Teaching Comprehension Strategies

R.I.C. Publications

Do I really have to teach reading? This is a question many teachers ask, wondering how they can add a new element to an overloaded curriculum.

The answer is yes; if teachers want their students to learn complex new concepts

in different disciplines, they need to help develop their students' reading skills. In *Do I Really Have to Teach Reading?: Content Comprehension, Grades 6-12*, author Cris Tovani takes on the challenge of helping students apply reading comprehension strategies in any subject. Tovani shows how teachers can expand on their content expertise to provide the instruction students need to understand specific technical and narrative texts. Inside the book you'll find: Examples of how teachers can model their reading process for students Ideas for supplementing and enhancing the use of required textbooks Detailed descriptions of specific strategies taught in context Stories from different high school classrooms to show how reading instruction varies according to content

Samples of student work, including both struggling readers and college-bound seniors Comprehension Constructors : guides designed to help students recognize and capture their thinking in writing while reading Guidance on assessing students Tips for balancing content and reading instruction Tovani's humor, honesty, and willingness to share her own struggles as a teacher make this a unique take on content reading instruction that will be valuable to reading teachers as well as content specialists.

The Common Core State Standards require schools to include writing in a variety of genres across the disciplines. Engaging Students in Academic

Literacies provides specific information to plan and carry out genre-based writing instruction in English for K-5 students within various content areas. Informed by systemic functional linguistics—a theory of language IN USE in particular ways for particular audiences and social purposes—it guides teachers in developing students' ability to construct texts using structural and linguistic features of the written language. This approach to teaching writing and academic language is effective in addressing the persistent achievement gap between ELLs and "mainstream" students, especially in the context of current reforms in the U.S. Transforming systemic functional linguistics and genre theory into concrete classroom tools for designing,

implementing, and reflecting on instruction and providing essential scaffolding for teachers to build their own knowledge of its essential elements applied to teaching, the text includes strategies for apprenticing students to writing in all genres, features of elementary students' writing, and examples of practice.

Ben is a boy who has so often tried to convince people he has seen a Bigfoot that when a real Yeti arrives and borrows his bicycle, no one comes to see if he is telling the truth, in a classic tale with a hugely hilarious twist that carries a timeless message for children about the importance of establishing trust and not "crying wolf."

It's Diwali, and Dipal is excited to share the festival of lights with his little brother. As they celebrate together,

Mohan is amazed by all the colourful decorations, beautiful rangoli patterns and dazzling fireworks he sees. This beautiful picture book is designed to introduce ages 3-7 to the traditions and key features associated with Diwali, the Hindu festival of light. The book introduces key learning points that you could explore further, such as the story of Rama and Sita, the meaning behind the diya lamps, what it's like inside a Hindu temple. and how Hindus carry out puja. This book explains why and how drama works as an enjoyable, social, and emotionally engaging way for young people and adults to learn and use a second language within imagined worlds and develop their 21st century skills. A flexible teachers' toolbox of drama strategies is offered and guidance on how to start using drama for learning with language students. Each strategy is presented in detail and used within the exemplar lessons. The authors refer to relevant educational, psychological and neurological theories and cite research that helps account for drama's efficacy in motivating talk and supporting second language acquisition, whilst developing important life skills such as communication, collaboration, critical

thinking, creativity and resilience.
