CARLA CLINTON

Social Media and Democracy Oxford University Press

The field of anatomy is dynamic and fertile. The rapid advances in technology in the past few years have produced exciting opportunities in the teaching of gross anatomy such as 3D printing, virtual reality, augmented reality, digital anatomy models, portable ultrasound, and more. Pedagogical innovations such as gamification and the flipped classroom, among others, have also been developed and implemented. As a result, preparing anatomy teachers in the use of these new teaching tools and methods is very timely. The main aim of the second edition of *Teaching Anatomy – A Practical Guide* is to offer gross anatomy teachers the most up-to-date advice and guidance for anatomy teaching, utilizing pedagogical and technological innovations at the forefront of anatomy education in the five years since the publication of the first edition. This edition is structured according to the teaching and learning situations that gross anatomy teachers will find themselves in: large group setting, small group setting, gross anatomy laboratory, writing examination questions, designing anatomy curriculum, using anatomy teaching tools, or building up their scholarship of teaching and learning. Fully revised and updated, including fifteen new chapters discussing the latest advances, this second edition is an excellent resource for all instructors in gross anatomy.

Teaching Anatomy CreateSpace

This book constitutes a journey into the obscure field of sectarian-guided discourses of radical Islamist groups. It provides new insights into the ideological mechanisms utilized by such organizations to incite sectarian conflicts and recruit local and foreign guardians to their alleged cause. This book examines diverse aspects and dimensions of the discourses of Sunni-based ISIS and Shia-based al-Hashd al-Shaabi and explores manipulative and ideological discursive strategies utilized by media outlets associated with these groups. It delves into linguistic and contextual activities, implicit and explicit messages within the discourses of various media outlets operating in the heart of the Middle East. It also scrutinizes and explains aspects of politicization, religionization and sectarianization within the media discourse of terrorist groups in the digital era.

The Exile A&C Black

The story of how Arab editors of the late nineteenth and early twentieth centuries revolutionized Islamic literature Islamic book culture dates back to late antiquity, when Muslim scholars began to write down their doctrines on parchment, papyrus, and paper and then to compose increasingly elaborate analyses of, and commentaries on, these ideas. Movable type was adopted in the Middle East only in the early nineteenth century, and it wasn't until the second half of the century that the first works of classical Islamic religious scholarship were printed there. But from that moment on, Ahmed El Shamsy reveals, the technology of print transformed Islamic scholarship and Arabic literature. In the first wide-ranging account of the effects of print and the publishing industry on Islamic scholarship, El Shamsy tells the fascinating story of how a small group of editors and intellectuals brought forgotten works of Islamic literature into print and defined what became the classical canon of Islamic thought. Through the lens of the literary culture of nineteenth- and twentieth-century Arab cities—especially Cairo, a hot spot of the nascent publishing business—he explores the contributions of these individuals, who included some of the most important thinkers of the time. Through their efforts to find and publish classical literature, El Shamsy shows, many nearly lost works were recovered, disseminated, and harnessed for agendas of linguistic, ethical, and religious reform. Bringing to light the agents and events of the Islamic print revolution, *Rediscovering the Islamic Classics* is an absorbing examination of the central role printing and its advocates played in the intellectual history of the modern Arab world.

Islamic Finance in the Global Economy South End Press

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Extremism in the Digital Era CABI

A second edition of *Islamic Finance in the Global Economy*, substantially revised and updated to take into account the recent developments in the field.

Pakistan Desires Springer Nature

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Algebra and Trigonometry Xulon Press

Education is a field sometimes beset by theories-of-the-day and with easy panaceas that overpromise the degree to which they can alleviate pressing educational problems. The two-volume *Encyclopedia of Educational Theory and Philosophy* introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice. Drawing together a team of international scholars, this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, this work offers essays on cutting-edge research and concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features: Over 300 signed entries by trusted experts in the field are organized into two volumes and overseen by a distinguished General Editor and an international Editorial Board. Entries are followed by cross references and further reading suggestions. A Chronology of Theory within the field of education highlights developments over the centuries; a Reader's Guide groups entries thematically, and a master Bibliography facilitates further study. The Reader's Guide, detailed index, and cross references combine for strong search-and-browse capabilities in the electronic version. Available in a choice of print or electronic formats, *Encyclopedia of Educational Theory and Philosophy* is an ideal reference for anyone interested in the roots of contemporary educational theory.

