MOORE CAROLYN

Clinical Nursing Skills Mosby

Incorporated

Learn to master important nursing skills for the clinical setting with Nursing Skills Online 3.0 (NSO). This interactive learning system offers 18 modules organized around the 5-step nursing

process. Each module uses a structured pace to guide you through the skills that have the greatest effect on patient safety. Modules also include critical thinking tasks and case studies to help you apply your learning to realistic patient situations, as well as review tools to help you evaluate your competency before performing skills in the clinical setting. Case-based/problem-oriented format for learning activities provides

you with real-life patient scenarios and promotes critical thinking. Frequent interactivity enhances your learning and engagement with content to make understanding complex concepts easier. Self-assessment exercises allow you to test your knowledge of key concepts including correct answers and rationales for immediate feedback. The latest evidence-based information in clinical skills & techniques keeps you on the cutting edge of nursing. Lesson Post Tests provide an immediate score upon completion including rationales behind correct responses. Printable procedure guidelines enable you to study and learn anywhere you go. QSEN correlated headings and exercises help you better understand the six Quality and Safety Education for Nurses (QSEN) core

competencies. Patient Centered Care screens address variations in approaches to patients of varied cultures and ages during the performance of the skill. Quality Improvement exercises present critical thinking challenges, prodding you to use patient care data to improve outcomes. Evidence-Based Practice icons link to recently published research articles and a brief discussion of how they have already changed or may change practice in the future. Safety Considerations screens address the global safety issues in play for the lesson topic. Teamwork and Collaboration screens include information on delegation, as well as cooperation with other healthcare professionals who may have input in to patient welfare (physical therapists,

nutritionists, respiratory therapists, pharmacists, etc.).

Modules for Basic Nursing Skills

Mosby

Now in its Eleventh Edition, this trusted text continues the tradition of excellent coverage of theoretical nursing concepts, step-by-step skills and procedures, and clinical applications to assist beginning LPN/LVN nursing students in acquiring a solid foundation for their course of study.

Clinical Nursing Skills Workbook

Mosby

Providing forward-thinking approaches and ideas for nurses of all categories, this reference has been written primarily in response to increasing concerns regarding the perceived lack of ability in both students and newly qualified nurses

to perform clinical skills. By outlining the elements of essential nursing procedure in a readily accessible format, including rationale for recommended actions and promoting evidence-based practice, this text encourages the reader to keep a record of achievement in relation to clinical skill competence. The selection of skills included is based on extensive consultation with experienced clinicians, students, clients and teachers of nursing. Each procedure has been carefully researched to provide a contemporary foundation for practice. The text also contains a rapid reference section of common terminology, conversion tables, laboratory results and other useful information.

[Workbook for Timby's Fundamental Nursing Skills and Concepts](#) Pearson

Education

Each chapter in this text focuses on a specific area of care and related skills and considers the main practice issues. It should be of use to the learner who really wants to get to grips with the more common nursing procedures.

Textbook of Basic Nursing OUP

Oxford

Focusing on the skills that are the most labor intensive to learn and that pose the greatest risk to patient safety, this online course is the perfect tool to help you review and evaluate your competency before performing skills in the clinical setting. This one-of-a-kind online course includes 17 modules with each module comprising several lessons. Each lesson provides you with a variety of interactive exercises and self-check

activities that allow you to test your comprehension and ask you to apply concepts. You can also view the video for each skill from start to finish, pausing and repeating segments as desired. Each lesson includes an exam that can be scored immediately, with feedback that provides the rationale for the correct answer, and each module concludes with a test. Provides over 700 activities to encourage decision-making, critical thinking and self-evaluation. Case-based/problem-oriented format of learning activities relate to real-life patient scenarios. Varied self-assessment exercises - over 750 - allow you to test your knowledge of key concepts throughout the module. Lesson exams may be scored immediately and feedback provides rationale for the

correct answer. Scramble function allows you to reset an exercise so the problem is reordered and presented anew.

Colorful visuals and graphics (over 800 images) provided on screens increase engagement and provides context when applicable. Over 100 video clips demonstrating procedures can be viewed from start to finish, pausing and repeating segments as desired. Over 100 printable Procedure Guides provide a study tool for later review.

Taylor's Clinical Nursing Skills Mosby Incorporated

"A resource for best practice nursing standards, guidelines, and competencies. The authors teach through extensive case studies and critical thinking features, and thoroughly explain the rationales for each skill and

technique. Strong coverage of evidence-based care, cultural/religious considerations, nursing management, and community based nursing is provided throughout."--Publisher.

