HOWARD HARPER

Vaideology Alfred Music (Music Sales America). With today's hardware and software sequencers, it's possible for anyone recording music on a budget to lay down professional-sounding grooves and produce music in the comfort of their home. Basic Rhythm Programming provides a guide to creating rolls, fills, and paradiddles on your computer, explaining every aspect of the process, from connecting up your soundcard to producing material rivalling that of the veteran programmers! If you're making music, or you want to, this book is for you. *Encyclopedia Of Rhythms* Alfred Music Publishing

Despite the name, this book is as useful for the advanced player as for the beginning pupil. It is a combination of the information presented in Rhythms Volumes One, Two and Three, but it is presented in a very simplified manner. The beginning student will be able to read the rhythms slowly, to familiarize themselves with basic rhythmic concepts. On the other hand, the advanced player will find that playing these exercises quickly will greatly facilitate reading skills. A "speed-reading" course for the advanced student, this is one of the teaching "secrets" that Mr. Arnold now presents in book form. All examples use one pitch, allowing the student to focus completely on time and rhythm on the instrument of their choice. All exercises can be downloaded from the internet to facilitate correct practice, enhance clarity and aid internalization.

See <http://www.muse-eeek.com> for details. This book is a required text at New York Universities and Princeton University Music department.

Bastien Sticking with the Basics Rhythm

Alfred Music Publishing
This is a starter book written by drummers for parents to introduce rhythms to their child. It is very basic, but for any age beginner. A child will probably get the feeling of playing a few basic rhythms quicker than you think. The book teaches how to read music by introducing note values, rests, and counting, with lots of examples to practice. It covers rhythms only, not differently pitched notes, so it is applicable to any and all musical instruments. We believe rhythm is an integral part of all humans. Just watch a child who can hardly stand, rock back and forth to a beat. As parents, let's gift our children with this gift for life.
