Literary culture has become a form of

popular culture over the last fifteen years thanks to the success of televised book clubs, film adaptations, big-box book stores, online bookselling, and face-to-face and online book groups. This volume offers the first critical analysis of mass reading events and the contemporary meanings of reading in the UK, USA, and Canada based on original interviews and surveys with readers and event organizers. The resurgence of book groups has inspired new cultural formations of what the authors call "shared reading." They interrogate the enduring attraction of an old technology for readers, community organizers, and government agencies, exploring the social practices inspired by the sharing of books in public spaces and revealing the complex ideological investments made by readers, cultural workers, institutions, and the mass media in the meanings of reading.

Emma had the perfect trifecta: a long-term job as an engineer designing sewers; a steady relationship with her reliable boyfriend; and an adoring and creative best friend (about whom she wasn't quite

ready to admit her unrequited feelings). Then early one morning, a phone call changed her world forever. Now she's having nightmares that threaten to disrupt the space-time continuum -- nightmares of hiding from bombs in basements, of glass shattering from nearby explosions. But these disturbing dreams, in which she inhabits the body of a young girl named Lily, seem all too real, and Emma's waking life begins to be affected by the events that transpire in this mysterious wartime landscape. Convinced she has been given a chance to save a life, Emma tries to rescue Lily from heartache, but ultimately it is through Lily that Emma finds her way back. *The Almond in the Apricot* navigates connections formed across space and time and explores love, grief, and the possibility that the universe might be bigger than either Emma or Lily ever imagined.

Read-i-cide: The systematic killing of the love of reading, often exacerbated by the inane, mind-numbing practices found in schools. Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the

decline, poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative book *Readicide: How Schools are Killing Reading and What You Can Do About It*, author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading: our schools. *Readicide*, Gallagher argues that American schools are actively (though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading by: Valuing standardized testing over the development of lifelong readers Mandating breadth over depth in instruction Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts Ignoring the importance of developing recreational reading Losing sight of authentic instruction in the looming shadow of political pressures *Readicide* provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading; steps that will help prevent the loss of

another generation of readers. *Library and Information Science* Bloomsbury Publishing USA National Bestseller! "Unflinching and unforgettable. *Little Secrets* has everything you want in a thriller" —Riley Sager, New York Times bestselling author of *Lock Every Door* Overwhelmed by tragedy, a woman desperately tries to save her marriage in award-winning author Jennifer Hillier's *Little Secrets*, a riveting novel of psychological suspense. All it takes to unravel a life is one little secret... Marin had the perfect life. Married to her college sweetheart, she owns a chain of upscale hair salons, and Derek runs his own company. They're admired in their community and are a loving family—until their world falls apart the day their son Sebastian is taken. A year later, Marin is a shadow of herself. The FBI search has gone cold. The publicity has faded. She and her husband rarely speak. She hires a P.I. to pick up where the police left off, but instead of finding Sebastian, she learns that Derek is having an affair with a younger woman. This discovery sparks Marin back to life. She's lost her son; she's not about to lose her husband,

too. Kenzie is an enemy with a face, which means this is a problem Marin can fix. Permanently.

Libraries in today's global world have emerged as key players in building a culture for reading in communities while enhancing the literacy development of children, youth, adults and seniors. Whether one lives in a modern city with sophisticated library services or in a remote region of the world where access to books and literacy services may be limited, librarians and libraries are contributing to the development of learning communities. This book captures some of the essence of this work in libraries in order to inspire and support all those who value the role of libraries in building global communities. The authors highlight the emerging role of libraries and community partners in literacy development and provide concrete examples via case studies drawn from

