Saulo Ribeiro—six-time Brazilian Jiu-Jitsu World Champion—is world-renowned for his functional jiu-jitsu knowledge and flawless technique. In *Jiu-Jitsu University*, Ribeiro shares with the public for the first time his revolutionary system of grappling, mapping out more than 200 techniques that carry you from white to black belt. Illuminating common Jiu-Jitsu errors and then illustrating practical remedies, this book is a must for all who train in Jiu-Jitsu. Not your run-of-the-mill technique book, *Jiu-Jitsu University* is a detailed training manual that will ultimately change the way Jiu-Jitsu is taught around the globe.

2. überarbeitete Auflage (Erstausgabe 2016) »Combatives« ist eine auf Anwendbarkeit ausgerichtete Methode der Selbstbehauptung und Selbstverteidigung in einem sehr umfassenden Sinn, die auch unter Stress funktioniert. Hier geht es nicht um Rituale oder Philosophien, sondern sie ist einzig dem Ziel »optimaler Selbstschutz binnen kürzester Zeit« verpflichtet. Viele Prinzipien der Combatives gelten nicht nur für den Zivilbereich, sondern sind auch Bestandteil der Vorgehensweisen vieler Spezialeinheiten. Mitautor Patrick Türl als ehemaliger Angehöriger einer polizeilichen Sondereinheit zeigt Gemeinsamkeiten und Unterschiede zwischen ziviler und behördlicher Anwendung auf und greift dabei auf persönliche Erfahrungen zurück.

New release on the significance of assessment in a student-centered learning culture *Flipped Assessment* presents formative assessment as the most important factor in a student-centered learning culture. The book is built on practical experience and strong theoretical foundations. The story of the author developing her assessment practices offers guidance for readers who want to develop their own assessment practices and learning culture. The book also describes how assessment is used to support the students' self-regulation and to help them to reach their own, individual goals. At its best, assessment supports the learning of the whole community.

From reality television to film, performance, and video art, autobiography is everywhere in today's image-obsessed age. With contributions by both artists and scholars, *Embodied Politics in Visual Autobiography* is a unique examination of visual autobiography's involvement in the global cultural politics of health, disability, and the body. This provocative collection looks at images of selfhood and embodiment in a variety of media and with a particular focus on bodily identities and practices that

challenge the norm: a pregnant man in cyberspace, a fat activist performance troupe, indigenous artists intervening in museums, transnational selves who connect disability to war, and many more. The chapters in *Embodied Politics in Visual Autobiography* reflect several different theoretical approaches but share a common concern with the ways in which visual culture can generate resistance, critique, and creative interventions. With contributions that investigate digital media, installation art, graphic memoir, performance, film, reality television, photography, and video art, the collection offers a wide-ranging critical account of what is clearly becoming one of the most important issues in contemporary culture.

At times thoughtful and other times scathing, this short but compact book is a must-read for those wanting to know "why does this keep happening?" when it comes to police brutality and national police practices. *Busted! Police and Public Safety Ethical Decision Making* is based on the 35+ year career of police and public safety psychologist, Dr. Stephen Curran, whose mantra is "there is no right way to do a wrong thing." Dr. Curran draws from relevant and modern ethical case studies including the likes of the 2013 Wells Fargo scandal and the abusive Baltimore Police Gun Trace Task Force to highlight the importance of modern ethical decision making and the lack of ethical decisions being made nationally. The reader is empowered with new vocabulary, like the importance of pre-employment psychological screenings, fitness for duty evaluations (FFDE), mental health resources, and the inside workings of public safety psychological practices. His self-published book is a timely read and harkens to Upton Sinclair's *The Jungle* - Dr. Curran's goal is to educate and inform

the reader so they can be a catalyst for public safety reform. CHAPTERS

On 6 July 2005, the world held a collective intake of breath as IOC president Jacques Rogge declared: 'The games of the 30th Olympiad in 2012 are awarded to the city of ... London.' Despite the images of jubilant crowds in the streets of Britain's capital, there were some, like Lance Forman, for whom those words spelled only dread and uncertainty. His 100-year-old, fourth-generation family business, H. Forman & Son, was facing eviction to make way for the Olympic Stadium, and teetered on the brink of collapse. A full, unexpurgated account of his fight to keep the firm alive, *Forman's Games* lifts the lid on the fierce battle that pitched Forman's, the country's finest purveyor of smoked salmon, against the combined might of the UK authorities and the

IOC in the run-up to the 2012 London Olympics. It is a story of skulduggery and bullying mounted against 350 local businesses, employing over 12,000 people, who stood in the way not just of the world's most famous sporting event, but of an opportunity to develop the land on which they had successfully run businesses over decades.

In tennis, is it true that beginning to serve in a set gives an advantage? Can the outcome of a match be predicted? Which points are important, and do real champions win the big points? Do players serve optimally? Does 'winning mood' exist? The book answers such questions, demonstrating the power and beauty of statistical reasoning.

In this first synthetic, comprehensive survey of Japanese sports in English, the authors are attentive to the complex and fascinating interaction of traditional and modern elements. In the course of tracing the emergence and development of sumo, the martial arts, and other traditional sports from their origins to the present, they demonstrate that some cherished "ancient" traditions were, in fact, invented less than a century ago. They also register their skepticism about the use of the samurai tradition to explain Japan's success in sports. Special attention is given to Meiji-era Japan's frequently ambivalent adoption and adaptation of European and American sports--a particularly telling example of Japan's love-hate relationship with the West. The book goes on to describe the history of physical education in the school system, the emergence of amateur and professional leagues, the involvement of business and the media in sports promotion, and Japan's participation in the Olympics. The majority of research on human perception and action examines sensors and effectors in relative isolation. What is less often considered in these research domains is that humans interact with a perceived world in which they themselves are part of the perceptual representation, as are the positions and actions (potential or ongoing) of other acti
