Shaye Eastly has never been in the presence of kings, or magic. In fact, she has never ventured further from her small village in the mortal kingdom of Nautia than the capital square. But when a stranger appears

to help her evade the palace guards who've come to arrest her for suspected sorcery, Shaye must trust her new companion, Aydan, to keep her safe. As they flee to Medeisia, the ancient land of sorcerers, Shaye is quickly wrapped up in a dangerous world with a target on her back as long-dormant abilities spark and a family history she's never known begins to unravel before her. Meanwhile, Aydan's wanted status and complicated relationship with the royal family leads

them down a path they cannot turn from. In the midst of imprisonment, torture, and rising political tension, Shaye and Aydan must rely on each other and decide if their feelings for one another can survive the horrors they endure, the implications that come with her growing power, and the family legacies that will follow them forever.

knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That's what happens to Ruri Kell when she accepts Iain MacInnes's invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him.  To build electronic projects that can sense the physical world, you need to build circuits based around sensors:

electronic components that react to physical phenomena by sending an electrical signal. Even with only basic electronic components, you can build useful and educational sensor projects. But if you incorporate Arduino or Raspberry Pi into your project, you can build much more sophisticated projects that can react in interesting ways and even connect to the Internet. This book starts by teaching you the basic electronic circuits to read and react to a sensor. It

then goes on to show how to use Arduino to develop sensor systems, and wraps up by teaching you how to build sensor projects with the Linux-powered Raspberry Pi.

How are we as Christians called to respond when cancer invades our lives, whether our own bodies or those of our friends and family? On the eve of his

own cancer surgery, John Piper writes about cancer as an opportunity to glorify God. With pastoral sensitivity, compassion, and strength, Piper gently but firmly acknowledges that we can indeed waste our cancer when we don't see how it is God's good plan for us and a hope-filled path for making much of Jesus. Don't Waste Your Cancer is for

anyone touched by a life-threatening illness. It first appeared as an appendix in *Suffering and the Sovereignty of God*. Repackaged and republished, it will serve as a hope-giving resource for healthcare workers, pastors, counselors, and others caring for those with cancer and other serious illnesses. The booklets are also available in packs of ten.
