Lange Critical Care Springer Nature

Critical Care: A Problem-Based Learning Approach provides a comprehensive review of the dynamic and ever-changing field of critical care. Its problem-based format incorporates a vast pool of practical, ABA board-exam-style multiple-choice questions for self-assessment, and is an ideal resource for exam preparation as well as ongoing clinical education among trainees and clinicians. Each of its 35 case-based chapters is accompanied by questions and answers, accessible online in a full practice exam. The cases presented are unique, as each chapter begins with a case description, usually a compilation of several actual cases; it then branches out through case-based questions, to increasingly complex situations. This structure is designed to create an authentic experience that mirrors that of working through the nuances of a complicated clinical scenario. The discussion sections that follow offer a comprehensive approach to the chapter's subject matter, thus creating a modern, complete, and up-to-date medical review of that topic.

The Washington Manual of Critical Care is a concise pocket manual for physicians and nurses. It is distinguished from the multitude of other critical care handbooks on the market by its consistent presentation of algorithms displaying the decision-making pathways used in evaluating and treating disorders in the ICU. The new edition transitions to a full color format and will include coverage of Deep Venous Thrombosis/Pulmonary Embolism, fetal-maternal critical care, C difficile infection, and alternative hemodynamic monitoring.

Anesthesiology Applied Exam Board Review Lippincott Williams & Wilkins

Neurocritical Care Board Review: Questions and Answers provides

clinicians with a thorough review of the complex subspecialty of Neurocritical Care, using a question-and-answer (Q&A) format. The Q&A format is easily readable, high yield, and serves as good practice for test takers or anyone looking to improve or reinforce essential knowledge. The book covers the key topics pertinent to (and found on) neurocritical care boards, and is organized according to the exam core curriculum outline.. A total of 649 questions address both neuroscience critical care (general neurology, neurotrauma, neurovascular and neurosurgical problems) and general critical care topics (systems trauma, cardiovascular, infectious disease, pulmonary and renal issues, and hemodynamic monitoring). Detailed explanations follow in the answer section of each chapter, along with references for further study. Where relevant, neuroimaging, EEG and monitoring waveforms, and other images are included in case questions to allow candidates to familiarize themselves with these tools that form a significant part of the exam. Features of Neurocritical Care Board Review include: Comprehensive, high-yield review that covers all areas tested on the neurocritical care certifying exam Applicability to a wide range of physicians in multiple specialties reviewing for boards or looking to test skills and clinical acumen in this challenging area Question and answer format with detailed explanations and references to facilitate recall of must-know information and help identify knowledge gaps for further attention Material aggregated from multiple specialties into a singular resource for exam study

General Surgery Examination and Board Review Springer Nature
This book will help you to learn about critical care medicine as well as prepare for the critical care board examination. This book is structured in a question and answer format. It is useful as a self-assessment while studying for the critical care exam. This permits the reader to concentrate on areas of interest or weakness. Some readers will find answering questions the preferred way to study for a board exam. After completing a chapter, the reader is encouraged to examine the corresponding textbook chapter entirely, for comprehensiveness.

Comprehensive Critical Care Oxford University Press, USA
The field of critical care medicine is evolving quickly. To prepare for certification and refresh their knowledge, today's practitioners need a concise multidisciplinary review that focuses on the core areas of critical care. Ideal for critical care fellows, critical care nurses, residents, and practitioners who spend time in the ICU. This book employs brief chapters on focused topics to help readers review core areas and test their knowledge. Features:

Broad scope addresses all major topics in adult critical care with contributions from experts in a range of disciplines. Concise chapters based on commonly referenced topics make the review easy to navigate. Focused discussions are based on patient presentation and are structured to include common causes, initial management strategies, pathophysiology, differential diagnosis, management, and outcomes. Incisive review questions (3.10 per topic) include answers and explanations to help readers understand the "how" and "why" behind each answer. Staff of MGH and its sister institutions provide consistent terminology and presentation throughout the review.
