d'Angleterre, de Thomas Rymer, dispersé dans cette Edition à la fin des volumes auxquel chaque partie en peut appartenir... Par les soins de M. de S.M. Coin & Currency Institute
The tenth edition of *Gold Coins of the World* expands on its predecessor, digging more deeply into new areas of collector interest, and expanding many sections. From the coins of Ancient

Greece, Rome, and the Byzantine Empire, and from Afghanistan through Zanzibar, it includes the addition of many new discoveries for dozens of countries. From the 384 pages of the 1958 edition, the work has expanded to 852 pages, which have been completely revised and updated. The authors have listed more than 22,000 coin types, which are illustrated with more

than 8,500 photos—now, for the first time, each one of them in color. Each country's section includes tables of weight and fineness. The market valuations are extensively revised to reflect both the higher price of gold as well as the skyrocketing demand for numismatic rarities. Valuations are now provided, for the first time, in up to three states of preservation. Many of the prices,

especially for great rarities and coins in higher grades, have at least doubled. In fact, as collectors recognize the scarcity of coins in the highest states of preservation, the premium for such coins relative to lower-graded ones is escalating beyond traditional proportions. The coinage of India and the Islamic world, long dismissed by western collectors as difficult to decipher,

unimportant, and lacking in value, is now the subject of intense interest, and has shown some of the most dramatic increases of all. The reader will also find a useful directory of the world's leading gold-coin dealers and auction houses. For the numismatist, banker, economist, historian, or institution of higher learning, the tenth edition of *Gold Coins of the World* is a book for every library,

public and private. "The" Quarterly Review Indiana University Press On its initial publication, *The Roman Community at Table* during the Principate broke new ground with its approach to the integral place of feasting in ancient Roman culture and the unique power of food to unite and to separate its recipients along class lines throughout the Empire.

John F. Donahue's comprehensive examination of areas such as festal terminology, the social roles of benefactors and beneficiaries, the kinds of foods offered at feasts, and the role of public venues in community banquets draws on over three hundred Latin honorary inscriptions to recreate the ancient Roman feast. Illustrations depicting these inscriptions, as well as the food supply

trades and various festal venues, bring important evidence to the study of this vital and enduring social practice. A touchstone for scholars, the work remains fresh and relevant. This expanded edition of Donahue's work includes significant new material on current trends in food studies, including the archaeology and bioarchaeology of ancient food and drink; an additional

collection of inscriptions on public banquets from the Roman West; and an extensive bibliography of scholarship produced in the last ten years. It will be of interest not only to classicists and historians of the ancient world, but also to anthropologists and sociologists interested in food and social group dynamics.

The Origin and Early History of Insurance
 JHU Press
 A powerful

and impassioned historical account of the largest successful revolt by enslaved people in history: the Haitian Revolution of 1791-1803 “One of the seminal texts about the history of slavery and abolition.... Provocative and empowering.” —The New York Times Book Review The Black Jacobins, by Trinidadian historian C. L. R. James, was the first major analysis of the

uprising that began in the wake of the storming of the Bastille in France and became the model for liberation movements from Africa to Cuba. It is the story of the French colony of San Domingo, a place where the brutality of plantation owners toward enslaved people was horrifyingly severe. And it is the story of a charismatic and barely literate enslaved person named Toussaint L’Ouverture,

who successfully led the Black people of San Domingo against successive invasions by overwhelming French, Spanish, and English forces—and in the process helped form the first independent post-colonial nation in the Caribbean. With a new introduction (2023) by Professor David Scott. [Dictionnaire de l'ancien français jusqu'au milieu du XIXe siècle](#) Taylor & Francis

Featuring information for more than 2,000 composers, the fourth edition includes enhanced indexes. The new "Hinson" will be an indispensable guide for many years to come. <i>The History of the Mahometan Empire in Spain</i> Edinburgh University Press Once Europe's</p>	<p>supreme maritime power, Spain by the mid-eighteenth century was facing fierce competition from England and France. England, in particular, had successfully mustered the financial resources necessary to confront its Atlantic rivals by mobilizing both aristocracy and merchant bourgeoisie in support of its imperial ambitions. Spain, meanwhile, remained overly dependent on</p>

the profits of its New World silver mines to finance both metropolitan and colonial imperatives, and England's naval superiority constantly threatened the vital flow of specie. When Charles III ascended the Spanish throne in 1759, then, after a quarter-century as ruler of the Kingdom of the Two Sicilies, Spain and its colonial empire were seriously imperiled. Two hundred years

of Hapsburg rule, followed by a half-century of ineffectual Bourbon "reforms," had done little to modernize Spain's increasingly antiquated political, social, economic, and intellectual institutions. Charles III, recognizing the pressing need to renovate these institutions, set his Italian staff—notably the Marqués de Esquilache, who became Secretary of the Consejo de Hacienda