Clinical Nursing Skills Mosby Incorporated

Focusing on the skills that are most labor-intensive to teach and that pose the greatest risk to patient safety, this online course is the perfect tool to help students review and evaluate their competency before performing skills in the clinical setting. This innovative online course consists of 17 modules, with each module comprising several lessons. Each lesson provides a content overview, a variety of interactive exercises, self-check activities, and an exam. In addition to schools of nursing,

this is also a valuable and timesaving means of providing periodic training and competency evaluation for nursing staff. This online course is also available packaged with the parent text, Perry: *Clinical Nursing Skills & Techniques*, 7th edition. . Designed to correlate with Perry: *Clinical Nursing Skills & Techniques*, 7th edition. . Reading assignments link online content to text. . Over 700 activities encourage decision-making, critical thinking, and self-evaluation. . Case-based/problem-oriented format of learning activities relates to real-life patient scenarios. . Varied self-assessment exercises - over 750 - and lesson exams allow users to test their knowledge of key concepts throughout the module. Correct answers and rationales provide immediate

feedback. . Scramble function allows user to reset an exercise so that the activities are reordered and presented anew. . 100 video clips demonstrating procedures can be viewed from start to finish, pausing and repeating segments as desired. . Over 100 step-by-step skill performance guidelines are printable to provide a portable reference. . Extensive glossary of terms includes pronunciation for the most often mispronounced terms. *Nursing Skills Online Version 4.0 for Fundamentals of Nursing Access Card*
Elsevier

Updated to reflect the latest revisions to Timby's Fundamental Nursing Skills and Concepts, 12th edition, this dynamic Workbook for Timby's Fundamental Nursing Skills and Concepts delivers an engaging review of key LPN/LVN nursing

concepts and skills and prepares students to successfully apply their knowledge on exams and in LPN/LVN practice. Each chapter reinforces the latest LPN/LVN practices detailed in the companion textbook through review exercises, application activities and additional NCLEX-PN® practice questions, strengthening students' critical thinking capabilities and NCLEX preparation®.

Nursing Skills Online Version 2.0 for Nursing Interventions + Clinical Skills
Wallcur

Nursing Skills Online is an interactive and evaluative learning system designed to support Elkin's Nursing Interventions and Clinical Skills 4th edition text. Focusing on the skills that are most labor-intensive to teach and pose the

greatest risk to patient safety, this course is the perfect tool to help users review and evaluate their competency before performing skills in the clinical setting. This online course consists of 17 modules organized around the 5-step nursing process. Each module challenges users with a series of realistic, case-based lessons that consist of objectives, a content overview, reading assignments, numerous interactive exercises, and a post-test. Lessons include helpful tables, graphs, charts, illustrations, photographs, animations, audio clips, and videos throughout - all designed to make the learning experience more visual, realistic, and engaging.

Modules Basic Nursing Skills

Lippincott Williams & Wilkins

Revised to emphasize critical thinking, this Fifth Edition is the most engaging, student-friendly, and comprehensive fundamentals textbook for beginning nursing students. The unique, holistic "blended skills" approach to nursing care integrates technical, cognitive, ethical/legal, and interpersonal skills. Each Fifth Edition chapter opens with three real-world cases, which are used throughout the chapter as examples. Reflective Practice boxes written by Carol Taylor's students describe realistic situations and ask challenging questions. The updated coverage includes discussions of evidence-based practice and a new chapter on complementary and alternative modalities. A back-of-book CD-ROM has tutorials on NCLEX innovative items, and fluid and

electrolyte balance. Now this text is available in a package with a student-version DVD of Taylor's Video Guide to Clinical Nursing Skills. Hosted by a nurse expert, this 17-module video program offers engaging reality-based footage, interviews with patients, caregivers, and nurses, and detailed step-by-step demonstration of skills. A unique feature of this video program is its coverage of unexpected situations, with a focus on how to appropriately respond when a skill deviates from the normal steps.

Nursing Skills Online Version 4.0 for Nursing Interventions & Clinical Skills Access Code John Wiley & Sons

As a nursing student you will have learnt lots of nursing theory and research - but how do you translate this into practice and apply it to the skills you need? Where do you start? What steps should be carried out and in what order? What should you do afterwards? Essential Nursing Skills answers these questions for over 130 clinical skills. Each one is explained from start to finish, using a

step-by-step approach, with clear illustrations and colour photographs to enhance understanding. Small enough to carry with you and specifically designed and written to aid learning, this book is invaluable for nurses across all fields.

