If a person were ever face-to-face with a huge, hungry animal with sharp teeth, they probably wouldn't care exactly what that animal was. From a safe location, can we tell whether it was a crocodile or alligator that wanted to take a bite? By examining their jaw structure, teeth, and other physical features, we can easily tell these two animals apart. Graphic organizers and amazing images highlight each animal's habitat and other small differences between the two fearsome creatures, showing readers just what creature is lurking below the waters.

The Truth About Bears Independently Published

Crocodiles are intelligent and social animals that communicate in many ways. A group of crocodiles in water is called a float, and a group on land is called a bask. They are masters at hiding in water and waiting for an unlucky animal to wander by. Readers discover many fun facts about what life is like in a group of crocodiles and see colorful, up-close photographs of the fierce reptiles in their natural habitat. Accessible text and a helpful graphic organizer allow readers to independently explore the fascinating lives of these amazing animals.

Alligator or Crocodile? Core Content Science -- Animal

Amazing Animals: Alligators: Multiplication: Read-along

ebook The Rosen Publishing Group, Inc

American alligators grow to more than twelve feet long, and may weigh more than half a ton. Yes, they are very strong. This picture

book describes in rhyming verse fun facts about the alligator, an amazing animal native to China and the United States of America. All pictures were taken at Chehaw Wild Animal Park in Albany, Georgia, by the author, Ritchey Marbury. Its jaw is very powerful when clamping down, but is weak when opening up and just one hand can hold it shut.