(the Exchequer)—to this formidable task. In *Apogee of Empire*, Stanley J. Stein and Barbara H. Stein trace the attempt, initially under Esquilache's direction, to reform the Spanish establishment and, later, to modify and modernize the relationship between the metropole and its colonies. Within Spain, Charles and his architects of reform had to be mindful of determining what

adjustments could be made that would help Spain confront its enemies without also radically altering the Hapsburg inheritance. As described in impressive detail by the authors, the bitter, seven-year conflict that ensued between reformers and traditionalists ended in a coup in 1766 that forced Charles to send Esquilache back to Italy. After this setback at home, Charles still hoped to

effect constructive change in Spain's imperial system, primarily through the incremental implementation of a policy of *comercio libre* (free-trade). These reforms, made half-heartedly at best, failed as well, and by 1789 Spain would find itself ill prepared for the coming decades of upheaval in Europe and America. An in-depth study of incremental response by an old imperial order

to challenges at home and abroad, *Apogee of Empire* is also a sweeping account of the personalities, places, and policies that helped to shape the modern Atlantic world. [Curiosities of Literature ... Tenth Edition](#) W. W. Norton & Company *Humanism and Religion in Early Modern Spain* brings together twenty-five essays by renowned historian Terence O'Reilly. The essays

examine the interplay of religion and humanism in a series of writings composed in sixteenth-century Spain. It begins by presenting essential background: the coming together during the reign of the Emperor Charles V of Erasmian humanism and various movements of religious reform, some of them heterodox. It then moves on to the reign of Philip II, focusing on the mystical

poetry and prose of St John of the Cross. It explores the influence on his writings of his humanist learning – classical, biblical and patristic. The third part of the book concerns a verse-epistle by John's contemporary, Francisco de Aldana. One chapter presents the text with a parallel version in English, whilst two others trace its debt to Florentine Neoplatonism, particularly the thought of

Marsilio Ficino. The final part is devoted to the humanism of the poet and Scripture scholar Luis de León, and specifically to the confluence in his work of biblical and classical motifs. This book is essential reading for scholars and students of early modern Spanish history, as well those interested in literary studies and the history of religion. (CS 1102).

The Selected Works of Andrew Lang: Volume 1
Anthropology : Fairy Tale, Folklore, the Origins of Religion, Psychical Research
Edited by Andrew

Teverson, Alexandra Warwick and Leigh Wilson
This is the first critical edition of the works of Andrew Lang (1844-1912), the Scottish writer whose enormous output spanned the whole range of late-nineteenth century intellectual culture. Neglected since his death, partly because of the diversity of his interests and the volume of his writing, his cultural centrality and

the interdisciplinary nature of his work make him a vital figure for contemporary scholars. This volume covers Lang's wide and influential engagement with the central areas of late nineteenth-century anthropology. Lang made decisive interventions in debates around the meaning of folk tales and the origins of religion, as well as being an important figure in the investigation of spiritualist

claims through psychical research. The work reproduced here includes journalism, essays, extracts from books and previously unpublished letters which together articulate and challenge some of the central ideas and discussions of the period, including evolution, the relation between modern and non-modern cultures, the nature of scientific claims to

truth, and the consequences of materialism. The volume will provide new and illuminating ways of understanding and assessing the period for scholars across a range of disciplines, including those interested in the histories of the fairy story, of science, of the occult, of colonialism and of anthropology. Key Features: Unpublished archival material Critical introductions to the major

areas of his workFull explanatory notesAndrew Teverson is Professor of English Literature and Associate Dean for the Faculty of Arts and Social Sciences at Kingston University, London. His research centres on the use and meaning of fairy tales, and he has published both on the employment of them in contemporary writing and on the historical development of the form. He is the

author of Fairy Tale (Routledge, 2013).Alexandra Warwick is Professor of English Studies and Head of the Department of English, Linguistics and Cultural Studies at the University of Westminster. Her research is on Victorian culture, in particular the fin de siècle. Leigh Wilson is Reader in Modern Literature in the Department of English, Linguistics and Cultural Studies at the University of

Westminster. Her research focuses on modernism, on the place of supernatural and occult beliefs and practices in the late nineteenth and early twentieth centuries, and on the contemporary British novel. She is the author of Modernism and Magic: Experiments with Spiritualism, Theosophy and the Occult (EUP, 2013).

University of Michigan Press The Third Edition includes substantial revisions and new material throughout the book that will secure its standing as the most useful history available of preindustrial Europe. During the seven hundred years before the Industrial Revolution, the stage was set for Europe's transformation from a backward agrarian society to a

powerful industrialized society. An economic historian of international reputation, Carlo M. Cipolla explores the process that made this transformation possible. In so doing, he sheds light not only on the economic factors but on the culture surrounding them.