After the Cataclysm, Postwar Indochina and the Reconstruction of Imperial Ideology

Yearbook of International Orga

Drawing on history, anthropology, literature, law, art, film, and performance studies, the contributors to *Pakistan Desires* invite reflection on what meanings adhere to queerness in Pakistan. They illustrate how amid conditions of straightness, desire can serve as a mode of queer future-making. Among other topics, the contributors analyze gender transgressive performances in Pakistani film, piety in the transgender rights movement, the use of Grindr among men, the exploration of homoerotic subject matter in contemporary Pakistani artist Anwar Saeed's work, and the story of a sixteenth-century Sufi saint who fell in love with a Brahmin boy. From Kashmir to the 1947 Partition to the resonances of South Asian gay subjectivity in the diaspora, the contributors attend to narrative and epistemological possibilities for queer lives and loves. By embracing forms of desire elsewhere, ones that cannot correlate to or often fall outside dominant Western theorizations of queerness, this volume gathers other ways of being queer in the world. Contributors. Ahmed Afzal, Asad Alvi, Anjali Arondekar, Vanja Hamzić, Omar Kasmani, Pasha M. Khan, Gwendolyn S. Kirk, Syeda Momina Masood, Nida Mehboob, Claire Pamment, Geeta Patel, Nael Quraishi, Abdullah Qureshi,

Information and Communication Technologies in Tourism 2017 Yale University Press

This book analyzes the ideological relationship of the Muslim identity to its perceived practice of Islam among the Shia and Deobandi sects. The study takes root in Punjab Pakistan among twenty seven interviews where the Deobandi sect and the Shia sect face severe fatalities and undefined conflict.

Networks of Outrage and Hope UPA

Cyber and its related technologies such as the Internet was introduced to the world only in late 1980s, and today it is unimaginable to think of a life without it. Despite being ubiquitous, cyber technology is still seen as an enigma by many, mainly due to its rapid development and the high level of science involved. In addition to the existing complexities of the technology, the level of threat matrix surrounding the cyber domain further leads to various misconceptions and exaggerations. Cyber technology is the future, thus forcing us to understand this complex domain to survive and evolve as technological beings. To understand the enigma, the book analyzes and disentangles the issues related to cyber technology. The author unravels the threats that terrorize the cyber world and aims to decrypt its domain. It also presents the existing reality of cyber environment in India and charts out a few recommendations for enhancing the country's cyber security architecture. Further, the book delves into detailed analysis of various issues like hacking, dark web, cyber enabled terrorism and covert cyber capabilities of countries like the US and China. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

Encyclopedia of Educational Theory and Philosophy Cambridge University Press

The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, *Three Cups of Tea* combines adventure with a celebration of the humanitarian spirit.

World Report 2018 Routledge

How and to what extent have Islamic legal scholars and Middle Eastern lawmakers, as well as Middle Eastern Muslim physicians and patients, grappled with the complex bioethical, legal, and social issues that are raised in the process of attempting to conceive life in the face of infertility? This path-breaking volume explores the influence of Islamic attitudes on Assisted Reproductive Technologies (ARTs) and reveals the variations in both the Islamic jurisprudence and the cultural responses to ARTs.

Introduction to Embedded Systems, Second Edition Lexington Books

An introduction to the engineering principles of embedded systems, with a focus on modeling, design, and analysis of cyber-physical systems. The most visible use of computers and software is processing information for human consumption. The vast majority of computers in use, however, are much less visible. They run the engine, brakes, seatbelts, airbag, and audio system in your car. They digitally encode your voice and construct a radio signal to send it from your cell phone to a base station. They command robots on a factory floor, power generation in a power plant, processes in a chemical plant, and traffic lights in a city. These less visible computers are called embedded systems, and the software they run is called embedded software. The principal challenges in designing and analyzing embedded systems stem from their interaction with physical processes. This book takes a cyber-physical approach to embedded systems, introducing the engineering concepts underlying embedded systems as a technology and as a subject of study. The focus is on modeling, design, and analysis of cyber-physical systems, which integrate computation, networking, and physical processes. The second edition offers two new chapters, several new exercises, and other improvements. The book can be used as a textbook at the advanced undergraduate or introductory graduate level and as a professional reference for practicing engineers and computer scientists. Readers should have some familiarity with machine structures, computer programming, basic discrete mathematics and algorithms, and signals and systems.

