentaler Wandel bevor. Neben der Primärerhebung und dem direkten Kundendialog werden in Zukunft Maßnahmen zur Absicherung der Qualität

von Prozessen, Daten, Modellen und Visualisierungen eine immer größere Rolle spielen. Zahlreiche Experten aus Wissenschaft und Praxis haben dieses Thema in vielfältigen Szenarien aufgegriffen und zeigen Lösungswege für die Unsicherheiten und Zweifel, die durch die digitale Transformation der Branche entstanden sind. Das Buch ist somit gleichsam Ratgeber und Leitfaden und bietet Experten aus Wissenschaft und Praxis

einen detaillierten Überblick über die jüngsten Entwicklungen in der Data Science. Where to Play John Wiley & Sons Das Standardwerk bietet einen umfassenden Überblick über die Grundlagen der Mediengestaltung für Digital- und Printmedien: Konzeption und Gestaltung (Band 1) sowie Produktion und Technik (Band 2). 1000 prüfungsrelevante und praxisorientierte Aufgaben mit Lösungen helfen, das Verständnis zu

long-standing trend toward increased regulation is becoming a flood. The clamor for improved enterprise risk management and the complexity of multinational compliance present executives with a dramatically new array of challenges. Governance should offer solutions, but it is clear that yesterday's governance practices aren't up to the task. In both design and implementation, they are too disconnected and incomplete to fully address our complex

compliance and risk management puzzle. Executives get only fragmented views of their true business performance, and inefficiencies drive up costs. The consequences of inadequate governance were demonstrated in the economic meltdown of 2008. As the world struggles to recover from that crisis, business is now faced with a confusing array of evolving regulations, the challenge of managing compliance across multinational

organizations and a new imperative for risk management that is coordinated across the enterprise. It's clear that yesterday's governance practices don't meet today's need for centralized controls, integrated compliance and risk management and greater transparency. The need for organizations to change—and change now—is clear. Under Control captures decades of business governance experience from many of the leading authorities at CA, Inc. This book sets out

not only to explain the essential challenges of effective business governance, but to help you build solutions for your organization based on lessons learned at CA from its customers and in its own corporate structure. From governing the organization's policies as a whole instead of in silos, to a department-by-department look at the role and impact of governance, to governing your green initiatives, to the role of the board of directors, to the importance of risk

management, this book lays out some of the strategies and processes that may help your organization manage its risk and regulatory requirements. It is clear that the governance standards in the past were inadequate, and that risks have not been properly assessed or understood. This book is a first step in solving this problem so that your organization is prepared and able to respond and thrive in today's rapidly evolving environment. Under Control is the first

book published in the new CAPress imprint, a joint publishing program between Apress and CA Inc. "One of the defining factors of the first decade of the 21st century has been the increase of regulation and governance. To explain these trends, and the various best practices for ensuring governance, enterprise IT management solutions provider CA Inc. enlisted more than a dozen subject matter experts from its ranks to contribute content. The

resulting book explores the need for broad governance, different areas where governance is important, and various ways for organizations to manage and implement compliance, including IT governance, project portfolio management, information governance and sustainability management. The book, while largely vendor-neutral, draws on CA's experience creating governance solutions as well as managing its own governance issues.”

The book analyzes how modern portfolio theory

and dynamic term structure models can be applied to government bond portfolio optimization problems. The author studies the necessary adjustments, examines the models with regard to the plausibility of their results and compares the outcomes to portfolio selection techniques used by practitioners. Both single-period and continuous-time bond portfolio optimization problems are considered.

Distinguished biblical scholar Norbert Lohfink 'surrenders himself to dreams about how the church really ought to be'. These dreams are based in deep scholarship and solid convictions drawn from both the Old and New Testaments: about God's original intentions

for Israel and for all those who will be a part of the people of God, about Jesus' renewal of God's people, and about the mission of those who since have followed him. If the world is to be refreshed and renewed, the author believes, it must be through the church, but for that to happen the church must become truly the people of God that God is still dreaming.
