STEPHANIE LIU

Le Jacquard New York
: B. Franklin
In a world where

habitats are constantly changing and the impact of anthropization on the environment is increasingly intense, interactions between human and wildlife are becoming more and more complex. Some species pose problems for human activities while many others need to be helped in order to continue to exist. This book follows the first volume called 'Problematic Wildlife', edited by F.M. Angelici and published by Springer in 2016, which has had considerable success with readers and critics. The volume includes 21 chapters divided into 7 parts devoted specific topics which are approached in a multidisciplinary way. There are both review chapters and

specific cases, always bearing in mind the interest for an international audience. The book is useful both for scientists, wildlife specialists, conservationists, zoologists, ecologists, university students, nature managers, and for those who live in contact with wildlife and its problems, such as farmers, shepherds, hunters, urban planners, and staff of parks and nature reserves. Its ultimate goal is to offer scientific and pragmatic approaches to manage each categories of problematic species. *Current List of Medical Literature* University of Alabama Press
This substantial and ambitious dictionary explores the languages and cultures of visual

studies. It provides the basis for understanding the foundations and motivations of current theoretical and academic discourse, as well as the different forms of visual culture that have come to organize everyday life. Inter-American Yearbook on Human Rights / Anuario Interamericano de Derechos Humanos, Volume 32 (2016) Springer Nature
Reprint of the original, first published in 1870.
