International Financial Statistics, September 2014

International Monetary Fund
Crime in the United States contains findings from the Federal Bureau of Investigation (FBI) of the offenses, known to law enforcement, released annually from its Uniform Crime Reporting Program. Because the FBI no longer prints these findings, Bernan

Press continues to provide this practical information in convenient book form. In this intricately detailed source, legal and law enforcement professionals, researchers, and those who are just curious will find violent and property crime statistics for the nation as a whole—and for regions, states, counties, cities, towns, and even college and university campuses. Crime in the United States includes statistics for: • violent and property crimes • hate crimes • crime trends • victims, by type • crimes cleared (those closed by arrest or other

means) • persons arrested (age, sex, and race) • juvenile offenders • law enforcement personnel (including the number of sworn officers killed or assaulted) • characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding homicides) In addition to data, Crime in the United States also includes text and pertinent figures that explain the data in greater detail and supplies a visual perspective of these major offenses. Violent crimes include: • murder and non-negligent manslaughter • forcible rape • robbery • aggravated assault Property crimes include: • burglary • larceny-theft • motor vehicle theft • arson Hate crimes include any crime motivated by bias

against: • race • religion • sexual orientation • ethnicity/national origin • and/or disability Data include the following: offense type, location, bias motivation, victim type, number of individual victims, number of offenders, and the race of the offenders. Interesting facts found in Crime in the United States include: The rate of violent crime decreased 21.9 percent between 2002 and 2011. Robberies declined the most of any offense, falling 22.2 percent. The FBI estimated that 12,408,899 arrests were made in 2011. Of these arrests, 4.3 percent were for violent crimes. Law enforcement agencies reported 6,222 hate crime incidents involving 7,254 offenses in 2011. In 2011, slightly more hate crimes were committed on the basis of sexual orientation (1,293) than

on a religion basis (1,233). Men accounted for 88.2 percent of all full-time sworn law enforcement officers in 2011. In 2011, the estimated number of forcible rapes (83,425)—the lowest figure in 22 years—decreased 2.5 percent from the 2010 estimate. The average dollar value of property taken during burglaries was \$2,185; during robberies, \$1,153; and during larceny thefts, \$988.

The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international

investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

General Alumni Catalogue of New York University, 1916 Bloomsbury Publishing

In the global era, controversies abound over temporary labour migration; however, it has not previously been subjected to a sustained socio-legal analysis on a comparative basis, critiquing the underpinning concepts conventionally accepted as fundamental in this area. This collection of essays aims to fill that void. Complex regulatory challenges arise from temporary labour migration. This collection examines these challenges and the extent to which

temporary labour migration programmes can be ethical, equitable and efficacious and so deliver decent work for workers. Whilst the tendency for migration law to divide labour law's worker-protective mission has been observed before, the authors of the chapters comprising this collection seek not only to interrogate why and how this is so, but to go further in examining the implications and effects of a wide range of regulatory mechanisms on temporary labour migration.

The perfect book for every Mississippian who cares about the state, this is a mammoth collaboration in which thirty subject editors suggested topics, over seven hundred scholars wrote entries, and countless individuals made suggestions. The volume will appeal to

anyone who wants to know more about Mississippi and the people who call it home. The book will be especially helpful to students, teachers, and scholars researching, writing about, or otherwise discovering the state, past and present. The volume contains entries on every county, every governor, and numerous musicians, writers, artists, and activists. Each entry provides an authoritative but accessible introduction to the topic discussed. The Mississippi Encyclopedia also features long essays on agriculture, archaeology, the civil rights movement, the Civil War, drama, education, the environment, ethnicity, fiction, folklife, foodways, geography, industry and industrial workers, law, medicine, music, myths and representations, Native Americans, nonfiction, poetry, politics

and government, the press, religion, social and economic history, sports, and visual art. It includes solid, clear information in a single volume, offering with clarity and scholarship a breadth of topics unavailable anywhere else. This book also includes many surprises readers can only find by browsing.

International Financial Statistics, April 2015 International Monetary Fund This monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African

Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.

DIVDIVThe astounding third offering in Durrell's Alexandria Quartet, a richly detailed and extraordinary expansion of the events of Justine and Balthazar/divDIV /divDIVDavid

Mountolive is a British diplomat who views love as just another everyday transaction. But as romance turns to betrayal and secret alliances are exposed, Mountolive's affair will bring the true complexity of contemporary love to the forefront amid the swirling political climate of Alexandria.

Continuing to push beyond the limits of the traditional novel, Lawrence Durrell maintains his unwavering focus in *Mountolive*. He recasts the romantic affairs and liaisons he so skillfully established in *Justine* and *Balthazar* through the eyes of the young Mountolive, building toward the series' stunning conclusion.

This ebook contains a new introduction by Jan Morris.

Mountolive International Monetary Fund

Small Batch details the history and changing social implication of artisanal foods, from the days of early American settlers to the present explosion of small-batch and artisanal food businesses. Interviewing over fifty artisanal producers, Cope details the influences, challenges, and evolving identity of these modern craft industries.

Mount Olive Township, located in
northwest Morris County, is comprised of
two diverse communities: Flanders and
Budd Lake. Flanders is a quiet, pastoral
village settled in 1750, with the Flanders
Methodist Church as its center. Budd
Lake's most dominant feature is the
largest natural lake in New Jersey. Both
communities were farming, mining, and
milling areas, and Budd Lake was also a
bustling summer resort area from the
mid-nineteenth into the twentieth
century. As the township celebrates its
130th anniversary, Mount Olive brings
together the history of these two

different communities. Photographs in
this collection include those of the
gristmills and farms, the neighborhoods
surrounding them, and the resort areas
around the lake. The book beautifully
portrays an era and a way of life long
past. Mount Olive begins with the
township's earliest days and includes the
recollections of longtime residents and a
newcomer's delight.
