Providing, for example, coverage of the four most common types of contracts—lump sum/fixed-price, cost-plus, time-and-materials, and unit-pricing—it promises to reduce uncertainty and allow contractors to enter contractual negotiations with greater confidence to be able to achieve a fair and balanced contract. The United Nations Compensation Commission (UNCC) is a claims reparation program created by the United Nations Security Council in May 1991, after the UN-authorized Allied Coalition Forces' military operations terminated the seven-month invasion and occupation of Kuwait by Iraq and liberated Kuwait. The UNCC was established with the objectives to receive and decide claims from individuals, corporations, and governments against Iraq as arising directly from Iraq's invasion and occupation of Kuwait; and to pay compensation for such claims. *War Reparations and the UN Compensation Commission: Designing Compensation After Conflict* is the first collective work on the UNCC claims program by experts who have contributed to its progress, and who have assisted in paving the way for more informed research on the

Commission and its jurisprudence. Given its unprecedented, serious and sustained effort within the international community, the two-decade long operations of the UNCC deserve considerable attention and in-depth analysis especially with respect to its impact on the development and progress of international law in the areas of State responsibility and reparations.
