Las siete vidas del gato es una de las obras más significativas y al mismo tiempo desconocidas del popular escritor y dramaturgo español Enrique Jardiel Poncela. El texto empleado en esta edición se ha tomado de la primera publicación de la obra, que incluye los cortes y modificaciones efectuados en el libreto original tras el estreno, momento en que

Alfredo Marqueríe, el más prestigioso de los críticos teatrales de su momento, escribió en el diario Informaciones: "Muchos aplausos al final y durante el curso de la representación; ovaciones en los mutis; grandes risas y carcajadas en los pasajes cómicos; curiosidad, interés, expectación constante del público, no defraudada en ningún momento. En suma: un éxito teatral claro y rotundo."

Ático nos libera de la idea permanente de que en el universo no estamos solos. Nos enseña a luchar por la supervivencia de las razas que desde hace miles de años vivimos a la búsqueda de la verdad y cuando un virus invade nuestro mundo, nos da la oportunidad de entender el origen de ese enemigo y así nos abre el camino para combatirlo. Para crear una homogeneidad de pensamiento y alternativas de poder, hay una explosiva lucha de la inteligencia viva contra la inteligencia artificial, con el resultado de que este duelo nos reafirma en la filosofía de que el amor y la fuerza son el resorte que nos diferencia. Antonio Guallar Jerez nació en Barcelona (España) en 1945. Cumplió los estudios primarios en la misma capital, completando los mismos en academias nocturnas. Trabajó más de 30 años en un banco, los últimos como director de sucursal. Tiene muchas

aficiones, como ajedrez, damas, lectura, escritura, psicología, deporte, música. En la actualidad sigue estando casado, después de 50 años, con la misma mujer, que no solo le donó un riñón, para seguir viviendo, sino que además iba envuelto en papel de amor. Tiene 3 hijos. ¡Qué maravilla!

La certificación CCNP es una de las certificaciones de redes más prestigiosas, mundialmente abalada por Cisco Systems. Los técnicos en posesión de esta certificación representan una garantía profesional para las empresas que requieren personal cualificado en conceptos como enrutamiento, conmutación, redes privadas, acceso remoto, etc. En la mayoría de los casos el personal certificado CCNP realiza tareas de soporte de alto nivel, resolviendo incidencias a grandes clientes u operaciones de configuración de dispositivos de alta gama. Una vez lograda la certificación CCNA, el CCNP es, sin duda, la meta a alcanzar por el personal técnico que aspira ampliar sus conocimientos y su horizonte laboral. La obra proporciona los conceptos, comandos

y gráficos necesarios para configurar los dispositivos Cisco en redes corporativas y alcanzar la tan valorada certificación. El libro contiene cuarenta y cuatro capítulos divididos en cuatro partes bien definidas donde se abarcan temas como enrutamiento, conmutación, VoIP, MPLS, seguridad, wireless, QoS, etc., cuyo orden facilita la lectura y el aprendizaje. Los autores han volcado toda su experiencia como formadores y técnicos certificados, logrando un compendio exento de material innecesario apuntando solo a los temas más relevantes en la materia. Se han cuidado celosamente las terminologías, respetando el argot empleado en las comunicaciones para que el uso del idioma español no represente un obstáculo como lo había sido hasta el momento. Este libro viene a cubrir, sin duda, un espacio vacío hasta el momento para los hispano parlantes, que no solo persiguen la tan valorada certificación CCNP, sino que también sirve de material de consulta para aquéllos que deseen ampliar sus conocimientos.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the

education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
