Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Megan Black argues that the U.S. Department of the Interior, known for managing domestic natural resources and operating public parks, constantly supports and projects American power abroad. In the guise of sharing expertise globally, Interior has helped the U.S. maintain key benefits of empire without the burden of playing the imperialist villain.

This collection of nine Fulbright educators' narrative accounts examines how these scholars navigated their teaching responsibilities with students, time with fellow colleagues, and cultural expectations in China, ranging from experience in teaching arts and government to questions of religion, emotional literacy, and urban infrastructure. With these contributions, authors analyze their own expectations against their actual experiences in order to offer insights for scholars and students of study abroad programming. As a roadmap for negotiating China's higher education network and for taking advantage of any cross-cultural educational environment, this book highlights the type of fruitful educational programming that can come from cultural, historical, economic, and political difference.

Whether we grow up with one, two, or several languages during our early years of life, many of us will learn a second, foreign, or heritage language in later years. The field of Second language acquisition (SLA, for short) investigates the human capacity to learn additional languages in late childhood, adolescence, or adulthood, after the first language --in the case of monolinguals-- or languages --in the case of bilinguals-- have already been acquired. Understanding Second Language Acquisition offers a wide-encompassing survey of this burgeoning field, its accumulated findings and proposed theories, its developed research paradigms, and its pending questions for the future. The book zooms in and out of universal, individual, and social forces, in each case evaluating the research findings that have been generated across diverse naturalistic and formal contexts for second language acquisition. It assumes no background in SLA and provides helpful chapter-by-chapter summaries and suggestions for further reading. Ideal as a textbook for students of applied linguistics, foreign language education, TESOL, and education, it is also recommended for students of linguistics, developmental psycholinguistics, psychology, and cognitive

science. Supporting resources for tutors are available free at www.routledge.com/ortega.

Travel & Tourism Grade Eleven

This book puts forth new challenges and new methods for the planning of outdoor recreation and tourism. The first two chapters offer a description of the problems which the public and the private sectors are facing. Following chapters deal with several aspects of the problems, including trends and changes in outdoor recreation and tourism, previous policies of planning for recreation and tourism, shortcomings in policies and actions, and new approaches in several countries, such as the United States, France, Switzerland and The Netherlands. Finally, the book gives examples of new methods and approaches for the planning of outdoor recreation and tourism. These methods are demonstrated with specific areas or projects from the aforementioned countries. This book will be invaluable to all those who bear the responsibility of providing human beings with possibilities and facilities to spend their free time in their own desired way, namely landscape and urban planners, conservationists, and landscape ecologists.
