The universal practice
of selecting and
excerpting,
summarizing and
canonizing, arranging
and organizing texts
and visual signs, either
in carefully dedicated
types of manuscripts or

manuscript cultures.
Determined by
intellectual or practical

never neutral in itself.
The resulting proximity

vast selection of highly

this volume deals with
manuscripts planned or

Whatever their

Ciascuno di noi ha un
grande potenziale, ma
non tutti sanno di
averlo. Il piacere di
narrare storie fa parte

della nostra umanità, pensate a quando ci succede qualcosa di eccezionale e non vediamo l'ora di raccontarlo a qualcuno. A voce è semplice, è quello che sentiamo nell'immediato, quello che ci ha resi felici, o tristi. Quando però vogliamo mettere su carta quelle stesse storie che a voce narriamo tanto volentieri, la situazione si complica un po', ma non è il caso di disperare. La lettura e l'esercizio continuo ci aiutano a sviluppare questo nostro potenziale nascosto. E se non sapete da dove cominciare a esercitarvi, questo libretto è un buon punto di partenza.

fiction, particularly that written by women, often challenges traditional literary practice. At the same time the predominantly male-authored canon of fantastic literature offers a problematic range of gender stereotypes for female authors to 're-write'. Fantastic tropes, of space in particular, enable three important contemporary Italian female writers (Paola Capriolo, b. 1962; Francesca Duranti, b. 1935 and Rossana Ombres, b. 1931) to encounter and counter anxieties about writing from the female subject. All three writers begin by exploring the hermetic, fantastic space of enclosure with a critical, or troubled, eye, but eventually opt for wider national, and

often international spaces, in which only a 'fantastic trace' remains. This shift mirrors their own increasingly confident distance from male-authored literary models and demonstrates the creative input that these writers bring to the literary canon, by redefining its generic boundaries.

Menotti Lerro is one of

the most interesting poets of modern-day Europe. Born in a small village just outside of Salerno, Southern Italy, in 1980, he has produced an impressive range of publications, including essays, poetry, fiction, autobiography, and drama. His is a poetry concerned with powerful imagery, the physicality and vulnerability of the body, the meaning of objects, the interpretation of memories, and the philosophical importance of identity. For the first time, the rich colours and textures of Lerro's verse are available in English. This volume presents the power of the poet's voice in all its aching magnificence and demonstrates how it

represents the sounds and rhythms of a new generation.

"In The Weight of the Printed Word, Steve Wright explores the creation and use of documents as a key dimension in the activities of the Italian workerists during the 1960s and 1970s. From leaflets and newspapers to books, internal documents and workers' enquiries, the operaisti deployed a wide variety of printed materials in their efforts to organise amongst new subjectivities of mass rebellion. As Wright demonstrates, the practice of working with print was a central part of what it meant to be a workerist or autonomist militant

during these years: one that throws light both on the meaning of political engagement, as well as the challenges posed by the use of technologies of communication and by emergent social subjects"--

This book examines the origins, development and history of the cult of Saint Catherine of Siena. Gerald Parsons argues that the cult of Catherine of Siena

constitutes a remarkable example of the cult of a particular saint which, across more than six centuries, has been the vehicle for an evolving sequence of civil religious rituals and meanings. He shows how the cult of this particular saint developed, firstly, as an expression of Sienese civil religion; secondly, as a focus for Italian civil religion; and finally into an expression of European civil religion. Instead of the predominantly devotional - and frequently essentially hagiographical - approach of much of the literature on Catherine of Siena, Parsons examines the significance of her cult from the perspective of civil religion and the social history of

religion.

The series is a platform for contributions of all kinds to this rapidly developing field.

General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.

This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.

Living Under the Evil

Pope BRILL

Contemporary democracy is in crisis. People believe less and less in a system of democratic institutions that can cope with today's social problems. Leszek Koczanowicz sheds new light on this problem, using the ideas of M. M. Bakhtin and others to show that dialogue in democracy can transcend both antagonistic and

consensual perspectives. After an overview of the history of the dialogue/antagonism opposition as it is embedded in modern political theory, and the concept of dialogue in contemporary political theory, the author moves on to demonstrate that Bakhtin's theory of dialogue can introduce a new quality into political theory, allowing us to overcome the liberalism/communitarianism debate. To conclude, he introduces a concept of 'critical community' to show that collective identities can be constructed in critical dialogue with the tradition and values of community.

