Victor), the literary and historiographical technique applied in Acts (Moessner, Koch, Lindemann), on Luke's theology / Christology (Schröter, Vouga) and on the use (and abuse) of Acts for reconstructing aspects of the history of Early Christianity (Breytenbach, Horn, Schmithals) and for constructing theology relevant to modern culture (Vouga).

Furthermore it contains a critical edition and commentary of the Martyrdom of Stephen with a discussion of its relationship to Acts (Bovon/Bouvier) and a presentation and discussion of some unknown Coptic Fragments of Acts (Bethge).

The election of a new bishop was a defining moment for local Christian communities in Late Antiquity. This volume contributes to a reassessment of the phenomenon of episcopal elections from the broadest possible perspective, examining the varied combination of factors, personalities, rules and habits that played a role in the process. Building on the state of the art regarding

late antique bishops and episcopal election, this interdisciplinary volume of collected studies by leading scholars offers fresh perspectives by focussing on specific case-studies and opening up new approaches.

For the first time this book provides a comprehensive diagnostic for all different methods in psychotherapy. Because of the individual approaches and structures this could not be realized until now.

Experts of seventeen schools-of-thought came together at a round table and drew up guidelines for the daily work of psychotherapists. The result is documented in this book, containing a summary of relevant standard questions; it also includes methodological commentaries for practical implementation. Despite the individual approach of the different types of psychotherapies, this psychotherapeutic diagnostic is applicable for all psychotherapists. *Arabic Verbs & Essentials*

David Moessner proposes a new understanding of the relation of Luke's second volume to his Gospel to open up a whole new reading of Luke's foundational contribution to the New Testament. For postmodern readers

who find Acts a 'generic outlier,' dangling tenuously somewhere between the 'mainland' of the evangelists and the 'Peloponnese' of Paul—diffused and confused and shunted to the backwaters of the New Testament by these signature corpora—Moessner plunges his readers into the hermeneutical atmosphere of Greek narrative poetics and elaboration of multi-volume works to inhale the rhetorical swells that animate Luke's first

readers in their engagement of his narrative. In this collection of twelve of his essays, re-contextualized and re-organized into five major topical movements, Moessner showcases multiple Hellenistic texts and rhetorical tropes to spotlight the various signals Luke provides his readers of the multiple ways his Acts will follow "all that Jesus began to do and to teach" (Acts 1:1) and, consequently, bring coherence to this dominant block of the New Testament that has

long been split apart. By collapsing the world of Jesus into the words and deeds of his followers, Luke re-configures the significance of Israel's "Christ" and the "Reign" of Israel's God for all peoples and places to create a new account of 'Gospel Acts,' discrete and distinctively different than the "narrative" of the "many" (Luke 1:1). Luke the Historian of Israel's Legacy combines what no analysis of the Lukan writings has previously accomplished, integrating seamlessly two

'generically-estranged' volumes into one new whole from the intent of the one composer. For Luke is the Hellenistic historian and simultaneously 'biblical' theologian who arranges the one "plan of God" read from the script of the Jewish scriptures—parts and whole, severally and together—as the saving 'script' for the whole world through Israel's suffering and raised up "Christ," Jesus of Nazareth. In the introductions to each major theme of the

essays, this noted scholar of the Lukan writings offers an epitome of the main features of Luke's theological 'thought,' and, in a final Conclusions chapter, weaves together a comprehensive synthesis of this new reading of the whole.

A STUNNING, PROVOCATIVE PERSPECTIVE ON THE DISCIPLE PETER AS DEPICTED BY MATTHEW "In this highly controversial work on Peter, Robert Gundry's intellectual gifts and remarkable powers of analysis are displayed to an even higher degree

than in his previous publications. . . One need not agree with Gundry's conclusions to acknowledge that the penetrating exegesis presented here and the nature of the argumentation as a whole demand serious reflection and engagement. Those who pay close attention to this brief but unusually weighty book will not be able to read Matthew in quite the same way that they did before." --MOISES SILVA author of *Biblical Words and Their Meaning* "Peter, long thought to be

'prince of the apostles' and one of the heroes of the Gospel of Matthew, is shown here to be neither. This extraordinarily closely argued volume by Robert Gundry offers a compelling case that Matthew constructs the figure of Peter as a failed disciple and an apostate. . . A courageous book that will require scholars to reassess how the Peter of Matthew came to be, in Gundry's words, 'airbrushed' and turned into a model of disciple and central figure in ecclesiastical memory." --

JOHN S. KLOPPENBORG University of Toronto "If Bob Gundry is known for anything, it is for his dogged pursuit of the meaning of Scripture. Here he once again provides fresh, penetrating analysis--in the present case, leading to an unsettling conclusion. Provocative, as he can often be, Gundry is never boring but always instructive and well worth a careful reading." --DONALD A. HAGNER Fuller Theological Seminary *You Can't Win Them All,*

 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may

help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists

both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows

how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

 The melodious recitation of the Quran is a fundamental aesthetic experience for Muslims, and the start of a compelling journey of ideas. In this important new book, the prominent German writer and Islamic scholar Navid Kermani considers the manner in which the Quran has been perceived, apprehended and experienced by its recipients from the time of the Prophet to the present day. Drawing on a wide range of Muslim sources, from historians,

theologians and philosophers to mystics and literary scholars, Kermani provides a close reading of the nature of this powerful text. He proceeds to analyze ancient and modern testimonies about the impact of Quranic language from a variety of angles. Although people have always reflected on the reception of texts, images and sounds that they find beautiful or moving, Kermani explains that Islam provides a particularly striking example of the close

correlation, grounded in a common origin, between art and religion, revelation and poetry, and religious and aesthetic experience. This major new book will enhance the dialogue between Islam and the West and will appeal to students and scholars of Islam and comparative religion, as well as to a wider readership interested in Islam and the Quran.

This white paper is part of a series that promotes

knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities and others. The availability and use of language technology in Europe varies between languages. Consequently, the actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors, such as the complexity of a given language and the size of

its community. META-NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current

situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language

technology applications can address any research gaps by 2020.

This monograph explores the theology of the Acts of the Apostles while taking seriously the status of the writing as ancient historiography: What does it mean to speak of theology in a historiographical work? How can this theology be apprehended? What does this theology have to do with the overall character of the writing and with how the writing

functioned for its original audience? Acts 19 is both, case study and source to generate the answers.

"Clare K. Rothschild offers the first comprehensive examination of why current models of Q feature traditions concerning John the Baptist both prominently and favorably. A close hermeneutical investigation of the NT Gospels, including literary phenomena such as the double attribution of

sayings to John and to Jesus, contradictions among sayings of Jesus, and significant thematic continuities between Baptist traditions and Q sayings on topics such as the Son of Man and Kingdom of God, support the argument that at some point in the undoubtedly complex pre-history of its redactions Q existed as a source of Baptist traditions exclusively. This study also includes an important new interpretation of the Markan transfiguration narrative."--BOOK JACKET.
