Books for Young Readers

Time was when London was a great city. People from all over the world flocked to live here. They came from every part of the country. They came from Europe. From Africa. From Asia. They came from the far corners of the world. By boat and plane. In cars and on foot. They took jobs, found love, brought their kids up.

They lived in safety. Most of them. They made the city great. Made it a beacon of light in a new world. Time was when, in summer, you could walk through the streets and smell a thousand smells, taste the food on the air. When you could see the smiles and the happiness on the faces of the people who made their lives here. You could go wherever you wanted. Do whatever you liked. It was a great city. A magnet. A symbol. The thing about time is, it ticks and it tocks, and before you know it there isn't as much left as you thought. The

seconds pass, the minutes and the hours. Days become weeks and years rush past like water flowing down a mountainside, towards the sea. Change comes. Change came. The kind of change no one wants, except for a few. Bad things made themselves a part of our world, and London wasn't great anymore. It wasn't anything except a memory. And they don't like memories here these days. When summer rolls up, when the sun shines on the city, the only thing you smell is decay. The only place you can go is your own Grid. The only thing you can think is how hungry you are and what's going to happen to your family if you can't find enough food to feed them. So sometimes, when I haven't got much left, I just find a dark little corner somewhere. There's enough

of them these days. And I sit there. Sit with my eyes tight shut. And I think about what we had. Take myself back there. Go and live in another place. The place I knew. The place I loved. And after a while, something brings me back. A sound, usually. I open my eyes, slowly. Open them and hope. Hope that I've remembered the past so well that it's returned. But it never has. And the clock keeps ticking. London is dead. A new London lives. A city ruled by John Bull, the king of London and the Protector of Free Men. What you knew is no more. The familiar is strange and the creeping threat of John Bull's grip hangs over all who live within the boundaries of his power. The Centre. The Grids. His dominion. His city. His words wrapping themselves around you, as he invites

you to join him in the resurrection of the metropolis, as he gives you no choice but to follow his orders. Orders delivered through the tentacles of control that reach out across the broken boroughs and crumbling streets of this once great city. Stampers. Threadneedles. Black Cabs. The Cult of the Grids. His tools of control. Four young friends - Hector, Cesar, Kemi and Molly - trying to find their way as best they can in a Grid they have no choice but to call home. Their lives shaped beneath the hard, worn boot of John Bull's rule. Shaped in the shadowed eyes of the Stampers. In a city where Brocks hide in plain sight, waiting to whisper your secrets to the enemy. In this city, silence is the path to safety. But the voice of youth can only be denied for so long. And the words of love

demand to be said. All that is solid yields to ash. And yet, that which cannot crumble soldiers on. Hope, love, justice. Hector, Cesar, Kemi and Molly must make their choices. They must decide whose side they are on. And they must choose whether to kneel at the feet of John Bull, or whether to fight for a city that is free. The London Trilogy follows the story of four young friends as their lives spiral out of control in John Bull's London. A city you thought you knew, ruled by a man who knows you better than you know yourself. The Centre is waiting for you. The Grids are waiting for you. John Bull is waiting for you. And he knows you will have to pick a side ...

NATIONAL BESTSELLER • A blackly comic late 20th-century murder mystery set against the looming end of the millennium, in which a woman tries to orchestrate her own extinction—from "one of the most gifted novelists of his generation" (TIME). "Lyrical and obscene, colloquial and rhapsodic." —The New York Times First published in 1989, *London Fields* is set ten years into a dark future, against a backdrop of environmental and social decay and the looming threat of global cataclysm. As the dreaded Y2K approaches, Nicola Six, a "black hole" of sex and self-loathing, has chosen her thirty-fifth birthday, November 5, 1999, as the date of her own murder. Whom to manipulate into killing her is the question; her choice

wavers between violent lowlife Keith Talent, who is obsessed with winning a darts tournament, and a dimly romantic banker named Guy Clinch. When Samson Young—a writer suffering from a long bout of writer's block—stumbles upon these three, he believes he has found a story that will write itself. A highly unusual mystery with an unexpected twist at the end, *London Fields* is also a corrosively funny narrative of pyrotechnic complexity and scalding moral vision.

*The Lonely Londoners* Yale University Press

Through the lives and adventures of his colourful cast of characters he brings all the richness of London's past unforgettably to life.

