 When a young Algerian named Meursault kills a man, his subsequent imprisonment and trial are puzzling and absurd. The apparently amoral Meursault--who puts little stock in ideas like love and God--seems to be on trial less for his murderous actions, and more for what the authorities believe is his deficient character.

 The classical civilizations of Greece and Rome once dominated the world, and they continue to fascinate and inspire us. Classical art and architecture, drama and epic, philosophy and politics--these are the foundations of Western civilization. In *The Classical World*, eminent classicist Robin Lane Fox brilliantly chronicles this vast sweep of history from Homer to the reign of Hadrian. From the Peloponnesian War through the creation of Athenian democracy, from the turbulent empire of Alexander the Great to the creation of the Roman Empire and the emergence of

Christianity, Fox serves as our witty and trenchant guide. He introduces us to extraordinary heroes and horrific villains, great thinkers and blood-thirsty tyrants. Throughout this vivid tour of two of the greatest civilizations the world has ever known, we remain in the hands of a great master.

A war-torn country only 60 years ago, South Korea has since achieved prodigious growth and global integration, experiencing rapid industrialization and seeing its cultural exports gain international popularity. Because of this rapid transformation, an investigation of the Korean ethos--the shared self-concept woven through the divergent social contexts of both South and North Korea--is challenging. This book provides an introduction to the Korean ethos, detailing its representation in key cultural words and in film. Part I explores definitive concepts (terms) generally regarded as difficult to translate, such as han (regret), jeong (feeling) and deok (virtue), and how they are expressed in Korean cinema. Part II analyzes film narratives based on these concepts via close readings of 13 films, including three from North Korea.

*The Wonderful Wizard of Oz* is a children's novel written by L. Frank Baum and illustrated by W. W. Denslow. Originally published by the George M. Hill Company in Chicago on May 17, 1900, it has since been reprinted numerous times, most often under the name *The Wizard of Oz*, which is the name of both the popular 1902 Broadway musical and the well-known 1939 film adaptation. The story chronicles the adventures of a young girl named Dorothy Gale in the Land of Oz, after being swept away from her Kansas farm home in a cyclone.[nb 1] The novel is one of the best-known stories in American popular culture and has been widely translated. Its initial success, and the success of the 1902 Broadway musical which Baum adapted from his original story, led to Baum's writing thirteen more Oz books. The original book has been in the public domain in the US since 1956. Baum dedicated the book "to my good friend & comrade, My Wife," Maud Gage Baum. In January 1901, George M. Hill Company, the publisher, completed printing the first edition, which totaled 10,000 copies.

Everything she writes about novelists, like everything she writes about women, is fascinating.... Her well-stocked, academic, masculine mind is the ideal flint for the steel of her uncanny intuitions to strike on" (Cyril Connolly, *New Yorker*). Editorial Note by Leonard Woolf.

The concept of disparity has long been a topic of obsession and argument for philosophers but Slavoj Žižek would argue that what disparity and negativity could mean, might mean and should mean for us and our lives has never been more hotly debated. *Disparities* explores contemporary 'negative' philosophies from Catherine Malabou's plasticity, Julia Kristeva's abjection and Robert Pippin's self-consciousness to the God of negative theology, new realisms and post-humanism and draws a radical line under them. Instead of establishing a dialogue with these other ideas of disparity, Slavoj Žižek wants to establish a definite departure, a totally different idea of disparity based on an imaginative dialectical materialism. This notion of rupturing what has gone before is based on a provocative reading of how philosophers can, if they're honest, engage with each other. Slavoj Žižek borrows Alain Badiou's notion that a true idea is the one that divides. Radically departing from previous formulations of negativity and disparity, Žižek employs a new kind of negativity: namely positing that when a philosopher deals with another philosopher, his or her stance is never one of dialogue, but one of division, of drawing a line that separates truth from falsity.

The mathematical sciences are part of nearly all aspects of everyday life-the discipline has underpinned such beneficial modern capabilities as Internet search, medical imaging,

computer animation, numerical weather predictions, and all types of digital communications. *The Mathematical Sciences in 2025* examines the current state of the mathematical sciences and explores the changes needed for the discipline to be in a strong position and able to maximize its contribution to the nation in 2025. It finds the vitality of the discipline excellent and that it contributes in expanding ways to most areas of science and engineering, as well as to the nation as a whole, and recommends that training for future generations of mathematical scientists should be re-assessed in light of the increasingly cross-disciplinary nature of the mathematical sciences. In addition, because of the valuable interplay between ideas and people from all parts of the mathematical sciences, the report emphasizes that universities and the government need to continue to invest in the full spectrum of the mathematical sciences in order for the whole enterprise to continue to flourish long-term.

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of *The Old Testament*." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, *The New York Times*. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, *The Frankfurter Allgemeine Zeitung*. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-

abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic

principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.