- Attractive design – easy to use
- Skills explained step by step
- Comprehensive list of skills covers all that students will encounter in practice
- Points for Practice sections encourage readers to reflect and learn
- Further reading and references point to the evidence and knowledge base for each skill. Full-colour photographs illustrate many of the procedures

Full colour is used throughout to help navigate procedures

Section listing normal values of commonly used blood tests

Skills to assess deteriorating patients and care

for patients undergoing surgery Reflects changes in nursing and professional national guidelines.

Packaged with Potter's Basic Nursing, 6th edition, Nursing Skills Online is an interactive and evaluative learning system designed to support the textbook. Focusing on the skills that are most labor-intensive to teach and pose the greatest risk to patient safety, this course is the perfect tool to help students review and evaluate their competency before performing skills in the clinical setting. This online course consists of 17 modules, with each module comprising several lessons. Each lesson provides a content overview, a variety of interactive exercises, self-check activities, and an exam. Designed

to correlate with Potter: Basic Nursing: Essentials for Practice, 6th edition. Reading assignments link online content to text. Over 700 activities encourage decision-making, critical thinking, and self-evaluation. Case-based/problem-oriented format of learning activities relates to real-life patient scenarios. Varied self-assessment exercises - over 750 - and lesson exams allow users to test their knowledge of key concepts throughout the module. Correct answers and rationales provide immediate feedback. Scramble function allows user to reset an exercise so that the activities are reordered and presented anew. 100 video clips demonstrating procedures can be viewed from start to finish, pausing and repeating segments as desired. Over 100 step-by-step skill

performance guidelines are printable to provide a portable reference. Extensive glossary of terms includes pronunciation for the most often mispronounced terms. [Taylor's Interactive Nursing Skills](#) John Wiley & Sons
Updated with the most current evidence-based information, Nursing Skills Online 4.0 for Fundamentals of Nursing, 10th Edition strategically focuses on the skills that pose the greatest risk to patient safety and helps you develop your critical thinking skills. NSO features 19 modules, including a new Cardiac Care module, with four to eight lessons each - enhanced by 900 interactive activities, 130 video clips, 95 animations and slide shows, 1100 images, 855 assessment items, and 1020 glossary terms. The structured pacing purposefully moves

you through chunks of content which you then apply to critical thinking tasks or case studies. Lesson quizzes let you evaluate your mastery of the content, and module exams feed out to a course gradebook allowing instructors to evaluate your progress. Case-based/problem-oriented format for learning activities provides you with real-life patient scenarios and promotes critical thinking. QSEN correlated headings and exercises helps you better understand the six Quality and Safety Education for Nurses (QSEN) core competencies. Lesson Post Tests provide an immediate score upon completion including rationales behind correct responses. Printable procedure guidelines enable you to study and learn anywhere you go. Self-assessment

exercises allow you to test your knowledge of key concepts including correct answers and rationales for immediate feedback. Safety Considerations screens address the global safety issues in play for the lesson topic. Patient Centered Care screens address variations in approaches to patients of varied cultures and ages during the performance of the skill. Teamwork and Collaboration screens include information on delegation, as well as cooperation with other healthcare professionals who may have input in to patient welfare (physical therapists, nutritionists, respiratory therapists, pharmacists, etc.). Quality Improvement exercises present critical thinking challenges, prodding you to use patient care data to improve outcomes.

Frequent interactivity enhances your learning and engagement with content to make understanding complex concepts easier. Objectives, Equipment lists, and Delegation responsibilities at the beginning of each lesson help focus your attention. Answer Guide provides instructors with an easy reference tool to use for answering student questions about exercises and quiz/exam answers/rationales. NEW! Cardiac Care module covers vital skills related to cardiac monitoring. NEW! UNIQUE! Documentation activities help you practice accurate charting and documentation skills which are vital to develop early in your educational experience. NEW! Videos clips with closed captions and audio scripting updated to include the latest standards

of nursing care. NEW! Focus on interprofessional education (IPE) and safety helps you better understand how to communicate with the whole healthcare team. UPDATED Learning activities throughout text include the latest accessibility standards.

