The LNCS volume 9192 constitutes the refereed proceedings of the Second International Conference on Learning and Collaboration Technologies, LCT 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCI 2015, in Los Angeles, CA, USA in August 2015, jointly with 15

other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCI 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers address addressing the following major topics: technology-enhanced learning, adaptive and personalised learning and assessment, virtual worlds and virtual agents for learning, collaboration and Learning Serious Games and ICT in education.

An Introduction to Theories of Personality SAGE Publications [The book] is designed both to explain the major personality theories and to stimulate critical thinking about them. [The author] has pursued four main objectives. To present a clear and concise picture of the major features of each important personality theory ... To focus on significant ideas and themes that structure the content of the different personality theories ... To provide criteria to guide the evaluation of each theory ... To present activities, informed by the tenets of each theory, that will provide growth in critical thinking skills. -Pref.

Current Research and Applications in Personality Theories
Springer

Presents the evidence-base for links between personality traits, psychological functioning, personality disorder and violence - with a focus on assessment and treatment approaches that will help clinicians to assess risk in this client group. An evidence-based examination of those personality traits and types of psychological functioning that may contribute to personality disorder and violence - and the links that can be made between the two. Each chapter tackles an area of personality or psychological functioning and includes a developmental perspective, discussion of how to gauge risk, and an outline of effective treatments. Traits covered include impulsivity, aggressiveness, narcissism and the 'Big Five' - neuroticism, extraversion, openness, agreeableness and conscientiousness. New for the prestigious Wiley Series in Forensic Clinical Psychology, a market leader with more than 20,000 books in print.

Intelligent Virtual Agents McGraw-Hill Humanities, Social Sciences & World Languages

Incorporating the thinking, feeling, and behaving dimensions of human experience, the tenth edition of Corey's best-selling book helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, postmodern, and integrative approaches) and demonstrates how each theory can be applied to two cases (Stan and Gwen). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. Theories of Personality Cambridge University Press

Originally published in 1975, this book reviews the major personality theories influential at the time, including those of Freud, Kelly, Cattell, and Eysenck, and presents the main assessment techniques associated with them. It also discusses their application in such fields as abnormal psychology, diagnosis, psychotherapy, education and criminology. The authors find none of the theories completely satisfactory, but pinpoint important successes and suggest a promising new approach.

An Introduction to Theories of Personality McGraw-Hill Education
A definitive, authoritative and up-to-date resource for anyone interested in the theories, models and assessment methods used

for understanding the many facets of Human personality and individual differences. This brand new Handbook of Personality Theory and Assessment 2-Volume Set constitutes an essential resource for shaping the future of the scientific foundation of personality research, measurement, and practice. There is need for an up-to-date and international Handbook that reviews the major contemporary personality models. Vol. 1 and associated psychometric measurement instruments. Wiley

For undergraduate courses in Personality or Theories of Personality. This engaging text provides an overview of major classic and current theories of personality, brings theories to life through the interpretation of illustrative biographies, and integrates a clear explanation of theory with the latest research. Understanding persons is both Susan Cloninger's academic passion as well as her personal lifestyle. With so many years of research and instruction under her belt, she has come to several important conclusions, many of which have helped guide her text through six editions. For one, while theories of personality can never explain all the particulars of individual lives, the theories explored within this text can help open eyes towards the important nuances and themes that might otherwise go unnoticed. With this in mind, this engaging text provides an overview of major classic and current theories of personality, brings theories to life through the interpretation of illustrative biographies, and integrates a clear explanation of theory with the latest research. As well, it conveys the positive value of various theories in a balanced and respectful way, preparing students to apply theoretical ideas to understanding particular individuals they may encounter in their professional work and personal lives.
Cengage Learning

