and Steelhead (0-8117-3176-6) The
tradition of tying salmon flies with
feathers is a very old one, recorded in
Ancient Greece, but the Victorians
instilled artistry into salmon fly tying
with their elaborate built-wing flies using
feathers from a variety of exotic birds.
After a period in which featherwing flies
were eclipsed by those made from
animal hairs and man-made materials,
the popularity of these versatile feathers
is resurging. This international guide

features dressings from North America and Europe. The origins of patterns, precise dressings, and superb color illustrations will inspire fly tiers to attain new heights of achievement.

Pacific Salmon Flies Rowman & Littlefield
 PNBA BESTSELLER • “A powerful and inspiring story. Guido Rahr’s mission to save the wild Pacific salmon leads him into adventures that make for a breathtakingly exciting read.”—Ian Frazier, author of *Travels in Siberia*
 Editors’ Choice: The New York Times Book Review • Outside Magazine • National Book Review • Forbes
 In the tradition of *Mountains Beyond Mountains* and *The Orchid Thief*, *Stronghold* is Tucker Malarkey’s eye-opening account of one of the world’s greatest fly fishermen and his crusade to protect the

world’s last bastion of wild salmon. From a young age, Guido Rahr was a misfit among his family and classmates, preferring to spend his time in the natural world. When the salmon runs of the Pacific Northwest began to decline, Guido was one of the few who understood why. As dams, industry, and climate change degraded the homes of these magnificent fish, Rahr saw that the salmon of the Pacific Rim were destined to go the way of their Atlantic brethren: near extinction. An improbable and inspiring story, *Stronghold* takes us on a wild adventure, from Oregon to Alaska to one of the world’s last remaining salmon strongholds in the Russian Far East, a landscape of ecological richness and diversity that is rapidly being developed for oil, gas, minerals, and timber. Along

the way, Rahr contends with scientists, conservationists, Russian oligarchs, corrupt officials, and unexpected allies in an attempt to secure a stronghold for the endangered salmon, an extraordinary keystone species whose demise would reverberate across the planet. Tucker Malarkey, who joins Rahr in the Russian wilderness, has written a clarion call for a sustainable future, a remarkable work of natural history, and a riveting account of a species whose future is closely linked to our own. Praise for *Stronghold* “This book isn’t just about fish, it’s about life itself and the fragile unseen threads that connect all creatures across this beleaguered orb we call home. Guido Rahr’s quest to save the world’s wild salmon should serve as an inspiration—and a

provocation—for us all, and Tucker Malarkey’s exquisite book captures Rahr’s weird and wonderful story with poignancy, humor, and grace.”—Hampton Sides, author of *In the Kingdom of Ice and Blood and Thunder* “A crazy-good, intensely lived book that reads like an international thriller—only it’s our beloved salmon playing the part of diamonds or oil or gold.”—David James Duncan, author of *The River Why* and *The Brothers K*

[Modern Steelhead Flies](#) COCH Y BONDDU BOOKS

Steelhead flies represent the highest

echelon of artistic fly-dressing. They enjoy a rich tradition as both a functionally designed lure for tempting the much-reversed steelhead, but also as a creative expression of the aesthetic appeal of fly angling. John Shewey, author of the acclaimed *Spey Flies and Dee Flies*, has produced another well-written and researched book, rich in technique, method and innovation. Through concise text and hundreds of sharp, color photographs -- including step-by-step and artistic individual fly plates -- Shewey covers: materials for steelhead flies; basic tying techniques; hairwing and featherwing flies; spey and dee styles; practitioners, shrimp and prawn patterns; dry flies and much more. This book is a must-have for all steelhead fly-fishermen.

From his early years with bass bugs and soggy sneakers, Tosh Brown takes us on a forty-year odyssey of rivers and oceans from Alaska to the Amazon. Top of the Flood begins in the summer of 1976 and ends on Tosh's 50th birthday with an evolved realization that the daily fish count is a minor component of the larger scene, and that one can grow old without becoming an old geezer. With volumes of published fly-fishing images to his credit, Tosh is well known for his skill with a camera. But as you'll discover in this book, he also has a rare talent for arranging words on paper. Not only can Tosh do both, he excels at both. He's like the Deion Sanders of freelancers, minus man-to-man coverage ability. Writing humor is a lot harder than most people

think, yet Tosh makes it look easy. His humble style fits well with his frequent Texas cultural references, and he presents an honest, unfiltered portrait of each destination that he visits. I've chased redfish with Tosh in southern Louisiana, and bonefish and snook, via kayak, in the Yucatan. He brings a unique perspective along on every adventure, and he transcribes them into stories with proficiency and candor. If the second half of his life reads as well as the first, I look forward to the sequel. Tom Bie