Taylor's Clinical Nursing Skills: A Nursing Process Approach aims to help you learn the nursing skills necessary for safe and effective patient care. The text includes unexpected situations that you may encounter, along with related interventions for how to respond to these unexpected situations. With both basic and advanced skills, this text will be an essential resource to you across

the curriculum and throughout your career. Instructor Resources The Test Generator has over 500 NCLEX®-Style questions to help you put together exclusive new tests from a bank with questions spanning the book's topics, which will assist you in assessing your students' understanding of the material. PowerPoint Presentations , provided for each book chapter, enhance teaching by providing key visuals and reinforcing content. Skills Lab Teaching Plans walk you through each chapter, objective by objective, and provide a lecture outline and teaching guidelines. A Master Checklist for Skills Competency is provided to help you track your students' progress on all the skills in this book. A sample Syllabus is provided to help you organize your course.

WebCT/Blackboard-Ready Materials can be accessed on thePoint, plus access to all Student Resources, including Watch & Learn video clips, Practice & Learn activities, and Concepts in Action Animations. The Image Bank provides free access to illustrations and photos from the textbook for use in PowerPoint presentations and handouts. Student Resources NCLEX®-Style Review Questions correspond with each book chapter for review of important concepts to help you practice for the NCLEX examination. Watch & Learn video clips, Practice & Learn activities, and Concepts in Action Animations demonstrate important concepts related to skills. Journal Articles offer access to current research available in Wolters Kluwer journals. Dosage Calculation Quizzes

provide opportunities for you to practice math skills and calculate drug dosages.

Nursing Skills Online Version 2.0 For Clinical Nursing Skills & Techniques

Mosby Incorporated

Designed as a compelling text for students, Clinical Nursing Skills offers evidence-based, practical guidance for procedures in all settings. Emphasis is placed on the development of decision-making and problem-solving skills. It is enhanced by colour illustrations and online resources, including video clips and quarterly updates to evidence.

Modules for Basic Nursing Skills Elsevier Health Sciences

The Essential Enrolled Nursing Skills for Person-Centred Care, 1st edition, Workbook is an indispensable tool that will assist students in mastering the

clinical skills required to deliver the highest-quality care. Specifically developed to support Tabbner's Nursing Care: Theory and Practice, 7th edition, the workbook features the essential skills that form part of the assessment for Diploma of Nursing students. Based on evidence-based practice, each skill features a step-by-step approach and rationale to help understanding of how and why a skill is performed. Directly aligned to Tabbner's Nursing Care: Theory and Practice, 7th edition All skills and competency checklists align to the new 2016 Enrolled Nurse Standards for Practice, as well as the most recent Diploma of Nursing training package HLT51612 Competency checklists feature the Bondy Rating Scale, providing a valuable tool for assessment

Equipment list for each skill Reflection opportunity at the end of each competency checklist to encourage learning Includes the decision-making framework for the EN

Nursing Skills Online Version 4.0 for Fundamentals of Nursing Access Card
Mosby

Description Nursing Skills Online features 18 modules which include 4 to 8 lessons each, enhanced by 900 interactive activities, 130 video clips, 95 animations and slide shows, 1100 images, 855 assessment items, and 1020 glossary terms. The structured pacing moves students strategically through chunks of information which they then apply to critical thinking tasks or case studies. Lesson quizzes allow students to evaluate their mastery of the

content, and module exams feed out to a course grade book allowing instructors to evaluate student progress. For this versioning, Nursing Skills Online, v 3.0 will be packaged with Potter, Perry, Stockert, and Hall: Fundamentals of Nursing, 9/e with customized reading assignments that coordinate it to the text. The 18 modules will be organized to follow the text order as well. Rationale Nursing Skills Online, which focuses on 66 skills that are labor-intensive to teach and pose considerable risk to patient safety, has proven its effectiveness. Student feedback from hundreds of students indicates they value the time spent working with the course and credit NSO with improving their grades. NSO completes the suite of clinical skills educational materials by providing the

element that develops the critical thinking skills of student nurses. While the video series focuses on the correct "how" of clinical skill performance, the chunked content interspersed with interactive exercises develops the ability of students to analyze a situation and respond with the most effective clinical care (the "why" of clinical care). Feedback from instructors has been incredibly positive, with many praising NSO as "exactly what we've needed". Although we can't quantify the effect on adoptions, numerous marketing reports have cited NSO as an important factor in holding business as well as gaining new adoptions. Sales of Nursing Skills Online for Fundamentals of Nursing are tricky to track because the course does not publish in the same year as the