"What makes people behave as they do? Are people ordinarily aware of what they are doing, or are their behaviors the result of hidden, unconscious motives? Are some people naturally good and others basically evil? Or do all people have potential to be either good or evil? Is human conduct largely a product of nature, or is it shaped mostly by environmental influences? Can people freely choose to mold their personality, or are their lives determined by forces beyond their control? Are people best described by their similarities, or is uniqueness the dominant characteristic of humans? What causes some people to develop disordered personalities whereas others seem to grow toward psychological health? These questions have been asked and debated by philosophers, scholars, and religious thinkers for several thousand years; but most of these discussions were based on personal opinions that were colored by political,

economic, religious, and social considerations. Then, near the end of the 19th century, some progress was made in humanity's ability to organize, explain, and predict its own actions. The emergence of psychology as the scientific study of human behavior marked the beginning of a more systematic approach to the study of human personality. This edition continues to emphasize the strong and unique features of earlier editions, namely the overviews near the beginning of each chapter, a lively writing style, the thought-provoking concepts of humanity as seen by each theorist, and the structured evaluations of each theory"--

Theories and Interventions SAGE

This volume provides in-depth examinations of a variety of individual, social, and environmental factors that contribute to the success of expatriate employees. Using data from numerous large-scale studies from both the public and private sectors, this volume provides valuable insights into expatriate success with implications for both theoretical understanding and practical management. The authors explore factors that influence employees to pursue expatriation, contribute to expatriate adjustment and satisfaction, and ultimately drive expatriate performance, well-being, and success. The chapters in this book consider the role of sociodemographic characteristics, personality and individual differences, training and preparation, and social and organizational support in contributing to each of these outcomes. Using findings from diverse countries and sectors and data-focused analytic techniques, this volume provides novel insights into factors promoting expatriate success.

Counseling and Psychotherapy Springer Science & Business Media

Self-determination theory (SDT) provides a framework for understanding the factors that promote motivation and healthy psychological and behavioral functioning. In this authoritative work, the codevelopers of the theory comprehensively examine SDT's conceptual underpinnings (including its six mini-theories), empirical evidence base, and practical applications across the lifespan. The volume synthesizes a vast body of research on how supporting--or thwarting--people's basic needs for competence, relatedness, and autonomy affects their development and well-being. Chapters cover implications for practice and policy in education, health care, psychotherapy, sport, and the workplace.

Managing Expatriates Psychology Press

Examine personality psychopathology from diverse perspectives and explore multiple research and treatment approaches with *The American Psychiatric Publishing Textbook of Personality Disorders*. Capture the multifaceted range of nonpathological human behavior and develop a judicious understanding of the extremes of behavior that are called personality disorders. No other textbook today matches the clinically useful scope and relevance of *Textbook of Personality Disorders*. Its comprehensive coverage of theory, research, and treatment of personality disorders, incorporating illustrative case examples to enhance understanding, reflects the work of more than 70 expert contributors who review the latest theories, research findings, and clinical expertise in the increasingly complex field of personality disorders. The deeply informative *Textbook of Personality Disorders* is organized into six main sections: Basic concepts -- Summarizes definitions and classifications of personality disorders, building on broader international concepts and theories of psychopathology and including categorical and dimensional models of personality disorders Clinical evaluation -- Discusses manifestations, problems in differential diagnosis, and patterns of comorbidity; the most widely used interviews and self-administered questionnaires; and the course and outcome of personality disorders. Etiology -- Includes an integrative

perspective (personality disorders, personality traits, and temperament); epidemiology (one in ten people has a personality disorder) and genetics; neurobiology; antecedents of personality disorders in children and adolescents; attachment theory and mentalization therapy in borderline personality disorder; and the complex and variable interface between personality disorders and sociocultural factors Treatment -- Covers levels of care and the full range of therapies, from psychoanalysis to pharmacotherapy; includes detailed information on schema therapy, dialectical behavior therapy (specifically developed for self-injuring/suicidal patients with borderline personality disorder), interpersonal therapy, dynamically-informed supportive psychotherapy, group treatment, family therapy, psychoeducation, the therapeutic alliance, boundary issues, and collaborative treatment Special problems and populations -- Addresses suicide, substance abuse, violence, dissociative states, defensive functioning, gender and cross-cultural issues, and patients in correctional and medical settings New developments and future directions -- Offers perspectives on brain imaging and translational research and asserts that the closer working relationship between clinical psychiatrists and behavioral neuroscientists -- with neuroimaging techniques as the common ground -- will result in more promising models to enhance our understanding of the neuroscience and molecular biology of personality disorders Offering both a wealth of practical information that clinicians can use right away in their daily practice and an up-to-date review of empirical research, *The American Psychiatric Publishing Textbook of Personality Disorders* is the definitive reference and clinical guide not only for seasoned clinicians but also for psychiatry residents, psychology interns and graduate students, and social work, medical, and nursing students.

