Synopsis Univ of California Press

The content is focused on benthic communities showing how they play an important role in the river ecosystems. Provides also information on taxonomy of river-inhabiting algal groups, including phylogeny, distribution, collection, preservation and description of the most representative genera of algae in river benthic algal communities. The book also approaches the ecology of river algae not to mention the ecological factors influencing abundance, distribution and diversity of river benthic algal communities and their use as bio-indicators, providing an up-to-date information on taxonomy, ecology, methodology and uses, and a great source of research to everyone interested in freshwater algae, limnology, water quality assessment and biodiversity in river ecosystems.

Tome premier (-troisieme) University of Chicago Press

"This report examines the physical and psychological damage caused by medically unnecessary surgery on intersex people, who are born with chromosomes, gonads, sex organs, or genitalia that differ from those seen as socially typical for boys and girls. The report examines the controversy over the operations inside the medical community, and the pressure on parents to opt for surgery"--Publisher's description.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and

materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature.

Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Rilke's prayerful responses to the french master's beseeching art

For a long time nothing, and then suddenly one has the right eyes. Virtually every day in the fall of 1907, Rainer Maria Rilke returned to a Paris gallery to view a Cezanne exhibition. Nearly as frequently, he wrote dense and joyful letters to his wife, Clara Westhoff, expressing his dismay before the paintings and his ensuing revelations about art and life. Rilke was knowledgeable about art and had even published monographs, including a famous study of Rodin that inspired his New Poems. But Cezanne's impact on him could not be conveyed in a traditional essay. Rilke's sense of kinship with Cezanne provides a powerful and prescient undercurrent in these letters -- passages from them appear verbatim in Rilke's great modernist novel, *The Notebooks of Malte Laurids Brigge*. Letters on Cezanne is a collection of meaningfully private responses to a radically new art.

The third and fourth books of Cicero's Tusculan Disputations deal with the nature and management of human emotion: first grief, then the emotions in general. In lively and accessible style, Cicero presents the insights of Greek philosophers on the subject, reporting the views of Epicureans and Peripatetics and giving a detailed account of the Stoic position, which he himself favors for its close reasoning and moral earnestness. Both the specialist and the general reader will be fascinated by the Stoics' analysis of the causes of grief, their classification of emotions by genus and species, their lists of oddly named character flaws, and by the philosophical debate that develops over the utility of anger in politics and war. Margaret Graver's elegant and idiomatic translation makes Cicero's work accessible not just to classicists

but to anyone interested in ancient philosophy and psychotherapy or in the philosophy of emotion. The accompanying commentary explains the philosophical concepts discussed in the text and supplies many helpful parallels from Greek sources.

In 1988, the first edition of Orest Subtelny's Ukraine was published to international acclaim, as the definitive history of what was at that time a republic in the USSR. In the years since, the world has seen the dismantling of the Soviet bloc and the restoration of Ukraine's independence - an event celebrated by Ukrainians around the world but which also heralded a time of tumultuous change for those in the homeland. While previous updates brought readers up to the year 2000, this new fourth edition includes an overview of Ukraine's most recent history, focusing on the dramatic political, socio-economic, and cultural changes that occurred during the Kuchma and Yushchenko presidencies. It analyzes political developments - particularly the so-called Orange Revolution - and the institutional growth of the new state. Subtelny examines Ukraine's entry into the era of globalization, looking at social and economic transformations, regional, ideological, and linguistic tensions, and describes the myriad challenges currently facing Ukrainian state and society.

Dictionnaire Historique Et Critique

Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved

and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent

to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.
