From the bestselling author of *The Circle* comes a taut, suspenseful story of two foreigners' role in a nation's fragile peace. With echoes of J. M. Coetzee and Graham

Greene, this "darkly funny" novel (The Los Angeles Times) questions whether we can ever understand another nation's war, and what role we have in forging anyone's peace. An unnamed country is leaving the darkness of a decade at war, and to commemorate the armistice the government commissions a new road connecting two halves of the state. Two men, foreign contractors from the same company, are sent to finish the highway. While one is flighty and

adventurous, wanting to experience the nightlife and people, the other wants only to do the work and go home. But both men must eventually face the absurdities of their positions, and the dire consequences of their presence.

Learn how to fill forests with food by viewing agriculture from a remarkably different perspective: that a healthy forest can be maintained while growing a wide range of food, medicinal, and other nontimber products. The practices of forestry and farming are often seen as mutually exclusive, because in the modern world, agriculture involves open fields, straight rows,

and machinery to grow crops, while forests are reserved primarily for timber and firewood harvesting. In *Farming the Woods*, authors Ken Mudge and Steve Gabriel demonstrate that it doesn't have to be an either-or scenario, but a complementary one; forest farms can be most productive in places where the plow is not: on steep slopes and in shallow soils. Forest farming is an invaluable practice to integrate into any farm or homestead, especially as the need for

unique value-added products and supplemental income becomes increasingly important for farmers. Many of the daily indulgences we take for granted, such as coffee, chocolate, and many tropical fruits, all originate in forest ecosystems. But few know that such abundance is also available in the cool temperate forests of North America. Farming the Woods covers in detail how to cultivate, harvest, and market high-value nontimber forest crops

such as American ginseng, shiitake mushrooms, ramps (wild leeks), maple syrup, fruit and nut trees, ornamentals, and more. Along with profiles of forest farmers from around the country, readers are also provided comprehensive information on: • historical perspectives of forest farming; • mimicking the forest in a changing climate; • cultivation of medicinal crops; • cultivation of food crops; • creating a forest nursery; • harvesting and

utilizing wood products; • the role of animals in the forest farm; and, • how to design your forest farm and manage it once it's established. Farming the Woods is an essential book for farmers and gardeners who have access to an established woodland, are looking for productive ways to manage it, and are interested in incorporating aspects of agroforestry, permaculture, forest gardening, and sustainable woodlot management into the concept of a whole-farm

organism.
