## BRAUN HARRELL

### Strategic Retail Management and Brand Management

Walter de Gruyter GmbH & Co KG

This important book proposes a new account of the nature of language, founded upon an original interpretation of Wittgenstein. The authors deny the existence of a direct referential relationship between words and things. Rather, the link between language and world is a two-stage one, in which meaning is used and in which a natural language should be understood as fundamentally a collection of socially devised and maintained practices. Arguing against the philosophical mainstream descending from Frege and Russell to Quine, Davidson, Dummett, McDowell, Evans, Putnam, Kripke and others, the authors demonstrate that discarding the notion of reference does not entail relativism or semantic nihilism. A provocative re-examination of the interrelations of language and social practice, this book will interest not only

philosophers of language but also linguists, psycholinguists, students of communication and all those concerned with the nature and acquisition of human linguistic capacities.

### Soft Power and US Foreign Policy

Walter de Gruyter GmbH & Co KG  
The retail industry and associated business models have gone through a significant phase of disruption. The rapid emergence of new technologies, digital business models and the evolution of social media platforms as a new sales channel continue to influence the sector. Key contextual or external trends will affect and shape the retail landscape in the years to come. Therefore, it seems important to prepare for this situation and be ready with a head start in terms of knowledge. This textbook provides its readers basic knowledge about the national and international retail sector and gives important insights into trends and developments. It deals with key trends, in particular new patterns of personal consumption, evolving geopolitical dynamics, technological advancements and structural industry shifts.

Moreover, it explains why it is so important that retailers use these trends, adapt their retail strategies and tactics, create strong brands and come up with innovative, new ways of doing business. Today we are living in a challenging time for retail. This textbook tries to give insights and explanations to better understand these challenges and provide managerial implications.

### Translation Research and Interpreting

Routledge  
This volume deals with Translation Research (TR) and Interpreting Research (IR). In the main contribution, Daniel Gile from the Université Lumière Lyon 2 (France) explores kinship, differences and prospects for partnership between the two. He gives an overview of the history of research into translation and interpreting, explores commonalities and reviews differences between translation and interpreting, and discusses implications for research. He comments critically on the foci and paradigms in both TR and IR and on the epistemological and methodological problems they raise. He concludes

by saying that Translation and Interpreting Studies are gaining both social cohesion and some weight as an academic identity. The contributions by Jan Cambridge, Andrew Chesterman, Janet Fraser, Yves Gambier, Moira Inghilleri, Zuzana Jettmarová, Ian Mason, Mariana Orozco, Franz Pöchhacker and Miriam Shlesinger focus on translator and interpreter behaviour, research methodology, types of research, disciplinary autonomy and interdisciplinarity, theory and practice, research training, and institutional constraints. There is general agreement that in view of commonalities and differences between translation and interpreting, each step in the investigation of one can contribute valuable input towards investigation of the other.

### **Reshaping the**

**European Union** Walter de Gruyter GmbH & Co KG Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and

consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

This book details the difference between the two rating industries, but this difference is converging all the time. The concept of investing in a more responsible and sustainable manner is drawing in some of the

world's leading investors and, with it, regulations and policies are developing at the highest levels. However, the market is not getting what it needs to fully submit to the concept of responsible investing. It has called for more to be done from those tasked with injecting information into their processes, and two industries in particular have been identified as being natural partners. It has been suggested that they are on a collision course to serve the mainstream investor, and in this book, that collision course is contextualised, explained, presented, and finally its outcome predicted.

### Recommendation on Social Protection Floors

Beck/Hart/Nomos

Wir verstehen unsere Gesellschaft als wissen(schaft)sbasiert.

Doch neuere Wissenschaftstheorien hinterfragen den Wahrheitsanspruch und damit die traditionelle Legitimation wissenschaftlicher Aussagen durch den Verweis auf die Abhängigkeit jeder Wissensproduktion von kulturell und historisch spezifischen epistemologischen, institutionellen,

politischen und ökonomischen Machtverhältnissen, im globalen Kontext wächst der Unmut über die hegemoniale Macht westlicher technologischer Denknormen auf Kosten nicht-westlicher Wissensbestände und Praktiken. Andererseits beruhen weitreichende politische Entscheidungen zunehmend auf Expertenwissen, zum Beispiel in der Klima- und Energiepolitik. Vor diesem Hintergrund reflektieren elf Beiträge aus den Geistes-, Sozial- und Kulturwissenschaften über das Verhältnis von Wissen und Wissenschaft, über disziplinäre Bedingungen der Wissensproduktion und -legitimierung und über theoretische Ansätze in der Philosophie und Soziologie sowie praktische Modelle der partizipativen Wissensgenerierung in der Politikberatung, um neue Formen der Legitimierung zu prüfen. Das Buch schlägt eine tiefgreifende Reform der EU vor. Defekte der EU werden identifiziert. Die Vorschläge basieren auf den Konzepten begrenzter Supranationalität und einer ausgewogenen Sicht des Nationalstaats. Die EU wird vor allem gebraucht für Frieden, Wohlstand, Kompensation der relativ geringen Größe und begrenzten Macht ihrer Mitgliedstaaten und zur Bewahrung grundlegender Prinzipien der westlichen Zivilisation. Eine ausgewogene Sicht des Nationalstaats bedeutet Erhaltung der Vorteile des gut gestalteten Nationalstaats im Vergleich zur EU sowie Vermeidung von Nationalismus und Krieg. Das Buch schlägt u.a. eine Neugestaltung der EU-Rechtsetzung und der EU-Verträge, eine untergeordnete Rolle der Europäischen Kommission, einen Court of Appeal und eine geänderte Zusammensetzung der Europäischen Zentralbank

