According to author Dan

Gates, decisionology is the analysis, study, discussion, and exempling of the decisions that may determine the direction of your life. We put so much emphasis on the decisions and choices that high-school students are

making and will continue to make for the rest of their lives because these choices can potentially create or destroy a bright future. Decisionology is designed to be a simple and effective resource that can be used

whenever challenges or decisions arise. This guide does not provide the answers required in a given situation; rather, it explains the many different types of decisions that are available and the potential consequences that each may bring. Dan Gates' Book, *Decisionology*, should be mandatory reading for the parent as well as the child as it definitely emphasizes the consequences of one's decisions and more importantly it prepares the students and parents

for the decisions that are certainly coming and have to be met. Hon. Ed McLean, Sitting District Court Judge, Fourth Judicial District for Missoula and Mineral Counties in Montana *Decisionology* provides a plethora of real life examples which makes it relatable to an extremely large audience. It would be perfect for the entire family. Jessica L. Weinert Science Educator *Assessment and Access* Elsevier Health Sciences The Army personnel magazine.

Will it Fly? Oxford University Press

As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam, going about their business of training, advising, and assisting members of the Vietnamese Army.

Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is, in fact, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were

given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first time in its history. It is hoped that all the significant lessons learned have been recorded and

the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must take note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from

Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare—the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime.
