 Recognizing the importance of good nutrition for physical and mental status, the Department of Defense asked the Institute of Medicine to guide the design of the nutritional composition of a ration for soldiers on short-term, high-stress missions. Nutrient Composition of Rations for Short-Term, High-Intensity Combat Operations considers military performance, health concerns, food intake, energy expenditure, physical exercise, and food technology issues. The success of military operations depends to a large extent on the physical and mental status of the individuals involved. Appropriate nutrition during assault missions is a continuous challenge mainly due to diminished appetites of individuals under stress. Many less controllable and unpredictable factors, such as individual preferences and climate, come into play to reduce appetite. In fact, soldiers usually consume about half of the calories needed, leaving them in a state called "negative energy balance." The consequences of being in negative energy balance while under these circumstances range from weight loss to fatigue to mental impairments. An individual's physiological and nutritional status can markedly affect one's ability to maximize performance during missions and may compromise effectiveness. With the number of these missions increasing, the optimization of rations has become a high priority.

 This volume is dedicated to Miguel Civil in celebration of his 90th birthday. Civil has been one of the most influential scholars in the field of Sumerian studies over the course of his long career. This anniversary presents a welcome occasion to reflect on some aspects of the field in which he has been such a driving force.

 This catalogue is the third in a series publishing the whole collection of Babylonian and Sumerian tablets in the British Museum. In this volume, over 7,000 tablets acquired in the years 1898-99 are described. They include Sumerian tablets from the administrative archives of the district of Lagash of the time of the Third Dynasty of Ur, Old Babylonian tablets from the cities of Kisurra, Larsa, Sippar and Uruk, and tablets of the Neo-Babylonian and Achaemenid periods from Babylon and Borsippa. There is also a small number of literary and historical texts.

 "This is the story of an aviation pioneer who developed a major airline in China in the 1930s and 1940s. W. Langhorne Bond was a Pan American executive in the days when Pam Am was achieving

mastery of the skies. The book tells the story of Bond's efforts to set up and operate a fledgling airline, the China National Aviation Corporation (CNAC), while overcoming Chinese political machinations, attacks by invading Japanese forces, and changing and erratic American management and government policies."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.  This is the eighth volume of Babel und Bibel, an annual of ancient Near Eastern, Old Testament, and Semitic studies. The principal goal of the annual is to reveal the inherent relationship between Assyriology, Semitics, and biblical studies—a relationship that our predecessors comprehended and fruitfully explored but that is often neglected today. The title Babel und Bibel is intended to point to the possibility of fruitful collaboration among the three disciplines, in an effort to explore the various civilizations of the ancient Near East. This volume is a festschrift for Joachim Krecher, Professor of Assyriology in the Westfälische Wilhelms-Universität Münster. Krecher is best known, perhaps, for his seminal Sumerische Kultlyrik, published already in 1966. This compendium includes 17 essays by friends and colleagues, all focusing on Sumerian language and literature.

 Originally published in 1980, the Concordances to Conrad's The Shadow Line and Youth: A Narrative provide complete verbal indexes and tables of frequency keyed to a field of reference for the text. This volume is part of a series which produced verbal indexes, concordances, and related data for all of Conrad's works.

*Rutgers Alumni Monthly*  
 The second half of the proceedings, City Administration in the Ancient Near East, is available here. A workshop volume is available here. In July 2007, the 53rd Rencontre Assyriologique Internationale (the annual meeting of the International Association of Assyriologists) was held in Moscow and St. Petersburg, Russia. In Moscow, several hundred Assyriologists enjoyed the hospitality of the Russian State University for the Humanities. Dozens of papers on the topic "Language in the Ancient Near East," were delivered at the University. More than 50 of those papers are published in this 2-volume set.
