How Not to Eat Pork, Or, Life Without the Pig Black Classic Press

"There are more than 200 negative words associated with the word black and more than 100 positive meanings or synonyms attributed to the word white. This analysis of semantics and semiotics illustrates how words are not racially neutral and can convey negative values within the African American community or any community of color. Also examined are the impact of images, from paintings of Jesus to images of Santa Claus, and how they have shaped the way blacks are viewed and how they view themselves. This is not a book on political correctness, but rather a guide to becoming more aware of and sensitive to the impact that words and images can have on the psyche."

Africans laid the foundations for excellence in education, but anti-African think tanks, scholars, and others have consciously sought to erase and suppress this legacy. African Power calls for the understanding and practice of indigenous African socialization practices and argues that they can be useful today. African Power also calls for resistance to educational paradigms that are totally foreign, useless and damaging to African people. The book includes a large bibliography with sources addressing ancient African pedagogy.

"The Scientific Intervention in our Affairs", was released May of 2015. This daring work arms the reader with insight & research on taboo subjects, such as Eugenics, Vaccinations, Crack Cocaine, Chemtrails & Organ Trafficking. The goal is to arm the reader with proof of the Scientific War that has waged on Black America (and indigenous people around the world) using a very systematic, dangerous, and directed agenda. Other topics include Chemtrails, Genetically Modified Food, and Eugenics. The book closes highlighting suggestions for countering this war with the section entitled "Supreme Wisdom".

Alkaline Herbal Medicine gives insight into many of the herbs used to reverse disease in Dr. Sebi's African Bio Mineral Balance. It covers scientifically supported properties, preparation, doses and dosages, and how to combine herbs. It addresses alkaline foods on the Dr. Sebi nutritional guide, and their chemical affinity with and support of the electric body. The natural order in life designed the body to be healthy and heal under the right conditions. These conditions are programmed into the DNA of Homo sapiens, whose base DNA makeup is the African genome. Diets centered on the consumption of natural alkaline plant foods and ample exposure to the sun supported the healthy expression of the African genome. The environment of Africa, and environments similar to Africa, produced life that developed with a complete and balanced electrical structure. The plant life that grew in these environments grew under optimal conditions in nutrient rich soil under year long exposure to the sun. The resulting chemical makeup of these natural

alkaline plants protected them from environmental stresses. Africans originally ate diets centered on the consumption of these plants, like the great apes of Africa, and the programming of the African genome used the protective nature of these plants' nutrients to support its vibrancy. A scientific model supports the idea that Africans migrated out of Africa hundreds of thousands of years ago into the less hospitable environments of Europe and Asia. These environments didn't support the healthy expression of the African genome and resulted in the mutation of the gene and the development of the Neanderthal of Europe and Denisovan of East Asia. Science has linked diseases like lupus, Crohn's disease, and type 2 diabetes to the Neanderthal gene. The Neanderthals, who inhabited the Neanderthal caves in Germany, ate a diet centered on the consumption of meat. The combination of their meat-centered diet and adverse relationship with the sun led to the development of disease in the body. Now, the meat-centered diet is being globalized and is spreading disease throughout the world. An alkaline plant-centered diet and the use of alkaline herbal medicine naturally support the healthy expression of the African genome in all people, and reverses chronic disease. Pharmaceutical medicine is built on the power of medicinal herbs because around fifty percent of its drugs are derived from herbs. The issue is industry has strategically conditioned people to forget about the healing power of natural alkaline herbs. I dedicate this book in the memory of Alfredo Bowman lovingly known as Dr. Sebi. He helped us to remember that natural alkaline herbs and plant foods support the healthy expression of the African genome that is

in all people. He did this by sharing his African Bio Mineral Balance methodology. Categories: herbal remedies, naturopathy, healing, herbs, herbal medicine

 The Compensatory Code is a term that means the sum total of everything that is thought, said, or done by one individual Non-White person, who is a Victim of Racism [Victim of White Supremacy] that is effective in helping to eliminate Racism (White Supremacy), and/or in helping to "make up" for the lack of justice and correctness.

 In the 1960s, no black political group stood for grassroots insurgency more than the Black Panther Party. The figure who embodied the militant and controversial spirit of the Black Panther Party more than anyone was Eldridge Cleaver. Charismatic, brilliant, and courageous, Cleaver built a base of power and influence that struck fear deep in the heart of white America. It was therefore shocking to many left-wing radicals when Cleaver turned his back on black revolution, the Nation of Islam, and communism in 1975. While Cleaver seemed sincerely disillusioned with radicalism, his erratic behavior over the next two decades revealed something that had been a latent part of his psyche all along—his narcissistic megalomania. His influence declined significantly through the 1980s until he found himself back on the streets committing petty crimes. By the time he died, in 1998, he was largely viewed as a turncoat who had betrayed the cause of black freedom. How can we make sense of Cleaver's precipitous decline from a

position as one of America's most vibrant black writers and activists? And how do his contradictory identities as criminal, party leader, international diplomat, Christian conservative, and Republican politician reveal that he was more than just a traitor to the advancement of civil rights? *Revolution or Death* answers these questions and many more by providing the first life story of one of the most notorious black revolutionaries in history. It explores the audacious dreams and spiritual transformations of the eccentric radical and places him squarely within the context of his changing times. Author Justin Gifford explores previously unseen materials from Cleaver's extensive archive to create the story of a man far more compelling and complex than anyone has given him credit for. In a country defined by its extreme political

positions on the right and left, Cleaver embodied both ideologies in pursuit of his conflicting ideals, and it was his inability to resolve
