30% discount for members of The Mineralogical Society of Britain and Ireland This text summarises the state-of-the-art in the study of mineral surfaces and some of the key applications of surface science in mineralogy and mineral chemistry. Each chapter covers a particular aspect of the subject and is written by an expert who raises the key issues involved for those requiring an introduction to the subject, whilst highlighting most recent developments. Advanced undergraduates, postgraduates and researchers alike will find this essential reading as it is the first book to review the fast developing field of mineral surfaces.

This is the chapter slice "Rocks and Minerals Gr. 1-5" from the full lesson plan "Hands-On - Earth & Space Science" Inspire your students to gain a deep understanding of our planet earth and beyond with our Hands-On Earth & Space Science resource for grades 1-5. Combining Science, Technology, Engineering, Art, and Math, this resource aligns to the STEAM initiatives and Next Generation Science Standards. Make your own weather forecast as a group. Find out how much rain has fallen by building your own rain gauge. Get a glimpse at how wind works by creating your own sand dunes. Tell a story by drawing your own rock layer. Get into groups to make your own solar cell, windmill, or water wheel. Track the movement of the Moon with your own Lunar Calendar. Each concept is paired with hands-on experiments and comprehension activities to ensure your students are engaged and fully understand the concepts. Reading passages, graphic organizers, before you read and assessment activities are included.

Written by a renowned expert in school neuropsychology, Essentials of School Neuropsychological Assessment, Second Edition is a practical resource presenting school psychologists, educational diagnosticians, and pediatric neuropsychologists with clear coverage and vital information on this evolving area of practice within school psychology. Filled with case studies and guidance for your practice, the Second Edition offers new coverage of major neuropsychological test batteries for children, including NEPSY ®-II; Wechsler Intelligence Scale for Children®, Fourth Edition Integrated; and Delis-Kaplan Executive Function System TM. Like all the volumes in the Essentials of Psychological Assessment series, this book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to make optimal use of major psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. The accompanying CD-ROM provides helpful tools, including sample case studies and searchable databases of neuropsychological tests classified by processing area and conceptual model. Essentials of School Neuropsychological Assessment, Second Edition explores how to identify the need for testing, conduct a neurodevelopmental history, select appropriate assessment instruments, effectively evaluate students, and accurately interpret results.

Minerals can be difficult to identify. In addition, many people cannot tell the difference between a rock and a mineral. Minerals come in all kinds of shapes, sizes, and colors. Even recognizing the same mineral that has a different color can be a challenge. Mineral Identification Made Easy includes a basic introduction to, and instruction in, minerals. Focusing on some simple principles of identification should help you to sort out some of the conundrums, and make mineral collecting more enjoyable, especially for the lay person. Ten lessons, with final review. Lessons include: ¿What is a Mineral ¿What are Minerals Made of¿The Rock-forming Minerals ¿What the Minerals Look Like in the Rocks ¿The Mineral Families ¿The Feldspar Family of Minerals ¿Identifying Minerals¿Building Your Mineral Collection¿Working with Fluorescent Minerals ¿Gemstones Biblical perspective. Full color, 84 pages, 88 illustrations and photos. Suggested for Grades 5-12. Samples to accompany this textbook can be ordered at NorthwestRockAndFossil.com.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere; the evolution of landforms; patterns of change that cause weather; the scale and structure of stars; and the interactions that occur among the water, atmosphere, and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy, and oceanography. - p. 8-9.
