### Bradstreet's Moon Travel

This book describes a new structural system in wood that represents the first significant challenge to concrete and steel structures since their inception in tall building design more than a century ago. The introduction of these ideas is driven by the need to find safe, carbon-neutral and sustainable alternatives to the

incumbent structural materials of the urban world. The potential market for these ideas is quite simply enormous. The proposed solutions have the potential to revolutionize the building industry, address the major challenges of climate change, urbanization, and sustainable development and to significantly contribute to world housing needs.

Make Your Escape with Moon Travel Guides! Rugged wilderness, freshwater

coastline, and picturesque small towns: explore the best of the "U.P." with Moon Michigan's Upper Peninsula. Inside you'll find: Strategic, flexible itineraries, from a weekend on Mackinac Island to a week exploring the eastern or western peninsula, designed for outdoor adventurers, history and culture buffs, foliage seekers, and more Unique activities and ideas for every season: Relax in quaint European-style towns, kick back at an outdoor summer concert, and sample local delicacies like Cornish

pasties, Swedish meatballs, and Mackinac Island fudge. Hike through maple forests, catch a glimpse of wild moose, red foxes, and white-tailed deer, and camp under the starry sky. Get out on the water and spend the day boating, fishing, and swimming, or try skiing, snowshoeing, or snowmobiling in the winter. Honest advice on when to go, where to stay, and how to get around from lifelong Michigander Paul Vachon. Detailed maps and helpful reference photos throughout. Focused coverage of the Straits of Mackinac, Escanaba and the Lake Michigan shore, the Superior Upland, Keweenaw Peninsula and Isle Royale, Marquette and the Lake Superior shore, Whitefish Bay, and the Lake Huron shore. Thorough background information on the landscape, climate, wildlife, and local culture. With Moon Michigan's Upper Peninsula's expert tips, local insight, and countless activities, you can plan your trip your way. Exploring more of the Mitten State? Try Moon Michigan.

*Urban Climates* is the first full synthesis of modern scientific and applied research on urban climates. The book begins with an outline of what constitutes an urban ecosystem. It develops a comprehensive terminology for the subject using scale and surface classification as key constructs. It explains the physical principles governing the creation of distinct urban climates, such as airflow around buildings, the heat island, precipitation modification and air pollution, and it then illustrates how this knowledge can be applied to moderate the undesirable consequences of urban development and help create more sustainable and resilient cities. With urban climate science now a fully-fledged field, this timely book fulfills the need to bring together the disparate parts of climate research on cities into a coherent framework. It is an ideal resource for students and researchers in fields such as climatology, urban hydrology, air quality, environmental engineering and urban design.

Over the past decade the Metal Unit of the

Material Culture Section, Archaeology Research Division, Canadian Parks Service, has maintained a reference file identifying marks found on metal artifacts. This document is a selection of marks on file that relate primarily to tableware items, from the late 18th century to about 1900.

Getting Ready for the 4th Grade  
Assessment Test: Help Improve Your Child's Math and English Skills - Many parents are expressing a demand for books that will help their children succeed and excel on the fourth grade assessment tests in math and English -especially in areas where children have limited access to computers. This book will help students practice basic math concepts, i.e., number sense and applications as well as more difficult math, such as patterns, functions, and algebra. English skills will include practice in reading comprehension, writing, and vocabulary. Rubrics are included for self-evaluation.

The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and

modernism in art, literature and architecture are brilliantly integrated in this account.

Verso

An exploration of the fast food industry in the United States, from its roots to its long-term consequences.

Career Handbook Blurb

From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go

the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail  
'Riveting, superb, terrifying' - Observer  
'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist  
'This book shines like all Diamond's work' - Sunday Times