Islam and Assisted Reproductive Technologies Penguin

Following the birth of the first "test-tube baby" in 1978, Assisted Reproductive Technologies became available to a small number of people in high-income countries able to afford the cost of private treatment, a period seen as the "First Phase" of ARTs. In the "Second Phase," these treatments became increasingly available to cosmopolitan global elites. Today, this picture is changing — albeit slowly and unevenly — as ARTs are becoming more widely available. While, for many, accessing infertility treatments remains a dream, these are beginning to be viewed as a standard part of reproductive healthcare and family planning. This volume highlights this "Third Phase" — the opening up of ARTs to new constituencies in terms of ethnicity, geography, education, and class.

Encyclopedia of Information Science and Technology, Third Edition SAGE Publications

The author of the bestselling *The Sisters: The Saga of the Mitford Family* brings her trademark brio and relish to the charming and fascinating world of the Château de l'Horizon on the French Riviera. The Riviera Set reveals the story of the group of people who lived, partied, bed-hopped and politicked at the Château de l'Horizon near Cannes, over the course of forty years from the time when Coco Chanel made southern French tans fashionable in the twenties to the death of the playboy Prince Aly Khan in 1960. At the heart of dynamic group was the amazing Maxine Elliott, the

daughter of a fisherman from Connecticut, who built the beautiful art deco Château and brought together the likes of Noel Coward, the Aga Khan, the Duke and Duchess of Windsor and two very saucy courtesans, Doris Castlerosse and Daisy Fellowes, who set out to be dangerous distractions to Winston Churchill as he worked on his journalism and biographies during his 'wilderness years' in the thirties. After the War the story continued as the Château changed hands and Prince Aly Khan used it to entertain the Hollywood set, as well as launch his seduction of and eventual marriage to Rita Hayworth Bringing a bygone era back to life, Mary Lovell cements her spot as one of our top social historians in this captivating and evocative new book.

The Making of Pakistani Human Bombs Georgetown University Press

Hezbollah: The Global Footprint of Lebanon's Party of God is the first thorough examination of Hezbollah's covert activities beyond Lebanon's borders, including its financial and logistical support networks and its criminal and terrorist operations worldwide. Hezbollah—Lebanon's "Party of God"—is a multifaceted organization: It is a powerful political party in Lebanon, a Shia Islam religious and social movement, Lebanon's largest militia, a close ally of Iran, and a terrorist organization. Drawing on a wide range of sources, including recently declassified government documents, court records, and personal interviews with intelligence and law enforcement officials around the world, Matthew Levitt examines Hezbollah's beginnings, its first violent forays in Lebanon, and then its terrorist activities and criminal enterprises abroad in Europe, the Middle East, South America, Southeast Asia, Africa, and finally in North America. Levitt also describes Hezbollah's unit dedicated to supporting Palestinian militant groups and Hezbollah's involvement in training and supporting insurgents who fought US troops in post-Saddam Iraq. The book concludes with a look at Hezbollah's integral, ongoing role in Iran's shadow war with Israel and the West, including plots targeting civilians around the world. Levitt shows convincingly that Hezbollah's willingness to use violence at home and abroad, its global reach, and its proxy-patron relationship with the Iranian regime should be of serious concern. Hezbollah is an important book for scholars, policymakers, students, and the general public interested in international security, terrorism, international criminal organizations, and Middle East studies.

International Conflict Analysis in South Asia Laxmi Book Publication

The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations, and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations.

Assisted Reproductive Technologies in the Third Phase Oxford University Press, USA

The Shia Rights Watch report entitled "Bahrain: The Lost Generation" is 48 page of detailed incidents of violence and intimidation against Bahraini Shia Muslims in 2014. This government sponsored violence has affected the lives of many Shia communities around Bahrain. The report gives a detailed account of how this already oppressed group has been marginalized further in recent years through systematic arrests, torture, and citizenship revocation. The report is based on interviews, site visits, news articles, NGO reports, and other human rights reports.

Rediscovering the Islamic Classics Seven Stories Press

Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

Islam and Democracy After the Arab Spring Simon and Schuster

Digital space offers new avenues, opportunities, and platforms in the fight for gender equality, and for the social, economic, and political participation of women and marginalized communities. However, the very same space plays host to gender inequalities and security threats with gendered implications. This edited volume ventures into complexities at the intersection of gender, security, and digital space, with a particular focus on the persistent problems of access, harassment, and disinformation. Scholars and practitioners in this volume tackle various facets of the issue, presenting an array of research, experiences, and case studies that span the globe. This knowledge lends itself to potential policy considerations in tackling inequalities and threats with gendered implications in cyber space towards digital spaces that are safe and equal. This book is a must-read for students, scholars, and practitioners seeking to expand their knowledge on the gendered threats in digital space and potential remedies against them.
