The March on Washington: Jobs, Freedom, and the Forgotten History of Civil Rights McGraw-Hill/Dushkin

This textbook is a practical and theoretical teacher guide on how to develop critical thinking and source criticism in contemporary elementary and secondary education, which requires students to develop their critical thinking from different perspectives as well as to develop their ability to critically evaluate sources they use for school-related work. What can a teacher do to support such development? The authors discuss several different perspectives on how one, as a teacher, can think about and work with source criticism together with the students. In the first part of the book a theoretical background and a principled discussion of critical thinking are discussed. This includes psychological and philosophical perspectives on source criticism. In the second part there are concrete teaching examples and tips on how to work with source criticism in both primary and secondary school.

The Chronicles examine the possibilities of an addition, not an amendment, to the American Constitution for establishing a freedom that could not have existed before the 21st century. The six values of the Preamble are studied as a basis for a new Article because its 52 words held too much wisdom to be random entities of Creation. The Chronicles of The Spring on the Hill are a modern

systems analysis of the U.S. Constitution on adding a "right." TL of 2014 looks at the domain [WB] operational set of a right and the very necessary Second Constitutional Convention for any human right.

Research indicates that of the pedagogies recognized as "high impact", learning communities - one approach to which, the linked course, is the subject of this book - lead to an increased level of student engagement in the freshman year that persists through the senior year, and improve retention. This book focuses on the learning community model that is the most flexible to implement in terms of scheduling, teacher collaboration, and design: the linked course. The faculty may teach independently or together, coordinating syllabi and assignments so that the classes complement each other, and often these courses are linked around a particular interdisciplinary theme. Creating a cohort that works together for two paired courses motivates students, while the course structure promotes integrative learning as students make connections between disciplines. This volume covers both "linked courses" in which faculty may work to coordinate syllabi and assignments, but teach most of their courses separately, as well as "paired courses" in which two or more courses are team taught in an integrated program in which faculty participate as learners as well as teachers. Part One, Linked Course Pedagogies, includes several case studies of specific linked courses, including a study skills course paired with a worldview course; a community college course that challenges students' compartmentalized thinking; and a paired course whose outcomes can be directly compared to parallel stand-alone courses. Part Two, Linked Course Programs, includes a description of several institutional programs representing a variety of linked course program models. Each chapter includes information about program implementation, staffing logistics and concerns, curriculum development, pedagogical strategies, and faculty development. Part Three, Assessing Linked Courses, highlights the role of assessment in supporting, maintaining, and improving linked course programs by sharing assessment models and describing how faculty and administrators have used particular assessment practices in order to improve their linked course programs.

Interpreting Native American History and Culture at Museums and Historic Sites features ideas and suggested best practices for the staff and board of museums that care for collections of Native material culture, and who work with Native American culture, history, and communities. This resource gives museum and history professionals benchmarks to help shape conversations and policies designed to improve relations with Native communities represented in the museum. The book includes case studies from museums that are purposefully working to incorporate Native people and perspectives into all aspects of their work. The case study authors share experiences, hoping to inspire other museum staff to reach out to tribes to develop or improve their own interpretative processes. Examples from tribal and non-tribal museums, and partnerships between tribes and museums are explored as models for creating deep and long lasting partnerships between museums and the tribal communities they represent. The case studies represent museums of different sizes, different missions, and located in different regions of the country in an effort to address the unique history of each location. By doing so, it inspires action among museums to invite Native people to share in the interpretive process, or to take existing relationships further by sharing authority with museum staff and board.

"Taking Sides is more than a book; it's a politic aimed at the heart of every radical struggling against a racist state." —Luis A. Fernandez, author of *Policing Dissent* Taking Sides is a critical response to divisive debates within current movements against police violence and white supremacy, especially since Michael Brown's murder. These sharp interventions ask activists to avoid easy—and safe—answers and take on the hard work of building real grassroots solidarity across racial lines. Cindy Milstein is author of *Anarchism and Its Aspirations*. Her essays appeared in *Realizing the Impossible*, *Confronting Capitalism*, and *Globalize Liberation*.

A #1 NEW YORK TIMES BESTSELLER! Human beings have never had it better than we have it now in the West. So why are we on the verge of throwing it all away? In 2016, New York Times bestselling author Ben Shapiro spoke at the University of California-Berkeley. Hundreds of police officers were required to protect his speech. What was so frightening about Shapiro? He came to argue that Western civilization is in the midst of a crisis of purpose and ideas; that we have let grievances replace our sense of community and political expediency limit our individual rights; that we are teaching our kids that their emotions matter more than rational debate; and that the only meaning in life is arbitrary and subjective. As a society, we are forgetting that almost everything great that has ever happened in history happened because of people who believed in both Judeo-Christian values and in the Greek-born power of reason. In *The Right Side of History*, Shapiro sprints through more than 3,500 years, dozens of philosophers, and the thicket of modern politics to show how our freedoms are built upon the twin notions that every human being is made in God's image and that human beings were created with reason capable of exploring God's world. We can thank these values for the birth of science, the dream of progress, human rights, prosperity, peace, and artistic beauty. Jerusalem and Athens built America, ended slavery, defeated the Nazis and the Communists, lifted billions from poverty, and gave billions more spiritual purpose. Yet we are in the process of abandoning Judeo-Christian values and Greek natural law, watching our civilization collapse into age-old tribalism, individualistic hedonism, and moral subjectivism. We believe we can satisfy

ourselves with intersectionality, scientific materialism, progressive politics, authoritarian governance, or nationalistic solidarity. We can't. The West is special, and in *The Right Side of History*, Ben Shapiro bravely explains how we have lost sight of the moral purpose that drives each of us to be better, the sacred duty to work together for the greater good.,

"In this memoir of his political becoming, Philip Green, my oldest friend, says of grade school harassment incidents, 'my best guess is that then and ever after I wore my heart too much on my sleeve, blurted out uncool thoughts and feelings about personal life and personhood.' In *Taking Sides*, he continues to do that. Phil's account, unfiltered and sometimes unnerving, exploits his uncanny recall of the texture (books, movies, music) of the postwar Northeastern left milieu and evokes a lost oppositional culture; and of himself in that setting, taking sides." Norman Rush, author of *Subtle Bodies*, *Mating*, and *Mortals*.

Taking Sides Houghton Mifflin Harcourt

Madness in Experience and History brings together experience and history to show their impact on madness or mental illness. Drawing on the writings of two twentieth-century French philosophers, Maurice Merleau-Ponty and Michel Foucault, the author pairs a phenomenological approach with an archaeological approach to present a new perspective on mental illness as an experience that arises out of common behavioral patterns and shared historical structures. Many today feel frustrated with the medical model because of its deficiencies in explaining mental illness. In response, the author argues that we must integrate human experiences of mental disorders with the history of mental disorders to have a full account of mental health and to make possible a more holistic care. Scholars in the humanities and mental health practitioners will appreciate how such an analysis not only offers a greater understanding of mental health, but also a fresh take on discovering value in diverse human experiences.
