NOTE: This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value for your students--this format costs 35% less than a new textbook. Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several

versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. xxxxxxxxxxxxxxxxxxxxxxx Natural Hazards uses real-life examples of hazards and disasters to explore how and why they happen--and what we can do to limit their effects. The text's up-to-date coverage of recent disasters brings a fresh perspective to the material. The Fourth Edition

provides a new active learning approach, a fully updated visual program and revised pedagogy tools that highlight hallmark concepts of the text. Students have access to an updated Hazard City , an online media resource which gives instructors meaningful, easy-to-assign, and easy-to-grade assignments in which students investigate virtual disasters in the fictional town of Hazard City. This program will provide an interactive and engaging learning experience for your students. Here's how: Provide a balanced approach to the study of natural hazards: Focus on

globalization of our economy, information access, and human effects on our planet in a broader, more balanced approach to the study of natural hazards. Engage your students with "Hazard City": Students work through 11 different assignments by stepping into the role of a practicing geologist and analyzing potential disasters in the fictional town of Hazard City. Enhance understanding and comprehension of natural hazards: Newly revised stories and case studies give students a behind the scenes glimpse into the lives of survivors, professionals and hazardous events. Strong pedagogy tools reinforce the text's core features: The new chapter structure and design organizes the material into three major sections to help students learn, digest, and review learning objectives.

Earth's Fury Prentice Hall

The disastrous effects of natural hazards such as earthquakes, floods, and hurricanes are often called OC Acts of God.OCO' Challenging that view, this work depicts natural hazards as extreme events in nature that are made even more dangerous by the acts or the neglect of people. Since the beginning of the 20th century, the toll on society resulting from such environmental episodes has changed significantly in several ways--while fatalities from major events have decreased, the number of reported events causing 100 or more deaths, as well as the extent of property damage, has risen

steadily. Providing a framework for examining these trends, this volume offers an understanding of how people around the world deal with fluctuations in the local natural systems of air, water, and terrain."

Natural Hazards Pearson Prentice Hall
 OUR PLANET IS A DYNAMIC PLACE There are numerous recent geological occurrences of life-changing events: earthquakes in Japan and the southwestern Pacific Ocean, the tsunami in South Asia, hurricanes in the Atlantic Ocean and typhoons in the Pacific, widespread flooding in the Midwest, as well as wildfires in California to name a few. Earth's Natural Hazards: Understanding Natural Disasters% Catastrophes will help students understand the geologic background of these life-changing events and the dynamic and sometimes interrelated nature, of the Earth's geologic processes. This book goes beyond the geologic aspect of the disasters and discusses the human impact, climate change, and biological hazards that often result from major life-changing events. Earth's Natural Hazards features: a full-color text with photos,

graphs, and maps to help illustrate the broad range of natural disasters that are discussed. Questions for Thought at the end of each chapter. several web sites that serve as additional resources. brief lists of selected references and reading material. a discussion of objects from outer space which provides information about hazards that are extraterrestrial.