Excerpt from *Curiosities of London Life, or Phases, Physiological and Social, of the Great Metropolis* In something

resembling at least a literary garb. It is true there was no other necessity for this than the necessity, perhaps, of my, own vanity or capricious fancy - but which was so far imperative, that had I not written in this way, I should not have written at all. The reader may, however, rely upon the truth of the details he will here peruse. The only fictions are those harmless and transparent ones in which the writer has chosen sometimes, for obvious reasons, to involve both himself and some designations of persons and places which it would not have been prudent to call by their real names. The several characters on his canvas are all studies from the life, and the backgrounds in which they figure may be verified at any hour by the dweller in London. In some few cases, where per-

sonal narratives are given, they are in substance the actual experience of the personages to whom they are attributed - with the exception of one or two, the living prototypes of which only supplied a general outline, which it was left to imagination to fill up. George Orwell's vivid memoir of his time living among the desperately poor and destitute, *Down and Out in Paris and London* is a moving tour of the underworld of society. Written when Orwell was a struggling writer in his twenties, it documents his 'first contact with poverty'. Here, he painstakingly documents a world of unrelenting drudgery and squalor - sleeping in bug-infested hostels and doss houses of last resort, working as a dishwasher in Paris's vile 'Hôtel X', surviving on scraps and

cigarette butts, living alongside tramps, a star-gazing pavement artist and a starving Russian ex-army captain. Exposing a shocking, previously-hidden world to his readers, Orwell gave a human face to the statistics of poverty for the first time - and in doing so, found his voice as a writer.

From USA Today bestselling author Jennifer Robson—author of *Moonlight Over Paris* and *Somewhere in France*—comes a lush historical novel that tells the fascinating story of Ruby Sutton, an ambitious American journalist who moves to London in 1940 to report on the Second World War, and to start a new life an ocean away from her past. In the summer of 1940, ambitious young American journalist Ruby Sutton gets her

big break: the chance to report on the European war as a staff writer for Picture Weekly newsmagazine in London. She jumps at the chance, for it's an opportunity not only to prove herself, but also to start fresh in a city and country that know nothing of her humble origins. But life in besieged Britain tests Ruby in ways she never imagined. Although most of Ruby's new colleagues welcome her, a few resent her presence, not only as an American but also as a woman. She is just beginning to find her feet, to feel at home in a country that is so familiar yet so foreign, when the bombs begin to fall. As the nightly horror of the Blitz stretches unbroken into weeks and months, Ruby must set aside her determination to remain an objective observer. When she loses everything but

her life, and must depend upon the kindness of strangers, she learns for the first time the depth and measure of true friendship—and what it is to love a man who is burdened by secrets that aren't his to share. Goodnight from London, inspired in part by the wartime experiences of the author's own grandmother, is a captivating, heartfelt, and historically immersive story that readers are sure to embrace.

"A book about modernist architect Mies van der Rohe's only design for the UK, a bronze tower and grand plaza in the

heart of London. After decades of struggle, Mies' plans for Mansion House Square were scuppered. In Thatcher's Britain, popular opinion turned against modernism, Prince Charles criticised the work, and the government feared new public spaces. Stopped dead by an Inquiry, and mired in controversy, Mies' masterpiece was all but erased"--

An enthralling review of an exhilarating era, Dr. Johnson's London brilliantly records the strangeness and individuality of the past--and continually reminds us of parallels with the present day. The practical realities of everyday life are rarely described in history books. To remedy this, and to satisfy her own curiosity about the lives of our

ancestors, Liza Picard immersed herself in contemporary sources - diaries and journals, almanacs and newspapers, government papers and reports, advice books and memoirs - to examine the substance of life in mid-18th century London. The fascinating result of her research, Dr. Johnson's London introduces the reader to every facet of that period: from houses and gardens to transport and traffic; from occupations and work to pleasure and amusements; from health and medicine to sex, food, and fashion. Stops along the way focus on education, etiquette, public executions as popular entertainment, and a melange of other historical curiosities. This book spans the period from 1740 to 1770--very much the city of Dr. Samuel Johnson, who published his

great Dictionary in 1755. It starts when the gin craze was gaining ground and ends just before America ceased being a colony.

The most popular source of theological hope for American Christians is that of Jurgen Moltmann. Preachers, teachers, and lay people reflect Moltmann's influence, with their hope in a this-worldly eschatology and a suffering God. However, an exclusive reliance on that hope deprives the church of crucial resources in the face of global economic, environmental, and military crises. This book explores Moltmannian hope and

considers its costs before looking elsewhere for additional contributions, from Thomas Aquinas's theological virtue of hope to nihilism and beyond, in order to encourage the church to sustain and practice hope in Jesus Christ, our only hope.

In Victorian London, filth was everywhere: horse traffic filled the streets with dung, household rubbish went uncollected, cesspools brimmed with "night soil," graveyards teemed with rotting corpses, the air itself was choked with smoke. In this intimately visceral book, Lee Jackson guides us through the underbelly of the Victorian metropolis, introducing us to the men and women who struggled to stem a

rising tide of pollution and dirt, and the forces that opposed them. Through thematic chapters, Jackson describes how Victorian reformers met with both triumph and disaster. Full of individual stories and overlooked details--from the dustmen who grew rich from recycling,

to the peculiar history of the public toilet--this riveting book gives us a fresh insight into the minutiae of daily life and the wider challenges posed by the unprecedented growth of the Victorian capital.
