Problems, Problems, Problems . . . The world had been a paradise

until the Fall, when the holders of the control codes for the world-spanning program called "Mother" fell out in civil war. The United Free States felt well defended behind its screen of elite Dragon carriers that held sway in the Atlantis Ocean. But when New Destiny proved to have dragon carriers of its own, and more of them, the linch-pin of the UFS defense went out the window. Now, with the UFS' back to the wall, everything seems to be going New Destiny's way. But there are problems. Edmund Talbot had never really studied naval warfare, but what he didn't know about war in general hadn't been written. So when he took over the UFS navy, at its moment of utter defeat, New Destiny's problems were just starting. And little did the instigator of the civil war, Paul Boman, know that his closest confidante was the daughter of the UFS' head of intelligence. Megan Travante, for four years mired in a concubine's harem, has just been recruited to be an agent in the enemy camp. Of course, she's also planning on murdering Paul, just as soon as she gets a chance. Herzer Herrick, the UFS' premier ground fighter, has problems of his own. A man who's "good with his hands" he's also found he's good with a dragon. Which is why he's the XO of a dragon contingent instead of fighting in the front lines of the ground battle. With a crew of brand new pilots, undertrained dragons, untrained support personnel, the bitchiest dragon CO on Earth and a ship's commander who's half cat, he has enough problems for any one man. And then he gets an order that drops a whole passel more in his lap. The battle of dragon carrier on dragon carrier is about to start, with the fleets pursuing each other over half the Atlantis Ocean in a game of cat-and-mouse. But all the cats are on the side of the UFS. At the publisher's request, this title is sold without DRM (Digital Rights Management).

It's set in the 19th century fictional locale of Mercer, an Ohio River community that represents Pittsburgh, Pennsylvania. The novel tells the story of Frederica Payton, a "new woman" who illustrates the extremes of the feminist question. It was first published in installments in Harper's Monthly before its popularity warranted subsequent book-form publishing.

'Beautifully written, incredibly evocative with a real sense of place and of the sea. Heart-stoppingly tense' Catherine Cooper, Sunday Times bestselling author of THE CHALET 'Fiendishly clever' Sunday Times The new pulse-pounding thriller from the bestselling author of THE MEMORY WOOD. ***** HOW DID IT COME TO THIS? The news doesn't strike cleanly, like a guillotine's blade. Nothing so merciful. This news is a slovenly traveller, dragging its feet, gradually revealing its horrors. And it announces

itself first with violence - the urgent hammering of fists on the front door. Life can change in a heartbeat. Lucy has everything she could wish for: a beautiful home high on the clifftops, a devoted husband and two beloved children. Then one morning, time stops. Their family yacht is recovered, abandoned far out at sea. Lucy's husband is nowhere to be found and as the seconds tick by, she begins to wonder - what if he was the one who took the boat? And if so, where is he now? As a once-in-a-generation storm frustrates the rescue operation, Lucy pieces together what happened onboard. And then she makes a fresh discovery. One that plunges her into a living nightmare . . . Wherever her husband is, he isn't alone. Because their children are missing, too. ***** Praise for Sam Lloyd: 'Lloyd is a rare new thriller talent.' Please note: This is a companion version & not the original book. Sample Book Insights: #1 The Mississippi River is the largest river in the United States, and it flows through the heart of the country. It was the perfect task for the nineteenth century, as it required more than just confidence; it required hubris. #2 Eads was not treated kindly in life, but he did not accept reverses. He learned first-hand the differences between honest dealing and sharp practice, and how a piece of information could make a man a fortune if he had the sophistication to understand it and the guts to risk it all for it. #3 Eads had a passion for machinery and math. He built a six-foot-long working model of a steamboat complete with engines and boilers, a working model of a sawmill, and a working electrotype machine. He was 16 years old. #4 Eads was a young man who had an idea to salvage sunken cargo ships. He walked into the St. Louis offices of boatbuilders Calvin Case and William Nelson, and asked them to build a ship and several diving bells for him, for free. In payment, he would make them partners in the salvage business.

Surfers, sailors, and anyone who loves the ocean will enjoy this visual exploration of the world's seas along its shores, including rip tides, swells, waves, and tsunamis. Tide is the vertical motion of water, something so subtle it is impossible to see with the naked eye. Inspired by his travels around the world's coastline in a camper van with his young family, William Thomson captures the cycles of the sea's movement, and intersperses his adventures surfing the waves and charting the tides. Throughout *Tides and the Ocean* are his graphic renderings of unusual tidal maps, as well as other forms of water movement, including rip, rapids, swell, stream, tide, wave, whirlpool, and tsunami. *Tides and the Ocean* explains how the tides surge when the moon and sun align with the earth; how ocean streams alternate direction every six hours (which is invaluable information for kayakers, paddle boarders, and fishermen); why skyscraper-sized tsunamis occur frequently in an Alaskan Bay; and the most deadly beach orientation for rip currents. Also emphasized throughout is the importance of keeping the world's oceans healthy and full of life. Published in time for beach travel, this large-format hardcover is ideal for anyone who knows and loves the sea, and who wants to understand, discover, surf, or sail it better.

Three lives collide on an island off India: "An engrossing tale of caste and culture... introduces readers to a little-known world."—*Entertainment Weekly* Off the easternmost coast of India, in the Bay of Bengal, lies the immense labyrinth of tiny islands known as the Sundarbans. For settlers here, life is

extremely precarious. Attacks by tigers are common. Unrest and eviction are constant threats. At any moment, tidal floods may rise and surge over the land, leaving devastation in their wake. In this place of vengeful beauty, the lives of three people collide. Piya Roy is a marine biologist, of Indian descent but stubbornly American, in search of a rare, endangered river dolphin. Her journey begins with a disaster when she is thrown from a boat into crocodile-infested waters. Rescue comes in the form of a young, illiterate fisherman, Fokir. Although they have no language between them, they are powerfully drawn to each other, sharing an uncanny instinct for the ways of the sea. Piya engages Fokir to help with her research and finds a translator in Kanai Dutt, a businessman from Delhi whose idealistic aunt and uncle are longtime settlers in the Sundarbans. As the three launch into the elaborate backwaters, they are drawn unawares into the hidden undercurrents of this isolated world, where political turmoil exacts a personal toll as powerful as the ravaging tide. From the national bestselling author of *Gun Island*, *The Hungry Tide* was a winner of the Crossword Book Prize and a finalist for the Kiriya Prize. "A great swirl of political, social, and environmental issues, presented through a story that's full of romance, suspense, and poetry."—*The Washington Post* "Masterful."—*Publishers Weekly* (starred review)

NEW YORK TIMES BESTSELLER • "This is Jeff Shaara at his best, giving us another superb [and] historically grounded novel of one of the most dramatic struggles of World War II."—George McGovern Utilizing the voices of the conflict's most heroic figures, some immortal and some unknown, Jeff Shaara tells the story of America's pivotal role in World War II: fighting to hold back the Japanese conquest of the Pacific while standing side-by-side with her British ally, the last hope for turning the tide of the war against Germany. As British and American forces strike into the soft underbelly of Hitler's Fortress Europa, the new weapons of war come clearly into focus. In North Africa, tank battles unfold in a tapestry of dust and fire unlike any the world has ever seen. In Sicily, the Allies attack their enemy with a barely tested weapon: the paratrooper. As battles rage along the coasts of the Mediterranean, the momentum of the war begins to shift, setting the stage for the Battle of Normandy. The first book in a trilogy about the military conflict that defined the twentieth century, *The Rising Tide* is an unprecedented and intimate portrait of those who waged this astonishing global war.
