If Students Need to Know It, It's in This Book This book develops the math skills of high school students. It fosters skill mastery that helps them succeed both in school and on the Massachusetts Comprehensive Assessment System (MCAS). Why The Princeton Review? We

have more than 20 years of experience helping students master the skills needed to excel on standardized tests. Each year we help more than 2 million students score higher and earn better grades. We Know the Massachusetts Comprehensive Assessment System Our experts at The Princeton Review have analyzed the MCAS, and this book provides the most up-to-date, thoroughly researched information possible. We break down the test into its individual skills to familiarize students with the test's structure while increasing their overall skill level. We Get Results We know what it takes to succeed in the classroom and on tests. This book includes strategies that are proven to improve student performance. We provide - content review based on Massachusetts standards and objectives - detailed lessons, complete with skill-specific activities - 2 complete practice MCAS math tests.

Study & Master Mathematical Literacy Grade 10 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-

use course helps learners to master essential content and skills in Mathematical Literacy. The Teacher's File includes: * a weekly teaching schedule, divided into the four terms to guide the teacher on what to teach * extra project templates for teachers to choose from * solutions to all the activities in the Learner's Book.

Mathematical Literacy, Grade 10 The Princeton Review

The 100+ Series, Algebra II, offers in-depth practice and review for challenging middle school math topics such as factoring and polynomials; quadratic equations; and trigonometric functions. Bonus activities on each page help extend the learning and activities, making these books perfect for daily review in the classroom or at home. Common Core State Standards have raised expectations for math learning, and many students in grades 6-8 are studying more accelerated math at younger ages. The 100+ Series provides the solution with titles that include over 100 targeted practice activities for learning algebra, geometry, and other advanced math topics. It also features over 100 reproducible, subject specific, practice pages to support standards-based instruction.

The Princeton Review realizes that acing the MCAS Grade 10 Math exam is very different from getting straight As in school. TPR doesn't try to teach students everything there is to know about math--only what they'll need to score higher on the exam. "There's a big difference. In *Cracking the MCAS Grade 10 Math*, The Princeton Review will teach test takers how to think like the test makers and: *Raise scores by using techniques such as the two-pass system, Ballparking, and Process of Elimination *Get students familiar with the test format so they won't be surprised on the test day *Score higher by knowing in advance what will be on the test *Learn problem-solving skills that are designed to help test takers ace the MCAS Grade 10 Math exam **This book includes 2 full-length simulated MCAS Grade 10 Math exams. The questions are just like the ones test takers will see on the actual exam, and The Princeton Review fully explains every solution. "Contents Include: Introduction to the MCAS Exams Structure