global communities, demonstrating how libraries are working to support local literacies. They also suggest recommendations for supporting the critical role for libraries in supporting global literacies. The book will become essential reading for all those interested in literacy and libraries throughout the world. *Intimate China* Taylor & Francis
From Kazakhstan's most celebrated author comes his powerful and timely English-language debut about a fisherman's struggle to save the Aral Sea, and its way of life, from man-made ecological disaster. Unfolding on the vast grasslands of the steppes of Kazakhstan before its independence from the USSR, this haunting novel limns the struggles of the world through the eyes of Nasyr, a simple fisherman and village elder, and his resolute son, Kakharman. Both father and son confront the terrible future that is coming to the poisoned Aral Sea. Once the fourth-largest lake on earth, it is now an impending environmental catastrophe. Starved of water by grand Soviet agricultural schemes, the sea is drying out, and the land around it is turning into a salt desert. The livelihood of the fishermen

who live on its shores is collapsing. Vanishing with the water is a whole way of life. Despite overwhelming odds, Kakharman wages a battle against an indifferent bureaucracy, while Nasyr looks to Allah for guidance. Without the support of neighbors, who have lost hope, Kakharman must travail alone to rescue what literally gives them life. Even as the consequences mount, his quixotic fight proves more daunting. Even the sea itself seems to roil with distress. In the face of despair, the unwavering convictions of these soulful individuals offer hope. Rollan Seisenbayev takes readers on a cautionary, elegiac, and deeply compassionate journey into what it means to be human--to care and to fight against devastating odds. May humankind heed his warning cry.

This book presents a curricular framework for students grades 6–12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork.

Supporting Reading Grades 6–12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and

Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner.

Based on years of ground-breaking research, this book supplies a look at the unique relationship between each text and the individual reader that results in a satisfying, pleasurable, and even life-changing reading experience. Following up on her critically acclaimed *Reading Matters: What the Research Reveals about Reading, Libraries, and Community*, Catherine Sheldrick Ross takes a new look at pleasure reading through 30 thought-provoking essays based on themes arranged from A to Z. In short lively

chapters, she discusses topics ranging from "Alexia," "Bad Reading," and "Changing Lives" to "Romance Fiction," "Self-help," "Titles," "Vampires," and "Year of Reading." Drawing on her own research as well as other published sources, Ross comments on the significance of each theme, provides examples of the phenomenon, and develops the topic chronologically, through further examples, or through reversals. The essays are unified by an underlying theory of reading that views readers as sense-makers, actively engaged in reading themselves into the text and reading the texts back into their own lives. It gives educators and librarians insights into their roles with readers and offers a message about the importance of pleasure reading. A short list of resources for further reading is supplied with each topic.

The school library has changed dramatically. Today, it is a portal to a world of learning that includes traditional books, digital resources, and online environments. As the importance of information and communication technologies grows, teachers and teacher-librarians hold the key to creating powerful learning opportunities that help students function more effectively. This comprehensive guide discusses the changing responsibilities of classroom teachers and teacher-librarians in helping

students become better readers, writers, and researchers. It offers suggestions for re-inventing the school library by offering a better and more current selection of resources, instilling students with the reading habit, and supporting them in these key areas: promoting reading for learning and pleasure; improving critical literacy skills when using information from many sources; encouraging research methods that respect copyright and lead to original work; designing information tasks to help students work effectively with data; developing better informational text structures that increase comprehension; encouraging the integration of emerging technologies and traditional resources. Literacy, Libraries,

and Learning argues that using diverse learning resources can improve literacy achievement. It shows teachers and teacher-librarians how to turn their schools into first-rate learning environments and their students into lifelong learners. *Readicide* Library and Archives Canada This thorough treatment of collection development for school library educators, students, and practicing school librarians provides quick access to information. new AASL standards as they relate to the collection; the idea of crowd sourcing in collection development; and current trends in the school library profession, such as Future Ready Libraries and new standards from the National Board for Professional Teaching Standards. Each chapter has been updated and revised with new material, and particular emphasis is placed on disaster preparedness and response as they pertain to policies, circulation, preservation, and moving or closing a collection. This edition also includes updates to review of curation and community analysis principles as they affect the development of the library collection.