textbook. Hence, for any one edition of the course, we span 2 editions of the textbook and vice versa. Sales patterns are best looked at by comparing the LOT 1-year versions of the course and the LOT 3-year versions of the course. Remember that the 1-year LOT version of the course is the version that publishes with the new edition of the book. QSEN correlated headings and exercises will highlight content related to the 6 QSEN core competencies. Safety Considerations screens will address the global safety issues in play for the lesson topic. Patient Centered Care screen will address variations in approach to patients of varied cultures and ages during the performance of the skill. Evidence-Based Practice icons will link to recently published research articles and

a brief discussion of how they have or may change practice. Teamwork and Collaboration screen will include information on delegation, as well as cooperation with other healthcare professionals who may have input in to patient welfare (physical therapists, nutritionists, respiratory therapists, pharmacists, etc.) Quality Improvement exercises will present critical thinking challenges that prod students to use patient care data to improve outcomes. Key to Communication exercises will present a brief case history and ask students to decide what information is key to document to improve the quality of patient care. Incorporation of newest evidence-based standards from INS, ISMP, TJC. New Video clips from 4th edition of Mosby's Nursing Video Skills:

Basic, Intermediate, Advanced will demonstrate updated techniques and procedures. New photos will freshen the look of the exercises and provide the most current information on equipment and techniques. The most current evidence-based information in clinical skills & techniques Case-based/problem-oriented format of learning activities relates to real-life patient scenarios and promotes critical thinking. Self-assessment exercises allow learners to test their knowledge of key concepts. Correct answers and rationales provide for immediate learner feedback. Lesson exams provide immediate score upon completion and rationale for correct response. Learners can repeat/retake lesson exams, as desired, until confident of mastery. Printable procedure

guidelines make study and review portable. Content presented in easy to read, bulleted format. Interactive activities foster application of information, decision-making, critical thinking, and evaluation. Objectives, Equipment lists, and Delegation responsibilities are presented at the beginning of each lesson to help focus student attention. Answer Guide provides an easy reference tool for instructors to use when answering student questions about exercises and quiz/exam answers/rationales. This valuable resource will be posted to text book Evolve sites for easy access. Because this is a versioning of the same course, there are no new features. However, all of the reading assignments will be updated to match the newest

edition of *Fundamentals of Nursing, 9/e. Fundamentals of Nursing, Nursing Skills Online Version 2.0* Lippincott Williams & Wilkins

Make sure you can perform nursing skills with confidence! Nursing Skills Online lets you review procedures before you perform them in the clinical setting. Corresponding to Potter and Perry's *Fundamentals of Nursing, 7th Edition*, this online course focuses on the skills that are more difficult to master or pose the greatest risk to patient safety. It includes 18 modules with realistic, case-based lessons each providing a content overview, reading assignments, interactive exercises, and tests. Lessons use videos, animations, slide shows, and other visuals to make learning easier and more interesting. Reading

assignments link Nursing Skills Online to content in the Fundamentals of Nursing text. An easy-to-read, bulleted format and small segments of information make it easier to master information. The case-based/problem-oriented format relates content to real-life patient scenarios and promotes critical thinking. Interactive activities allow you to check your understanding of the material. Self-assessment exercises allow you to test your knowledge of key concepts, with correct answers and rationales provided for immediate feedback. Video clips of procedures can be viewed from start to finish, paused, or repeated as desired. Photos and illustrations clarify and highlight key information. Objectives, equipment lists, and delegation responsibilities at the beginning of each

lesson focus your attention on important information. Printable procedure guides make it easy to study or review anytime, anywhere. Lesson posttests allow you to evaluate your comprehension and review any areas of weakness before taking the module exam, and may be repeated as often as you want. A new Blood Therapy module covers principles of the ABO and RH systems, initiating transfusion, implementing auto-transfusion, and monitoring for adverse reactions. The Debriefing Room offers a capstone critical thinking exercise for each module, asking you to watch a video scenario and evaluate skill performance. Cultural Considerations sections address variations in approach to patients of differing cultures during performance of the skills. Information on

delegation is included within all case studies. New video clips from Mosby's Nursing Video Skills, Version 3.0 demonstrate updated techniques and procedures. New animations help you visualize concepts. New photos depict the most current information on equipment and techniques. Reformatted procedure guidelines are easier to display and print.

Modules for Basic Nursing Skills

Mosby Incorporated

Master important nursing skills for the clinical setting with Nursing Skills Online 4.0 (NSO). This interactive learning system offers 19 modules that are organized around the 5-step nursing process. Each module uses a structured pace to guide you through the skills that have the greatest effect on patient safety. Modules also include critical thinking tasks and case studies to help you apply your learning to realistic patient situations.
