The Earth Liberation Front, 1997-2002 Pendo Press

The author believes the period of our lives that has the greatest impact on disease and personality formation is our gestation and birth. Recent studies provide evidence that fetal imprinting, an evolutionary strategy to prepare children to cope with life, establishes a permanent set-point in a child's physiology. Mothers highly anxious during pregnancy may give birth to babies prone to mental illness and disease in later life. Low oxygen at birth, drugs taken during pregnancy, and a lack of parental affection in the first years of life may have similar adverse affects. The author puts a case for a reorientation of our approaches to pregnancy and the use of drugs, and above all, to the modes of psychotherapy we implement to treat everything from phobias and compulsions to anxiety and depression.--From book jacket.

Pride, greed, and power have driven men to do the unthinkable-including selling out their nations and unsuspected citizens to the most corrupt and destructive "invisible" global leaders on Earth. But how did this happen on American soil? How did the downfall begin and who were the predators that the "land of the free and home of the brave" fell victim to? And is all hope lost? This book captures details of the last 200 years of American history that mainstream media does not want you to know. It dissects the "legalized" system of the private central banks that has gone unchecked, and delivers gut-wrenching truths about the real domestic and foreign enemies of the United States. With over 1000 footnotes and quotes from former presidents, prime ministers, and state officials, it will equip you with the facts that the elites have covered up for centuries and empower you to stand up for the truth.
