Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful

substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. Clear instructions and step-by-step photographs teach you how to mix chemicals and apply light-sensitive emulsions by hand, how to create imagery in and out of the darkroom, how to translocate Polaroid photos and magazine and newspaper pictures, and how to alter black-and-white photographs. A color portfolio highlights the work of internationally known artists such as Robert Rauschenberg, Todd Walker, and most recently Doug and Mike Starn, and an invaluable list of supply sources (including e-mail addresses) from throughout North America and Europe is included at the

end of the book. Setting aside old distinctions between photographer and nonphotographer, *New Dimensions in Photo Processes* invites artists in all media to discover nonsilver imaging techniques. Painters, printmakers, fiber artists, sculptors, illustrators and photographers alike will find this a valuable, practical text outlining creative processes that require little or no knowledge of photography and chemistry.
