SANCHEZ SCHMIDT

Report Taylor & Francis

Bill Spetrino was just an ordinary accountant more than 20 years ago when he discovered the best investment secret ever. Bill calls his secret "the dividend machine" -- and he has been sharing his secrets with hundreds of thousands of investors who have subscribed to his popular Dividend Machine newsletter, rated by Hulbert Digest as the #1 low risk investment letter. But many readers asked Bill to write a book about his secret and how ordinary investors can become millionaires just like him. Bill did just that. Now his new *The Great American Dividend Machine* reveals his own story, and how he went from becoming a middle-class accountant to having a net worth exceeding more than \$5 million! Traders who jump from stock to stock in the hunt for a major Wall Street score often lose money or, at best, break even. That's not an acceptable fate for the retirement nest egg or for Bill. Instead, true investors trust Bill Spetrino's proven advice: "Keep investments boring and the rest of life fun and exciting." By valuing safety and income above all else, Spetrino guides the reader through the process of unearthing true bargains in the marketplace. Adhering to the author's model, *The Great American Dividend Machine* portfolio is composed of stocks that he picks using his unique system. The companies that pass Spetrino's rigorous, multi-step vetting process must have a number of key characteristics, such as: Resonant brand names Strong, competitive advantages in their industries Pristine balance sheets Capital to help survive and thrive in difficult markets Bill believes anyone can become a millionaire by ignoring the Wall Street pros and using his time-tested strategies.

What can prosperity possibly mean in a world of environmental and social limits? The publication of *Prosperity without Growth* was a landmark in the sustainability debate. Tim Jackson's piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike: the continued pursuit of exponential economic growth. Its findings provoked controversy, inspired debate and led to a new wave of research building on its arguments and conclusions. This substantially revised and re-written edition updates those arguments and considerably expands upon them. Jackson demonstrates that building a 'post-growth' economy is a precise, definable and meaningful task. Starting from clear first principles, he sets out the dimensions of that task: the nature of enterprise; the quality of our working lives; the structure of investment; and the role of the money supply. He shows how the economy of tomorrow may be transformed in ways that protect employment, facilitate social investment, reduce inequality and deliver both ecological and financial stability. Seven years after it was first published, *Prosperity without Growth* is no longer a radical narrative whispered by a marginal fringe, but an essential vision of social progress in a post-crisis world. Fulfilling that vision is simply the most urgent task of our times.

This edition of the biennial Poverty and Shared Prosperity report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. Poverty and Shared Prosperity 2020: Reversals of Fortune presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of 'new poor.' Original analysis included in the report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead. Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change.

"The case for investing in your own career before anything else Michael Ellsberg and Bryan Franklin think you've been fed a lie: that if you save for decades and invest in 401(k)s, IRAs, and a home, these investments will grow steadily over decades, allowing twenty to thirty years of secure, peaceful retirement. This might have been true at some point in the last century, but it is not true

any longer. If you want to get ahead and enjoy a life of prosperity, the authors argue that you must invest in the most powerful source of wealth you'll ever know: your own earning power. Ellsberg and Franklin reveal how investing in yourself in various ways can guarantee a return much higher than the stock market or real estate. Boosting your skills, leadership, persuasion ability, and your network enriches the quality and meaning of your life at the same time that it enriches your wallet. Why wouldn't you bet on yourself?"--

Annual Report of the Secretary of the Treasury on the State of the Finances