An Introduction Lawrence Erlbaum Assoc Incorporated

The Ninth Edition of *PERSONALITY THEORIES* continues to provide thorough coverage enhanced with helpful learning aids, opportunities for honing critical thinking skills, and integration of multicultural and gender-related issues. Each chapter focuses on one theory or group of theories and includes brief biographies that shed light on how the theories were formed. The author also provides criteria for evaluating each theory and cites current relevant research. A final chapter on Zen Buddhism covers a major non-Western theory of personality and serves to distinguish this program in the field. 10th International Conference, IVA 2010, Philadelphia, PA, USA. Proceedings John Wiley and Sons

Designed as a text for both graduate and undergraduate students, this book, originally published in 1995, presents an intrapsychic explanation of human behaviour - concepts based on psychological processes and 'structures' within the mind. In this context, a unique treatment of personality theory is introduced. It focuses on Freud, Kelly and Angyal: Freud's psychoanalytic theory of personality based on desires, Kelly's personal construct theory for thinking, and Angyal's holistic concepts of personality. Each theory is given a detailed analysis in separate chapters. Freud's psychoanalytic theory is cast as a theory of motivation, Kelly's personal construct theory as a theory of cognition, and then it is noted that there is no comprehensive theory of personality based on emotion. Although Angyal's holistic theory is rarely described in modern textbooks, Lester includes this because none of the other holistic theorists rival Angyal in their range of hypothetical constructs or descriptive terms. Then, in sections dealing with alternative

viewpoints, the author shows how other personality theorists actually endorse and expand upon the ideas expressed by the aforementioned three, albeit with different terminology. Recognizing the diversity of holistic views in theories of personality, several counterpoint chapters are devoted to the holistic ideas. Lester separates these into three major areas: theorists who have focused on the split in the mind between the real and ideal self; recent theorists who explore the possibility that the mind is a 'multiplicity of selves'; and theorists who, though not having their viewpoints sufficiently articulated in the literature, are still well established in the history of psychology. Other features include a presentation of the material in modern viewpoints, instead of the precise and perhaps outdated style as written by the individual theorists, and boxed highlights in each section, providing students with practical capsule information for easy reading.

Personality Guilford Publications

Personality Theories: Critical Perspectives is the groundbreaking, final text written by Albert Ellis, long considered the founder of cognitive behavioral therapies. The book provides students with supporting and contradictory evidence for the development of personality theories through time. Without condemning the founding theorists who came before him, Ellis builds on more than a century of psychological research to re-examine the theories of Freud, Jung, and Adler while taking an equally critical look at modern, research-based theories, including his own.

Theories of Personality Theories of Personality

One of the major neuropsychological models of personality, developed by world-renowned psychologist Professor Jeffrey Gray, is based upon individual differences in reactions to punishing and rewarding stimuli. This biological theory of personality - now widely known as 'Reinforcement Sensitivity Theory' (RST) - has had a major influence on motivation, emotion and psychopathology research. In 2000, RST was substantially revised by Jeffrey Gray, together with Neil McNaughton, and this revised theory proposed three principal motivation/emotion systems: the 'Fight-Flight-Freeze System' (FFFS), the 'Behavioural Approach System' (BAS) and the 'Behavioural Inhibition System' (BIS). This is the first book to summarise the Reinforcement Sensitivity Theory of personality and bring together leading researchers in the field. It summarizes all of the pre-2000 RST research findings, explains and elaborates the implications of the 2000 theory for personality psychology and lays out the future research agenda for RST.

Learning and Collaboration Technologies Cengage Learning

First published in 2009. Routledge is an imprint of Taylor & Francis, an informa company.

Theory and Practice of Counseling and Psychotherapy Cambridge University Press

This seventh edition of 'Theories of Personality' continues to provide comprehensive coverage of the most influential theorists of personality.