vor. Möglichkeiten des Überlebens der Eurozone werden diskutiert. Bei praktischer Realisierung dieser Vorschläge könnte sich die EU zukünftig in einem besseren Zustand befinden.

Der Großkommentar zum AktG bietet die umfassendste und vollständigste Darstellung des geltenden Aktienrechts, die in deutscher Sprache erhältlich ist. Sein hohes Ansehen beruht vor allem auf einer wissenschaftlich fundierten und zugleich praxisorientierten Kommentierung, was nicht zuletzt dadurch gewährleistet wird, dass auch für die 4. Auflage hervorragende und namhafte Herausgeber und Autoren aus Praxis und Wissenschaft gewonnen werden konnten. Die Kommentierung verfolgt

nicht nur das Ziel, gleichzeitig den Ansprüchen der Wissenschaft, den breit gefächerten Bedürfnissen der Praxis und den besonderen Wünschen der Gerichte an Informationen und kritischer Aufbereitung zu entsprechen. Der Benutzer soll auch zu abgelegenen Spezialfragen fündig werden, die in keinem anderen Werk behandelt werden. Auch wird der Blick durchweg auf Europa gerichtet, denn die Einflüsse der Europäischen Union auf das Aktien- und Kapitalmarktrecht sind immer häufiger spürbar und werden künftig noch deutlich zunehmen. Diese Zielsetzungen bedingen es, dass die Kommentierung nicht durchgehend auf einem Stand ist. Solange die 4. Auflage noch nicht ganz abgeschlossen ist, bietet der Verlag den Nutzern deshalb als besonderen Dienst die Möglichkeit, ein vorläufiges, jeweils alle schon erschienen Lieferungen umfassendes GESAMTREGISTER an dieser Stelle abzufragen und herunterzuladen. So ist es möglich, den gesamten Bestand des Großkommentars schnell und einfach zu

erschließen.

Over 200 previously unpublished photographs document the building and development of the many check points, barbed wire barriers, and alarmed fences which formed the concrete wall around Berlin. This book tells dramatic tales of spectacular escapes and terrible deaths, and explains the history making events surrounding the building and fall of the Wall. Contemporary photographs are contrasted with photographs from the eighties to offer surprising insights into how the former death strip has changed since 1990. Relics of the wall in the current cityscape are prominently illustrated, including remnants of the Wall itself, expanded metal lattice fences, observation towers, barbed wire and concrete posts. Also included are statistics showing the numbers of refugees and victims of the Wall, a guide to the museums and memorials and a summary of the literature and cinema treatment of

the Wall, along with a brief chronicle of its history.

Despite the international community's recognition of social protection as a human right, the vast majority of the world's population still has no access to social protection. In a major effort to address this situation, the International Labour Conference unanimously adopted the Social Protection Floors Recommendation 202 of 2012. However, because of the wide variety of possible schemes (and techniques that can be employed to administer them), there is a genuine risk that important values relating to social protection will be overlooked in implementing the Recommendation. This collection of expert essays contains an in-depth clarification and analysis of the Recommendation and sets forth a clear and practicable set of principles that can be used both as a policy tool and as an assessment framework for the creation, maintenance, and supervision of a

national social protection floor. This book pays detailed attention to each of the Recommendation's key principles, including the following: - state responsibility; - universality of protection; - entitlement based in law; - adequacy and predictability of benefits; - non-discrimination; - financial solidarity; - good governance; - coherence of policies; and - social participation. A special feature of the book is its inclusion of case studies that display innovative social protection schemes focusing on children and families, persons of working age (particularly informal sector workers), and elderly persons. A concluding section offers useful insights on measures that can be taken and lessons learned. As a deeply informed and practical guide to ways in which states can (and do) establish and maintain a social protection floor as a fundamental element of their national social protection systems, this book has no peers. It will be warmly welcomed by jurists concerned with social protection throughout the world, by pertinent government agencies at all levels, by non-governmental

organizations, and by academics in the field.