This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in

the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they

actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

A brand-new Courtney Series adventure. The action-packed new book in the Courtney Series and the sequel to Courtney's War. Just because the war is over and Hitler dead, doesn't mean the politics he stood for have died too. Saffron

Courtney and her beloved husband Gerhard only just survived the brutal war, but Gerhard's Nazi-supporting brother, Konrad, is still free and determined to regain power. As a dangerous game of cat-and-mouse develops, a plot against the couple begins to stir. One that will have ramifications throughout Europe. . . Further afield in Kenya, the last outcrop of the colonial empire is feeling the stirrings of rebellion. As the situation becomes violent, and the Courtney family home is under threat, Leon Courtney finds himself caught between two powerful sides - and a battle for the freedom of a country. Legacy of War is a nail-biting story of courage,

bravery, rebellion and war from the master of adventure fiction.

Bodies, Borders and Citizenship Simon and Schuster

The purpose of this volume is to investigate the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. It aims to collect and organize in one database all the digitalised versions of the first editions of Greek grammars, lexica and school texts available in Europe in the 14th and 15th centuries, between two crucial dates: the start of Chrysoloras's teaching in Florence (c. 1397) and the end of the activity of Aldo

Manuzio and Andrea Asolano in Venice (c. 1529). This is the first step in a major investigation into the knowledge of Greek and its dissemination in Western Europe: the selection of the texts and the first milestones in teaching methods were put together in that period, through the work of scholars like Chrysoloras, Guarino and many others. A remarkable role was played also by the men involved in the Council of Ferrara (1438-39), where there was a large circulation of Greek books and ideas. About ten years later, Giovanni Tortelli, together with Pope Nicholas V, took the first steps in founding the Vatican Library. Research into the return of the knowledge of Greek to

Western Europe has suffered for a long time from the lack of intersection of skills and fields of research: to fully understand this phenomenon, one has to go back a very long way through the tradition of the texts and their reception in contexts as different as the Middle Ages and the beginning of Renaissance humanism. However, over the past thirty years, scholars have demonstrated the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. In addition, the actual translations from Greek into Latin remain poorly studied and a clear

understanding of the intellectual and cultural contexts that produced them is lacking. In the Middle Ages the knowledge of Greek was limited to isolated areas that had no reciprocal links. As had happened to many Latin authors, all Greek literature was rather neglected, perhaps because a number of philosophical texts had already been available in translation from the seventh century AD, or because of a sense of mistrust, due to their ethnic and religious differences. Between the 12th and 14th century AD, a change is perceptible: the sharp decrease in Greek texts and knowledge in the South of Italy, once a reference-point for this kind of study, was perhaps an important

reason prompting Italian humanists to go and study Greek in Constantinople. Over the past thirty years it has become evident to scholars that humanism, through the re-appreciation of classical antiquity, created a bridge to the modern era, which also includes the Middle Ages. The criticism by the humanists of medieval authors did not prevent them from using a number of tools that the Middle Ages had developed or synthesized: glossaries, epitomes, dictionaries, encyclopaedias, translations, commentaries. At present one thing that is missing, however, is a systematic study of the tools used for the study of Greek between the 15th and

16th century; this is truly important, because, in the following centuries, Greek culture provided the basis of European thought in all the most important fields of knowledge. This volume seeks to supply that gap.

"When, why and how was it first believed that the corpse could reveal 'signs' useful for understanding the causes of death and eventually identifying those responsible for

it? The Body of Evidence. Corpses and Proofs in Early Modern European Medicine, edited by Francesco Paolo de Ceglia, shows how in the late Middle Ages the dead body, which had previously rarely been questioned, became a specific object of investigation by doctors, philosophers, theologians and jurists. The volume sheds new light on the elements of continuity, but also on the effort made to liberate the semantization of the corpse from what were, broadly speaking, necromantic practices, which would eventually merge into forensic medicine"--

"This volume,

examining the reception of ancient rhetoric, aims to demonstrate that the past is always part of the present: in the ways in which decisions about crucial political, social and economic matters have been made historically; or in organic interaction with literature, philosophy and culture at the core of the foundation principles of Western thought and values. Analysis is meant to cover the broadest possible spectrum of considerations that focus on the totality of rhetorical species (i.e. forensic, deliberative and epideictic) as they are applied to diversified topics (including, but not limited to, language, science, religion, literature, theatre and

other cultural
processes (e.g.
